The Africans Knew:

The Africans Knew Tillie S. Pine, Joseph Levine, 1967 Colorfully illustrated text reveals that African tribes of long ago knew and practiced the techniques of smelting iron casting bronze irrigating crops and making and mixing paints and dyes

The French Encounter with Africans William B. Cohen, 2009-07-22 As French and American historians of France are revisiting the history of French racism today William B Cohen s book is more important than ever It has become a classic Nancy L Green In this pioneering work William B Cohen traces the ways in which negative attitudes toward blacks became deeply embedded in French culture Examining the forces that shaped these views Cohen reveals the persistent inequality of French interactions with blacks in Africa in the slave colonies of the West Indies and in France itself Now a classic *The French Encounter with Africans* is essential reading for anyone engaged in current discussions of European relations with non Europeans and with issues of racism ethnicity identity colonialism and empire

The Russia-Ukraine War from an African Perspective Artwell Nhemachena, 2023-09-30 In the Russia Ukraine war attention has been focused on the Special Military Operation This book argues that there are many other special operations in various other arenas in the world that deserve equal and urgent attention Connecting special military operations to what it calls special economic operations special cultural operations special technological operations special sexual operations and special political operations the book argues that special operations are not exclusive Also drawing on topical debates about technoscience the book critically examines invasive technologies in relation to bodily autonomy integrity and privacy and it urges scholars and thinkers to compare these invasive technological operations to invasive special military operations The book grapples with the future of humanity in a world where the human is decentred even as the world is witnessing the proliferation of resource wars The book is relevant for scholars in anthropology sociology politics government studies international relations history media studies science and technology studies and disaster management

The Mind of Black Africa Dickson Mungazi, 1996-02-28 The violent colonization of Africa by European nations toward the end of the 19th century a colonization justified by theories about the African Mind promulgated in the Age of Reason had a profound impact upon the mind of Black Africa After World War II the mind of Black Africa rebelled this rebellion led to a struggle for the self After Africans achieved political independence the new African leaders betrayed their own people Africans now have the responsibility of restoring and reaffirming their true inheritance the mind of Black Africa

The Last British Liberals in Africa Dickson Mungazi, 1999-05-30 A study of the clash of two traditions British liberalism and African nationalism and an examination of how Michael Blundell in Kenya and Garfield Todd in Zimbabwe used their liberal backgrounds to further the future of their adopted countries despite threats and detention Both Blundell and Todd believed that political leaders had a responsibility to serve the needs of the people as a condition of national development By the time each came to power European colonization had had a profoundly negative effect on the lives of Africans Blundell and Todd sought to correct this by putting their positive

views of Africans into practice While colonial governments designed strategies for controlling Africans to serve political and economic interests at home in Europe Africans themselves established their own effective strategy not only to ensure their survival in the colonial setting but also to initiate a process for the restoration of their sense of self Michael Blundell and Garfield Todd with their liberal beliefs served as excellent allies in this period of a rising African consciousness Using sources obtained in Kenya and Zimbabwe over the past 15 years this work examines democratic traditions that have survived tumultuous times in recent years

The Face of Africa Stan Chu Ilo, 2012-12-01 This book is a call on Africans and non Africans to once more believe in the possibility of a better future for Africa In these pages Stan Chu Ilo writes of his experience and the experiences of many young Africans like himself who are disturbed by the present condition of Africa He writes about the challenges facing most Africans who are growing up in the African continent without any hope of quality education without any guarantee of adequate food water housing and clothing without any hope of getting a job and without any prospect of living in peace with their neighbors He writes of the sad situation of millions of young Africans who are dying of malaria and HIV AIDS and the African women whose fate and fortune have been shackled by a male dominated society He questions the bases of the existence of the failed states of Africa who are caught up in a cycle of violence and disorder and who are not asking the right questions about the future of their nations He argues that corruption excessive authoritarianism a stubborn hold on power and lack of openness to consensus building among some African leaders insult the cultural value of Africans with regard to a sense of community love and solidarity He also writes of the pain of globalization the debt burden immigration and trade restrictions on Africans and African countries exploitation of ordinary Africans by fellow Africans and Western governments and business conglomerates He wonders why many Western nations should turn their backs on Africa when they all share some responsibility in bringing Africa to her knees However even though many Africans have become exhausted in the battle for national survival and for a living space to pursue their ordered ends this book proposes that Africans should not claim perpetual victimhood rather they should stand up once more and work for a better tomorrow which is possible and within their reach Ilo insists that the imposing mountains of economic and social ruin the rising moans and groans of numberless Africans should not weaken the inner energy and ardent hopes of millions of Africans struggling against the untested assumption that the cracking social political and economic foundations of present day Africa are incapable of supporting the structures of a new Africa The face of Africa today is ugly but behind the ugly face is the beauty that has been distorted by historical and cultural factors The present condition of Africa is only the sign of the urgent need for the peoples of Africa to brace up for the long and hard journey to reclaim their future Ilo outlines how non Africans who are interested in the African condition can be involved with the peoples of Africa A proper understanding of the African continent and her peoples her history and cultural evolution is a necessary first step for those who wish to be engaged with the Africans His total picture approach model as the key to interpreting the African condition and in comprehensively

addressing the challenges facing Africa offers a helpful and original tool in understanding Africa. It helps to overcome the stereotypes, prejudices and paternalism which non Africans apply in their reading of African history and their relation with the African reality. With masterly skills, a keen sense of history, a balanced perspective and objectivity, Ilo identifies the constraints to growth and innovation in Africa in terms of the low stocks in the human capital and cultural development. He introduces a new concept in the interpretation of the African condition: homelessness in terms of cultural and existential crises that confront Africans today. His conclusion is that cultural and human development is the irreducible decimal in any proposal for the transformation of the continent that grassroots village based action should be preferred over bogus and unworkable national approaches to African development.

Exchanging Our Country Marks Michael A. Gomez, 2000-11-09. The transatlantic slave trade brought individuals from diverse African regions and cultures to a common destiny in the American South. In this comprehensive study, Michael Gomez establishes tangible links between the African American community and its African origins and traces the process by which African populations exchanged their distinct ethnic identities for one defined primarily by the conception of race. He examines transformations in the politics, social structures and religions of slave populations through 1830, by which time the contours of a new African American identity had begun to emerge. After discussing specific ethnic groups in Africa, Gomez follows their movement to North America where they tended to be amassed in recognizable concentrations within individual colonies and later states. For this reason, he argues, it is possible to identify particular ethnic cultural influences and ensuing social formations that heretofore have been considered unrecoverable. Using sources pertaining to the African continent as well as runaway slave advertisements, ex slave narratives and folklore, Gomez reveals concrete and specific links between particular African populations and their North American progeny, thereby shedding new light on subsequent African American social formation.

Man, Know Thyself Rick Duncan, 2013-07-09. Man Know Thyself is perhaps one of the world's oldest and most important sayings. This adage was originally coined by Imhotep, the world's first multi-genius and perhaps the greatest creative mortal individual who ever lived. Imhotep lived over five and a half thousand years ago from our present age. It must be said immediately that Imhotep was an African. He is among our first Notable Ancestors. Considering Imhotep's instruction, it means that as individuals, as a family, collectively as a people, a community, a society or a nation, we should know ourselves that is who we are. This includes knowledge of who spawned us, where we have been and where we currently are. Knowing this as our Notable Ancestor and Grandmaster Teacher, Baba Dr. John Henrik Clarke has said, will tell us who we are and where we must get to. Who we are is dependent on who we were. Who we were should determine who we should be. To emphasise the point, Marcus Garvey, another of our most important Notable Ancestors, frequently reiterated this advice when he reminded us that our first

obligation is to know ourselves He told us that we should make our knowledge about us so complete so as to make it impossible for others to take advantage of us He told us that in order to know ourselves we must know who our Ancestors were and what they achieved We would then realize who we are and what we are capable of achieving This is the meaning of the African adage and Sankofa symbol of looking back in order to go forward The importance of knowing our ancestors has been summed up in an old Native American saying that It is the spirit of our ancestors that should guide our path There is a sense however that Africans have forgotten our ancestors Because of this there is no spirit to guide us and so Africans are lost and confused The roots of African spirituality and culture have been made redundant Yet as Dr Clarke points out the umbilicord that tied Africans to our spiritual and cultural roots have only been stretched It has never been broken It is for Africans to come to this realization and to rediscover the spirit of our ancestors This volume lists some of our Notable Ancestors in the hope that knowledge about them and their achievements will aid some of us in understanding where we have been who we presently are and consequently who we must become Ultimately it is hoped that we may use this knowledge to reconnect with the spirit of our Ancestors and let them be our guide This volume is based on the truth about Africans and therefore correcting what is told about us This corrective knowledge of us is important because as Imhotep said Know the truth and the truth shall set you free This means being free to interpret our own story and to define who we are This is crucial because although history is a witness to the truths history has been stolen by others who have hidden the truths about us History has never been true or kind to Africans and therefore it cannot tell us about us Yet as Peter Tosh intimated we cannot come to a consciousness of ourselves of who we are if we do not know the truths about us History has been described as the Queen of the academic subjects So important is History that it is said that whoever controls history controls the future In one sense education in general and history in particular is about teaching us who we are History teaches who we are so as to help us to know where we belong in our community or society Africans cannot know where we belong in society however because our story has been told by others those who own history Africans are therefore unaware of who we are because what is known about us is not the truth about us The story of Africans the oldest people on earth like the history of the world is taught by others Yet these others came into the world thousands of years after Africans had already established great civ Freedom By Force Therese Harasymiw, 2017-12-15 When people are routinely and systematically oppressed for years it is only logical that they eventually rise up against their oppressors For African slaves in North America these rebellions were largely unsuccessful Nevertheless the anger and uprisings that came from people who wanted their freedom and were willing to fight for it are important parts of the story of the fight to end slavery Readers get a deeper understanding of crucial slave rebellions throughout history through thoroughly researched text primary sources and topical photographs
