Old Age in English History Pat Thane,2000-05-11 At the end of the twentieth century more people are living into their seventies eighties nineties and beyond a process expected to continue well into the next millennium The twentieth century has achieved what people in other centuries only dreamed of many can now expect to survive to old age in reasonably good health and can remain active and independent to the end in contrast to the high death rate ill health and destitution which affected all ages in the past Yet this change is generally greeted not with triumph but with alarm It is assumed that the longer people live the longer they are ill and dependent thus burdening a shrinking younger generation with the cost of pensions and health care It is also widely believed that the past saw few survivors into old age and these could be supported by their families without involving the taxpayer In this first survey of old age throughout English history these assumptions are challenged Vivid pictures are given of the ways in which very large numbers of older people lived often vigorous and independent lives over many centuries The book argues that old people have always been highly visible in English communities and concludes that as people live longer due to the benefits of the rise in living standards far from being burdens they can be valuable contributors to their family and friends *A London Bibliography of the Social Sciences* ,1973 Vols 1 4 include material to June 1 1929 A History of Western Society, Volume 1 John P. John Winthrop Francis J. Bremer,2009-09-11 John Winthrop 1588 1649 was the first governor of the Massachusetts Bay

Colony and is generally considered the principal architect of early New England society. He led the colonists through the initial struggles to survive in a new world, shaped the political organizations that gave the colonists the right to govern themselves through elected governors, and representatives worked to mediate between those who advanced radical religious and political ideas on the one hand and those who sought a very narrowly defined orthodoxy and contributed to the development of a system of education which insured the preservation of the founders' heritage. The details of this brief biography are drawn from the author's larger prize-winning study *John Winthrop: America's Forgotten Founding Father* (Oxford University Press, 2003), though modified in minor ways by his ongoing research. To render it more accessible to an undergraduate audience, Bremer avoids in-depth discussion of theology and other specialized topics and focuses instead on trying to provide students with an appreciation of how Winthrop's world differed from theirs but how at the same time he dealt with issues that continue to resonate in our own society. In placing his life in the context of the times, Bremer discusses Winthrop's family life and the challenges of life faced by men, women, and children in the seventeenth century. The key themes that are integrated into the biographical narrative are how Winthrop's religion was shaped by the times and in turn how it influenced his family life and the moral outlook that he brought to his political career, his understanding of society as a community in which individuals had to subordinate their individual goals to the advancement of the common good, and his struggle to define where the line needed to be drawn between new or different ideas that enriched religious and political growth and those that threatened the stability of a society.

*A Cultural History of Tragedy in the Early Modern Age* Naomi Conn Liebler, 2021-05-20

In this volume 8 lively original essays by eminent scholars trace the kaleidoscopically shifting dramatic forms, performance contexts, and social implications of tragedy throughout the period and across geographic, political, and social references. They attend not only to the familiar cultural lenses of English and mainstream Continental dramas but also to less familiar European exempla from Croatia and Hungary. Each chapter takes a different theme as its focus: forms and media, sites of performance and circulation, communities of production and consumption, philosophy and social theory, religion, ritual, and myth, politics of city and nation, society and family, and gender and sexuality.
