Neuromatic John Lardas Modern, 2021-10-07 John Modern offers a powerful and original critique of neurology's pivotal role in religious history In Neuromatic religious studies scholar John Lardas Modern offers a sprawling examination of the history of the cognitive revolution and current attempts to locate all that is human in the brain including spirituality itself Neuromatic is a wildly original take on the entangled histories of science and religion that lie behind our brain laden present from eighteenth century revivals to the origins of neurology and mystic visions of mental piety in the nineteenth century from cyberneticians Scientologists and parapsychologists in the twentieth century to contemporary claims to have discovered the neural correlates of religion What Modern reveals via this grand tour is that our ostensibly secular turn to the brain is bound up at every turn with the religion it discounts ignores or actively dismisses In foregrounding the myths ritual schemes and cosmic concerns that have accompanied idealizations of neural networks and inquiries into their structure Neuromatic takes the reader on a dazzling and disturbing ride through the history of our strange subservience to the brain *National Library of*

Mind/Body Integration S. Ancoli, Erik Peper, M. Quinn, 2012-12-06 Biofeedback training is a research methodology and training procedure through which people can learn voluntary control over their internal physiological systems It is a merger of multiple disciplines with interest deriving from many sources from basic understanding of psychophysiology to a desire for enhanced self awareness The goals of biofeedback are to develop an increased awareness of relevant internal physiological functions to establish control over these functions to generalize control from an experimental or clinical setting to everyday life and to focus attention on mind body integration Biofeedback is explored in many different settings In the university biofeedback equipment and applications can be found in the departments of experimental and clinical psychology counseling physiology biology education and the theater arts as well as in the health service student infirmary Outside the university biofeedback may be found in different departments of hospitals such as physical medicine private clinics education and self awareness groups psychotherapy practices and elsewhere Its growth is still expanding and excitement is still rising as a result of biofeedback's demonstration that autonomic functions can be brought under voluntary control and that the long standing artificial separation between mind body and consciousness can be disproven
