Infertility affects more than 3 million married couples in the United States This study explored the use of Traditional Chinese Medicine TCM for treating female infertility Surveys queried allopathic practitioners and TCM practitioners regarding their perceived knowledge and use of TCM The vast majority of allopathic practitioners referred patients to acupuncturists and believed that acupuncture helped patients The majority of respondents identified a trend for treating female infertility with TCM and Western medical procedures The majority of respondents supported the concurrent use of allopathic protocols and TCM but did not support the concurrent use of TCM and Chinese Herbal Medicine CHM More than 62% of respondents expressed familiarity with clinical studies that used TCM for treating stress depression and irregular menstrual cycles Positive results from evidence based studies would likely encourage allopathic practitioners to use TCM and adopt a more holistic collaborative approach for treating female infertility      Principles of Traditional Chinese Medicine Xiangcai Xu,2001
