Slater, Gervase Rosser, 2016-12-05 This volume of essays explores the interaction of Church and town in the medieval period in England Two major themes structure the book In the first part the authors explore the social and economic dimensions of the interaction in the second part the emphasis moves to the spaces and built forms of towns and

their church buildings The primary emphasis of the essays is upon the urban activities of the medieval Church as a set of institutions parish diocese monastery cathedral In these various institutional roles the Church did much to shape both the origin and the development of the medieval town In exploring themes of topography marketing and law the authors show that the relationship of Church and town could be both mutually beneficial and a source of conflict The Reformation and the Towns in England Robert Tittler,1998 This analysis of the secular impact of the Reformation examines the changes within English towns from the mid 16th to the mid 17th century **Medieval Towns** John Schofield,A. G. Vince,2003-01-01 Though the book is primarily about medieval towns in Britain many parallels are drawn with contemporary towns and cities all over Europe from Ireland to Russia and from Scandinavia to Italy It is written in the belief that medieval urban archaeology should be a Europe wide study as are the fields of architecture and urban history BOOK JACKET Popular Protest in Late Medieval English Towns Samuel Kline Cohn,Douglas Aiton,2013 Draws new attention to popular protest in medieval English towns away from the more frequently studied theme of rural revolt Towns and Local Communities in Medieval and Early Modern England David M. Palliser,2024-10-28 Professor Palliser focuses here on towns in England in the centuries between the Norman Conquest and the Tudor period on which he is an acknowledged authority Urban topography archaeology economy society and politics are all brought under review and particular attention is given to relationships between towns and the Crown to the evidence for migration into towns and to the vexed question of urban fortunes in the 15th and 16th centuries Two essays set urban history in a broader framework by considering recent work on town and village formation and on the development of parishes The collection includes two hitherto unpublished studies and is introduced and put in context by a new survey of English towns from the 7th to the 16th centuries **Interpreting the English Village** Mick Aston,Christopher Gerrard,2013-02-07 An original and approachable account of how archaeology can tell the story of the English village Shapwick lies in the middle of Somerset next to the important monastic centre of Glastonbury the abbey owned the manor for 800 years from the 8th to the 16th century and its abbots and officials had a great influence on the lives of the peasants who lived there It is possible that abbot Dunstan one of the great reformers of tenth century monasticism directed the planning of the village The Shapwick Project examined the development and history of an English parish and village over a ten thousand year period This was a truly multi disciplinary project Not only were a battery of archaeological and historical techniques explored such as field walking test pitting archaeological excavation aerial reconnaissance documentary research and cartographic analysis but numerous other techniques such as building analysis dendrochronological dating and soil analysis were undertaken on a large scale The result is a fascinating study about how the community lived and prospered in Shapwick In addition we learn how a group of enthusiastic and dedicated scholars unravelled this story As such there is much here to inspire and enthuse others who might want to embark on a landscape study of a parish or village area Seven of the ten chapters begin with a fictional vignette to bring the story of the village to
