The Essential "New Art Examiner" Terri Griffith, Kathryn Born, Janet Koplos, 2011-12-01 The New Art Examiner was the only successful art magazine ever to come out of Chicago It had nearly a three decade long run and since its founding in 1974 by Jane Addams Allen and Derek Guthrie no art periodical published in the Windy City has lasted longer or has achieved the critical mass of readers and admirers that it did The Essential New Art Examiner gathers the most memorable and celebrated articles from this seminal publication First a newspaper then a magazine the New Art Examiner succeeded unlike no other periodical of its time Before the word blog was ever spoken it was the source of news and information for Chicago area artists And as its reputation grew the New Art Examiner gained a national audience and exercised influence far beyond the Midwest As one critic put it it fought beyond its weight class The articles in The Essential New Art Examiner are

organized chronologically Each section of the book begins with a new essay by the original editor of the pieces therein that reconsiders the era and larger issues at play in the art world when they were first published The result is a fascinating portrait of the individuals who ran the New Art Examiner and an inside look at the artistic trends and aesthetic agendas that guided it Derek Guthrie and Jane Addams Allen for instance had their own renegade style James Yood never shied away from a good fight And Ann Wiens was heralded for embracing technologies and design The story of the New Art Examiner is the story of a constantly evolving publication shaped by talented editors and the times in which it was printed Now more than three decades after the journal s founding The Essential New Art Examiner brings together the best examples of this groundbreaking publication great editing great writing a feisty staff who changed and adapted as circumstances dictated a publication that rolled with the times and the art of the times With passion insight and editorial brilliance the staff of the New Art Examiner turned a local magazine into a national institution *The Focal Encyclopedia of Photography* Michael R. Carvalho,2018-08-06 This book advances an enactivist theory of aesthetics through the study of inscrutable artworks that challenge us to think because we do not know what to think about them John M Carvalho presents detailed analyses a four artworks that share this unique characteristic Francis Bacon s Study After Vel zquez s Portrait of Pope Innocent X 1953 the photographs of Duane Michals based on a retrospective of his work Storyteller at the Carnegie Museum of Art 2014 tant donn s 1968 by Marcel Duchamp and Jean Luc Godard s 1963 film Le M pris released in the United States as Contempt Carvalho argues against the application of theory to derive appreciation or meaning from these artistic works Rather each study enacts an embodied cognitive engagement with the specific artworks intended to demonstrate the value of thinking about artworks that might be extended to our engagement with the world in general This thinking happens as these studies show when we trust our embodied skills and their guide to what artworks and the world around us afford for the activation and refinement of those skills Thinking with Images will be of interest to scholars working in the philosophy of art and philosophical aesthetics as well as art historians concerned with the meaning and value of contemporary art The Fundamentals of Creative Photography David Praker,2021-01-14 The Fundamentals of Creative Photography offers a comprehensive introduction to the world of applied creative photography It is concerned with photography in a professional context images that are to be used in the fulfilment of a brief rather than those created solely for self expression Creativity is important but must be focused on meeting the client s needs The book explores the principles that underpin the discipline guiding the reader though the practical considerations involved in executing the perfect shot It includes guidance on acquiring and developing new skills the practice of self promotion and self administration and a discussion of the image workflow *Impure Vision* Moa Goysdotter,2015-01-01 American staged art photography is the focus of this unique in depth study Offering a new methodological strategy for viewing photographs this fascinating account analyzes the work of four of the leading names in this new genre Les Krims Duane Michals Arthur Tress and Lucas Samaras and applies new perspectives to 1970s art photography As it sheds fresh light on the four artists critiques of purist ideals it also looks closely at their efforts to transcend the limitations of the purely visual effect of photography Not only does this book tell the history of American staged photography in broad terms by drawing on theories and methods new to the field but it also presents the latest approaches to photography history and theory *A Dictionary of the Avant-gardes* Richard Kostelanetz,H. queer perspective offering discussions on what a queering methodology for photography may entail by drawing links between artistic strategies in photographic practice and key theoretical concepts from photography theory queer theory critical theory and philosophy With different examples of conceptual perspectives including representation formalism and mediumlessness it seeks to diversify queer methodology for photography While primarily addressing photography this book is entwined with broader philosophical questions concerning identity difference and the creations of systems of thought that limit the possibilities of existence to binary categorisation It proposes a new concept of the photographic image that addresses its materiality in the form of the poetic and the political in relationship to a generative principle that is named as a queer quality the photograph s ability to voice queer concerns also beyond its role as representation This book will be of interest to scholars working in photography art history queer studies new materialism and posthumanism

The Aesthetics of Boredom Agnė Narušytė, 2010 This book discusses boredom as an aesthetic category that helps to explain a tendency in late 20th c art to focus on everyday things avoid definite meaning or create nothing The aesthetics of boredom result from a paradoxical situation when aesthetic experiences are created from banality the very phenomenon that artists try to escape from Such an attitude of indifferent detachment from Soviet reality formed into a strong artistic statement in Lithuanian photography of the 1980s when photographers not only represented the boring existence in the USSR but also emphasised the banality of environment and emptiness of space through visual monotony They replaced the decisive moment with chance and tried to slow the time of the photograph thus focusing on the value of the eventless present moment
