Globalization and Welfare Restructuring in China Huisheng Shou, 2016-10-14 In the past few decades the change in China's welfare system has been characterised by a balanced distribution of benefits across social sectors and the institutionalization of welfare redistribution This process has occurred without significant political change that would empower politically disadvantaged groups such as the urban and rural poor This book questions what has motivated the regime to redistribute welfare benefits through an institutionalized manner whilst its political structure remains largely unchanged By situating China within the broader context of East Asia and against the backdrop of globalization since the 1980s this book examines the institutional origin and development of China's new welfare system Through doing this it provides an understanding of the nature of the Chinese state in dealing with its economy and society in a context of global economic integration A global local dynamics framework highlights the importance of the interactive relationship between China's integration into the world economy and its unique geopolitical constraints which together induce the regime to listen to its subjects and follow a move to the middle in welfare restructuring Offering a novel explanation of the welfare globalization relations in a non democratic setting this book will be of interest to students and scholars of Social Policy International Political Economy and Chinese Politics

Understanding Korean Public Administration Kwang-Kook Park, Wonhee Lee, Seok-Hwan Lee, 2016-06-17 Although much has been written about the Korean public administration the international academic community has little knowledge about it as most of the literature has been written in Korean This book aims to provide more accessible knowledge internationally by filling that gap covering both the history and the current status of the Korean public administration This book is a collaboration of many Korean public administration scholars and would appeal to those interested in the secrets of Korea's rapid development in such a short span of time Each chapter covers historical contexts key to understanding its public administration and an important

aspect as Korea is a fast changing society The book takes on a more pragmatic approach rather than to put the Korean experiences into the western theory Each chapter therefore provides an extensive discussion on the lessons learned and practical implications

The Korean State and Social Policy Stein Ringen, Huck-ju Kwon, Ilcheong Yi, Taekyoon Kim, Jooha Lee, 2011-05-27 There are two great mysteries in the political economy of South Korea How could a destroyed country in next to no time become a sophisticated and affluent economy And how could a ruthlessly authoritarian regime metamorphose with relative ease into a stable democratic polity South Korea was long ruled with harsh authoritarianism but strangely the authoritarian rulers made energetic use of social policy The Korean State and Social Policy observes South Korean public policy from 1945 to 2000 through the prism of social policy to examine how the rulers operated and worked After the military coup in 1961 the new

leaders used social policy to buy themselves legitimacy That enabled them to rule in two very different ways simultaneously In their determination to hold on to power they were without mercy but in the use of power in governance their strategy was to co opt and mobilize with a sophistication that is wholly exceptional among authoritarian rulers It is governance and not power that explains the Korean miracle Mobilization is a strategy with consequences South Korea was not only led to economic development but also inadvertently perhaps built up as a society rich in public and civil institutions When authoritarianism collapsed under the force of nationwide uprisings in 1987 the institutions of a reasonably pluralistic social and political order were there alive and well and democracy could take over without further serious drama This book is about many things development and modernization dictatorship and democracy state capacity and governance social protection and welfare states and Korean history But finally it is about lifting social policy analysis out of the ghetto of self sufficiency it is often confined to and into the center ground of hard political science

Korean Workers and Neoliberal Globalization Kevin Gray, 2013-03-07 One of the most remarkable aspects of South Korea's transition from impoverished post colonial nation to fully fledged industrialized democracy has been the growth of its independent and dynamic labour movement Korean Workers and Neoliberal Globalisation examines current trends and transformations within the Korean labour movement since the 1990s It has been a common assumption that the third wave of democratisation the end of the Cold War and the spread of neoliberal globalisation in the latter part of the 20th century have helped to create an environment in which organised labour is better placed to overcome bureaucratic national unionism and transform itself into a potential counter globalisation movement However Kevin Gray argues that despite the apparent continued phenomena of labour militancy and the rhetoric of anti neoliberalism the mainstream independent labour movement in Korea has become increasingly institutionalised and bureaucratised into the new capitalist democracy This process is demonstrated by the Korean Confederation of Trade Unions experience of participation in various forms of policy making forums Gray suggests that as a result the KCTU has failed to mount an effective challenge against processes of neoliberal restructuring and concomitant social polarisation The Korean experience provides an excellent case study for understanding the relationship between organised labour and globalisation Korean Workers and Neoliberal Globalisation will appeal to students and scholars of Korean studies and International Political Economy as well as Asian politics and economics

The Global Korean Motor Industry Russell D. Lansbury, Chung-Sok Suh, Seung-Ho Kwon, 2007-01-24 This book examines the experiences of the globalizing Korean automobile industry with particular focus on the Hyundai Motor Company HMC one of the most prominent of the new Korean multinational corporations It provides an overview of the changing nature of the global automobile industry before considering in depth the globalization processes that the Korean automobile industry has undertaken Tracing the development of HMC as it recovered from the failure of its first venture overseas in Canada and tried again in India the authors explore the similarities and differences between the practices which HMC implemented in India

and Korea They highlight the importance of production systems and employment relations as part of HMC's growth and argue that if Korean companies such as HMC are to compete successfully as global automobile producers they will need to increase the proportion of overseas production establish global supply chains and improve co ordination between head office and subsidiaries Based upon extensive fieldwork in India and Korea this book is a detailed account of the globalization of the Korean automobile industry and Hyundai Motor Company Its findings will be of importance to all those who seek to understand the challenges faced by firms that attempt to become global players
