Designing successful products and services in the digital age requires a multi-disciplinary team with expertise in interaction design, visual design, industrial design and other disciplines. It requires expertise in project management, user research and consensus building. This comprehensive, full color volume addresses all of these and more with detailed how-to information, real life examples and exercises. Topics include assembling a design team, planning and conducting user research, analyzing your data and turning it into personas, using scenarios to drive requirements definition and design, collaborating in design meetings, evaluating and iterating your design and documenting finished design in a way that works for engineers and stakeholders alike.
