Sort Of Life Sort Of Life:

Form as Compensation for Life Oddvar Holmesland, 1998 Stylistic study of Virginia Woolf's fiction Reading a novel by Virginia Woolf involves an element of double reflexivity first the reader's interaction with Woolf's words and what they describe and second the interaction of these words with the world Woolf perceived and attempted to represent Oddvar Holmesland takes this paradox and shows that it is not the invention of recent critics but something of which Woolf herself is well aware In a number of analyses of Woolf's major works *Mrs Dalloway* *To the Lighthouse* *The Waves* he explores the ambiguity that Woolf's reader must work through in order to reach the insights and rewards that her fiction offers Professor ODDVAR HOLMESLAND is Professor of English at the University of Tromsø Norway

Speaking of Forms of Life Claudio Campagna, Daniel Guevara, 2023-11-26 Humans pose an unprecedented threat to life in all its great diversity of forms The human induced extinction rate has been compared to mass extinctions of the past But this language masks the fact that the crisis is due to voluntary and thus avoidable choices and actions *Speaking of Forms of Life* shows that at the root of this crisis is the tragic inadequacy of the language predominantly used to represent and address what we are doing including the language of sustainable development rights for animals and the rest of nature their intrinsic value and conservation of species as populations This talk alienates us from the other living things from what they actually are have and do and it perpetuates the harm and loss Campagna and Guevara compellingly argue on rigorous but accessible grounds that there is an alternative language to guide conservation in confronting the radically urgent ethical issues it faces This is a language with which we are all familiar mastered by naturalists from Aristotle to Audubon It articulates the primary value in life and the standard that must guide how human beings should live as one form of life among countless others This book is a homecoming for those who practice conservation to above all else secure a creature's ability to satisfy the necessities of its form of life This is an essential book for anyone who cares about conservation and is concerned about the frightening pace of extinctions The great theme of the book is the importance of the language in which we think and talk about living beings Daniel Guevara and Claudio Campagna make available for conservationists the ground breaking work of Philippa Foot and Michael Thompson on natural goodness and on our thought about living beings They show how it can be brought to bear on the threats that confront conservation and on disputes that may seem irresolvable I recommend *Speaking of Forms of Life* as strongly as I can Cora Diamond William R Kenan Jr Professor Emerita of Philosophy Professor of Law and University Professor University of Virginia Our current conservation language is shot through with economic platitudes that don't explain anyone's real motives for conserving biodiversity Campagna and Guevara's new book lays out a convincing alternative grounding conservation goals in the objective goodness of life's many ways of flourishing *Speaking of Forms of Life* is inspiring informative well grounded in the relevant philosophy and conservation literatures but never pedantic Both activists and thinkers will find much of value in *Speaking of Forms of Life* Philip Cafaro Professor of Philosophy Colorado

State University Speaking of Forms of Life helps us confront the fact that language often obscures rather than facilitates our understanding of living things Our language reflects past misperceptions current ignorance and our shockingly limited intellectual ability to comprehend where we are in space and time and who we are with on this strange planet with its soap bubble coating of life The language in use has abetted and accelerated the catastrophic course we daily continue to choose Speaking of Forms of Life shows us why and how this must change It s a crucial revelation that we must heed because our species alone can consider changing course and our species alone must do so Carl Safina MacArthur Fellow Carl Safina Research Chair for Nature and Humanity Stony Brook University Our biosphere is a miracle Communicating the sense of awe and wonder that it instills in many of us is essential to shift from wanton destruction of our natural world for short term economic profit to health and prosperity for all creatures including us humans Speaking of Forms of Life is the first book that unveils how the way we speak to each other affects the way we value and care for our planet An essential read for everyone who cares about the future of nature and humanity Enric Sala National Geographic Explorer in Residence and Hubbard Medalist

Life and Mortality in Ugaritic Matthew McAfee, 2019-06-07 While topics such as death funerary cult and the netherworld have received considerable scholarly attention in the context of the Ugaritic textual corpus the related concept of life has been relatively neglected Life and Mortality in Ugaritic takes as its premise that one cannot grasp the significance of mwt to die without first having wrestled with the concept of yy to live In this book Matthew McAfee takes a lexical approach to the study of life and death in the Ugaritic textual corpus He identifies and analyzes the Ugaritic terms most commonly used to talk about life and mortality in order to construct a more representative framework of the ancient perspective on these topics and he concludes by synthesizing the results of this lexical study into a broader literary discussion that considers among other things the implications for our understanding of the first millennium Katumuwa stele from Zincirli McAfee s study complements previous scholarly work in this area which has tended to rely on conceptual and theoretical treatment of mortality and advances the discussion by providing a more focused lexical analysis of the Ugaritic terms in question It will be of interest to Semitic scholars and those who study Ugaritic in particular in addition to students of the culture of the ancient Levant

J. M. Coetzee's Politics of Life and Late Modernism in the Contemporary Novel Marc Farrant,2024-03-05 Surveying the full breadth of J M Coetzee's career as both academic and novelist this book argues for the necessity of rethinking his profound indebtedness to literary modernism in terms of a

politics of life Isolating a particular strain of late modernism epitomised by Kafka and Beckett Farrant claims that Coetzee's writings consistently demonstrate an agonistic engagement with the concept of life that involves an entanglement of politics and ethics which supersedes the singular theoretical frameworks often applied to Coetzee such as postcolonialism posthumanism and animal studies Running throughout his engagement with questions of modernity and colonialism storytelling and life writing human and non human life religion and post Enlightenment subjectivity Coetzee's politics of life yield a new literary cosmopolitanism for the twenty first century a powerful commentary on our interrelatedness that emphasises finitude and contingency as fundamental to the way we live together
