## **The Environment Preserving The Future:**

The Human Right to a Green Future Richard P. Hiskes, 2009 This book presents an argument for establishing environmental human rights as the legitimate possession of both present and future generations It uses these rights to clean air water and soil to make an argument for justice across generations that is for recognizing the obligation that present generations have to preserve the environment and natural resources for future generations Revolutionizing Indian Law: Trends, Challenges And Future Directions Ms. Sangeeta Aarya, 2025-05-03 This book provides a comprehensive exploration of the Indian legal system tracing its historical evolution and the influence of colonial rule It delves into the structure of India's judiciary legislature and Constitution highlighting fundamental rights judicial review and legal reforms Covering contemporary trends it examines technological advancements in law corporate regulations environmental legislation and human rights protections The book also addresses key challenges such as corruption gender justice and access to legal education With discussions on emerging legal fields landmark cases and policy reforms it serves as a valuable resource for students professionals and policymakers shaping India's legal future *Multicultural and Religious Perspectives on Protecting the Environment, the Biosphere, and Biodiversity* Joseph Tham, John Lunstroth, Sameer Advani, 2025-09-30 This thought provoking volume unites bioethics experts from seven major world religions Buddhism Christianity Confucianism Daoism Hinduism Islam and Judaism alongside secular thinkers to explore environmental protection through the lens of the UNESCO Declaration on Bioethics and Human Rights It foregrounds the power of diverse perspectives in addressing one of humanity's most pressing challenges the ecological crisis The contributions provide rich and distinct religious and cultural viewpoints as they confront the anthropological ethical and social dimensions of this crisis Showcasing dialogue where traditions and philosophies collide they offer unique insights into global bioethics and human rights that should inspire new ways of thinking and foster meaningful collaboration in the fight for our planet's future The book is valuable reading for researchers scholars and students in bioethics environmental ethics religious studies and beyond Protecting future generations through commons Saki Bailey, Gilda Farrell, Ugo Mattei, 2014-01-09 The recent austerity measures currently adopted in numerous European countries assume that a rise in public debt should automatically result in cuts to social programmes and the privatisation of inefficiently managed resources This type of reasoning is being used to justify the destruction of social rights of citizens for the profit of the private sector resulting in more limited access to the most fundamental resources such as water nature housing culture knowledge and information mainly for the most vulnerable members of society Such a view informed solely by short term growth and profit cycles is endangering access to those resources not only for current generations but for future ones as well This book is an attempt to go beyond liberal approaches to intergenerational and distributive justice It emphasises the role of commons and communities of the commons driven by the desire to defend and perpetuate those fundamental resources under the threat of expropriation by the state and

the market This book also offers policy makers and citizens who wish to accept their political responsibility by being active and refusing corporate ideology some best practices as well as methods and solutions for renewing the configurations of societal relationships through commons thereby integrating the interests of future generations in the European Community's decision making processes and institutions This is a contribution by the Council of Europe and the International University College of Turin to the protection of the dignity of every person especially of those who even though unable to enjoy existing social rights have the right to benefit from choices and policies that ensure that human life remains unspoiled **Climate**
