Sweden and Poland Entering the EU Niklas Eklund,2005 Although from very different countries and political experiences elites in Sweden and Poland show remarkable cognitive similarities Another contribution to a cross national understanding of adaptation to the EU is the cognitive model which is developed on the basis of empirical study The model expands upon and goes beyond the simple dichotomy of Enthusiasts and Skeptics in the discussion about European integration Two new categories are introduced and defined as Voluntarists and Pragmatists The argument is that new cognitive categories are necessary to improve the description and analysis of how national policy makers in Europe set up long term political goals and manage complex issues in the process of European integration *English Synonyms Explained*
