Song Of The Outriggers:

Song of the Outriggers Ralph R. Whitaker, 1968 *China as a Sea Power, 1127-1368* Lo Jung-pang, 2013-07-15 Lo Jung pang argues that during each of the three periods when imperial China embarked on maritime enterprises the Qin and Han dynasties the Sui and early Tang dynasties and Song Yuan and early Ming dynasties coastal states took the initiative at a time when China was divided maritime trade and exploration subsequently peaked when China was strong and unified and declined as Chinese power weakened At such times China s people became absorbed by internal affairs and state policy focused on threats from the north and the west These cycles of maritime activity each lasting roughly five hundred years corresponded with cycles of cohesion and division strength and weakness prosperity and impoverishment expansion and contraction In the early 21st century a strong and outward looking China is again building up its navy and seeking maritime dominance with important implications for trade diplomacy and naval affairs Events will not necessarily follow the same course as in the past but Lo Jung pang s analysis suggests useful questions for the study of events as they unfold and decades to come

A Global History of Pre-Modern Warfare Kaushik Roy, 2021-09-14 This book examines the military histories of the regions beyond Western Europe in the pre modern era Existing works on global military history mainly focus on the western part of Eurasia after 1500 CE As regards the ancient period such works concentrate exclusively on Greece and Rome So global military history is actually the triumphal story of the West from Classical Greece onwards This volume focuses not only on the eastern part of Eurasia but also on South America Africa and Australasia and seeks to explain the history and varied trajectories of warfare in non Western regions in the pre modern era Further it evaluates whether warfare in non Western regions should be considered primitive or inferior when compared with Western warfare The book notes that Western Europe became militarily significant only in the early modern era and argues that the military divergence that occurred during the early modern era is not unique it had also occurred in the Bronze Age the Classical era and in the medieval period This was due to the dynamism and innovativeness of non Western militaries and the interconnectedness that

existed in parts of the Eurasian landmass Further those polities which were able to construct a balanced military force by synthesising diverse elements were not only able to survive but also became capable of projecting power across continents This book will be of much interest to students of military history strategic studies and world history *Weavers of Song* Mervyn McLean,1999 This work is a study of Polynesian music illustrated by music examples and photographs *Catalog of Copyright Entries.
