Army. Corps of Engineers,1975 **The Twin Sister Planets Venus and Earth** Robert J. Malcuit,2015 This book explains how it came to be that Venus and Earth while very similar in chemical composition zonation size and heliocentric distance from the Sun are very different in surface environmental conditions It is argued here that these differences can be accounted for by planetoid capture processes and the subsequent evolution of the planet satellite system Venus captured a one half moon mass planetoid early in its history in the retrograde direction and underwent its fatal attraction scenario with its satellite Adonis Earth on the other hand captured a moon mass planetoid Luna early in its history in prograde orbit and underwent a benign estrangement scenario with its captured satellite *Mayakovsky* Edward James Brown,2015-03-08 An absorbing portrait of an extraordinary man an analysis of the work of a great Russian poet and the evocation of a crucial period in Russian cultural history all are combined in Edward J Brown s literary biography of Vladimir Mayakovsky It is the only book to reveal the whole Mayakovsky not just aspects of his tortured personality or artistic work and will be immediately recognized as definitive Mayakovsky contributed to the cultural life of Soviet Russia not only as a lyric poet but as a playwright graphic artist and satirist of the conventional art forms of his day By examining his art in terms of his life Edward Brown shows how intensely personal it was and how bound up in the literary and political history of his time The intellectual turmoil of the period is skillfully re created especially the nature ambience and personalities of Russian futurism Above all the book reveals the man a committed Bolshevik and a dedicated artist but also a hypochondriac compulsive gambler and eventual suicide Originally published in 1973 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905 [Earth, Our Original Monastery](#) Christine Valters Paintner,2020-04-03 How can we meet God in

[Our Mother Earth](#) Pope Francis, Ecumenical Patriarch Bartholomew,2020-08-27 Gathered from the writings and discourses of Pope Francis on the environment *Our Mother Earth* sets forth a Christian vision of ecology Responding to our global ecological crisis Pope Francis says will require a global approach in which the whole human family in the search for a sustainable and integral development unites to protect our common home Pollution climate change loss of biodiversity and exploitation of resources will grow exponentially if we do not change our direction in the short term We need an environmental conversion Pope Francis says For this to be possible we need a truly ecological education to create a renewed awareness and a renewed conscience In an exclusive new essay that concludes *Our Mother Earth* Pope Francis develops a theology of ecology in a profoundly spiritual discourse This final chapter offers thoughts on how a Christian vision of care for the earth goes well beyond a secular vision of ecology This means that it is for humanity s capacity for communion to condition the state of creation It is therefore humanity s destiny to determine the destiny of the universe

Earth 101: the Hidden Planet Steven Fazekas,2017-10-20 Humans have been intrigued with the sky and what lies beyond since the beginning of time They looked at the moon the stars and the planets while they wished to unlock their secrets An unexplainable yearning a strange homesickness guided their attempt a subconscious one that always suggested that humans may have originated from another celestial object In other words earth may have been a stop gap for them

perhaps a temporary stay over Humans have always been amazed by the creatures of this planet birds fish mammals worms amphibians insects how easily they all fit into their natural environment Humans on the other hand are restless and battle endlessly and struggle with earths environment In our yearning to belong to a natural environment we humans had created an idolized and mystified place that we described in the Bible as the Garden of Eden What if this place actually existed This book suggests that humans original home humans natural environment does exist not in tales or legends but somewhere out in our planetary system Read this book and you may agree that it makes sense You might even conclude that this concept is not so far fetched Earth 101 The Hidden Planet explores mankinds ability to extend its domain and attempt to shed its earthly handicaps

Bruno Latour,2024-01-22 In this book Bruno Latour calls upon Christians to join the struggle to avert a climate catastrophe First and foremost Christians need to overcome their lack of interest in earthly things and pay attention to the Earth at a time when it is being neglected He also urges Christians to renew their understanding of their faith in the context of the new image of the world that has emerged from earth system science that of a world in which the myriad of beings that inhabit the world are interdependent and living in close proximity on a slender fragile membrane on the surface of the planet This new image of the world cannot fail to have an impact on the sciences on politics and on religion just as in earlier centuries the cosmology of Copernicus and Galileo upset the old order Latour sees the ecological crisis and the cosmological mutation that it entails as an opportunity to convey anew to the largest possible audience the tradition of Christianity as it has never been appreciated before by bringing to bear the lessons of eschatology on the great crisis that looms before us all

Against a Blackened Sky Jan Steen,2022-01-15 Against a Blackened Sky the story of one man s falling out with organized religion is told by a future observer whose knowledge of history is incomplete Without sanctioned access to historical accounts the storyteller has pieced together an explanation of man s predicament that seems plausible to him His problem is that he cannot accomplish in his own life the virtues that he admires in the subject of his story In his partial understanding he looks back longingly to a time he feels to be simpler than the complex world he lives in The storyteller is a member of the crew who man a lunar based laser The subject of his narrative Colonel Smith was a member of the pioneering crew who laid the foundation for the establishment of that base In Colonel Smith s day a world now past satellite technology became obsolete The need for a moon based laser became desperate in the pursuit of peace and security Through a series of mishaps Colonel Smith is marooned alone on the moon and must endure a year of solitude It is during that time that he is able to rethink and ultimately to redirect his life When at last he is rescued he returns to an Earth that will be profoundly affected by the work he helped to begin on the moon In a world of tightening alternatives man has not lost his battle with technology but rather has surrendered to it It is the storyteller s lament that man has given up without a struggle Should the story of the teller and of his subject seem ill fated and harshness and gloom seem to hang over the tragedy of their lives it is only because the message of hope has been missed The door has been opened and we have stepped through but the door has not closed

behind us We might yet step back through close that door from the other side and find another opened to us Amazing grace
