**City of Dreadful Delight** Judith R. Walkowitz, 2013-06-14 From tabloid exposes of child prostitution to the grisly tales of Jack the Ripper narratives of sexual danger pulsed through Victorian London Expertly blending social history and cultural criticism Judith Walkowitz shows how these narratives reveal the complex dramas of power politics and sexuality that were being played out in late nineteenth century Britain and how they influenced the language of politics journalism and fiction Victorian London was a world where long standing traditions of class and gender were challenged by a range of public spectacles mass media scandals new commercial spaces and a proliferation of new sexual categories and identities In the midst of this changing culture women of many classes challenged the traditional privileges of elite males and asserted their presence in the public domain An important catalyst in this conflict argues Walkowitz was W T Stead s widely read 1885 article about child prostitution Capitalizing on the uproar caused by the piece and the volatile political climate of the time women spoke of sexual danger articulating their own grievances against men inserting themselves into the public discussion of sex to an unprecedented extent and gaining new entree to public spaces and journalistic practices The ultimate manifestation of class anxiety and gender antagonism came in 1888 with the tabloid tales of Jack the Ripper In between there were quotidian stories of sexual possibility and urban adventure and Walkowitz examines them all showing how women were not simply figures in the imaginary landscape of male spectators but also central actors in the stories of metropolotin life that reverberated in courtrooms learned journals drawing rooms street corners and in the letters columns of the daily press A model of cultural history this ambitious book will stimulate and enlighten readers across a broad range of interests **The**

**Ethic of Freethought** Karl Pearson, 2013-06 Unlike some other reproductions of classic texts 1 We have not used OCR Optical Character Recognition as this leads to bad quality books with introduced typos 2 In books where there are images such as portraits maps sketches etc We have endeavoured to keep the quality of these images so they represent accurately the original artefact Although occasionally there may be certain imperfections with these old texts we feel they deserve to be made available for future generations to enjoy Demography and Degeneration Richard A. Soloway, 2014-02-01 Richard Soloway offers a compelling and authoritative study of the relationship of the eugenics movement to the dramatic decline in the birthrate and family size in twentieth century Britain Working in a tradition of hereditarian determinism which held fast to the premise that like tends to beget like eugenicists developed and promoted a theory of biosocial engineering through selective reproduction Soloway shows that the appeal of eugenics to the middle and upper classes of British society was closely linked to recurring concerns about the relentless drop in fertility and the rapid spread of birth control practices from the 1870s to World War II Demography and Degeneration considers how differing scientific and pseudoscientific theories of biological inheritance became popularized and enmeshed in the prolonged often contentious national debate about race suicide and the dwindling family Demographic statistics demonstrated that birthrates were declining among the better

educated most successful classes while they remained high for the poorest least educated portion of the population For many people steeped in the ideas of social Darwinism eugenicist theories made this decline all the more alarming they feared that falling birthrates among the better classes signified a racial decline and degeneration that might prevent Britain from successfully negotiating the myriad competitive challenges facing the nation in the twentieth century Although the organized eugenics movement remained small and elitist throughout most of its history this study demonstrates how pervasive eugenic assumptions were in the middle and upper reaches of British society at least until World War II It also traces the important role of eugenics in the emergence of the modern family planning movement and the formulation of population policies in the interwar years

*Ethics and Urban Design* Gideon S. Golany, 1995-08-01 The city according to urban design scholar Gideon Golany is the largest and most complicated project ever produced by humankind In *Ethics and Urban Design* he challenges design professionals to reexamine their basic assumptions about the urban environment and offers design strategies based on enduring human values In search of answers to the paradoxical problems of the modern city Golany takes the reader through the sweep of human settlements from the dawn of civilization to the present His authoritative examination of the genesis of the city is illuminated by instructive examples of early urban centers Mesopotamia the Indus River Valley the Egyptian cities of the Nile and the capital cities of ancient China all are examined in the light of what made them work as major centers of human activity What Golany finds in the success stories of the past are cohesive sociocultural values that shaped the design of homes neighborhoods and cities These ethical values helped to maintain an equilibrium within the society that permeated its natural social and human made environments In the present era conversely he finds a major disconnection between human values and the ethics of technology which has resulted in confusion imbalance and dehumanization To help designers gain a perspective on possible solutions Golany explains leading comprehensive design strategies including the valley theory the urban border zone concept and the regional concept of Patrick Geddes In the case study of contemporary Holland he details what a small densely populated country has been able to achieve through design planning rooted in environmental ethics

Future Frontiers for Urban Design the culminating section of this groundbreaking book opens with Golany's vision of the future city He examines the issues of thermal performance and climate as they relate to urban design and offers the concept of geospace the earth enveloped habitat Buttressing his presentation with detailed information on the mechanics of geospace Golany describes case studies of the successful use of earth enveloped habitats in China and Tunisia He makes a powerful argument for the geospace city as a renewal of ancient traditions that can restore the vital equilibrium between nature and human settlements that we seem to have lost

*Ethics and Urban Design* is a distinguished scholar's analysis and prescription for the city it offers an abundance of stimulating ideas for the architects designers and planners who have assumed responsibility for its future *Ethics Urban Design* draws on historical examples and contemporary case studies from around the world to illustrate urban design strategies that can help restore equilibrium to the natural social and built

environments of the city In this stimulating book urban design scholar Gideon Golany offers architects designers and planners both an in depth analysis of the fundamental issues of urban design and practical options for the design of the future city Examines the genesis and development of the city from the earliest settlements to the rise of urban society Presents urban design strategies based on historical examples of early urban centers including Mesopotamia the Indus River Valley Egypt and China Offers case studies of environmental success stories from Europe Asia and Africa Details geospace design options the use of underground space for diversified land use housing and transportation Fully illustrated with over 80 photographs drawings and diagrams **The Athenaeum** ,1901 **Late Victorian Utopias: A Prospectus, Volume 1** Gregory

Claeys,2021-03-24 This collection of literary utopias calls for a complete overhaul of existing assumptions about utopian writing in this period The representation of utopian texts in these volumes shows that William Morris is far from representative of basic trends in the genre in this era This is Volume 1 of 6 and looks at selected works from 1875 to 1879

**Late Victorian Utopias: A Prospectus** Gregory Claeys,2024-07-31 This collection of literary utopias calls for a complete overhaul of existing assumptions about utopian writing in this period The representation of utopian texts in these volumes shows that William Morris is far from representative of basic trends in the genre in this era **The Free Thought Magazine** ,1902 **Reproductive Ethics II** Lisa Campo-Engelstein,Paul Burcher,2018-08-20 This book is the second collection of essays on reproductive ethics from Drs Campo Engelstein and Burcher This volume is unique in that it is both timely and includes several essays on new technologies while also being a comprehensive review of most of the major questions in the field from racial disparities in reproductive healthcare to gene editing and the possibility of the creation of a transhuman species The scholars writing these essays are pre eminent in their fields and their backgrounds are quite varied including philosophers anthropologists physicians and professors of law Reproductive ethics remains an underdeveloped area of bioethics despite the recent technological breakthroughs that carry both great promise and potential threats Building on the first volume of work from a conference held just over one year ago this new collection of essays from a conference held April 2017 continues this discussion as well as provides ethical insights and reviews of these emerging technologies The ethical questions swirling around human reproduction are both old and new but the conference presentations and the essays derived from them focus on new ways of appreciating old arguments such as the ethics of abortion as well as new ways of seeing new technologies such as CRISPR and mitochondrial transfer Birth Control and the Population Question in England, 1877-1930 Richard A. Soloway,2017-10-10 Soloway examines the origins of the modern birth control movement in England in the wider context of the dramatic decline in fertility that first became apparent in the 1880s He concludes that the response of individuals and organizations drawn into the debate over birth control and the consequences of diminished fertility mirrored their attitudes toward the profound social economic moral political and cultural changes altering Great

**The Saturday Review of Politics, Literature, Science and Art** ,1902     The Educated Woman Katharina Rowold,2011-02-09 The Educated Woman is a comparative study of the ideas on female nature that informed debates on women s higher education in the late nineteenth and early twentieth centuries in three western European countries Exploring the multi layered roles of science and medicine in constructions of sexual difference in these debates the book also pays attention to the variety of ways in which contemporary feminists negotiated and reconstituted conceptions of the female mind and its relationship to the body While recognising similarities Rowold shows how in each country the higher education debates and the underlying conceptions of women s nature were shaped by distinct historical contexts

**Victorian Scientific Naturalism** Gowan Dawson,Bernard Lightman,2014-04-28 Victorian Scientific Naturalism examines the secular creeds of the generation of intellectuals who in the wake of The Origin of Species wrested cultural authority from the old Anglican establishment while installing themselves as a new professional scientific elite These scientific naturalists led by biologists physicists and mathematicians such as William Kingdon Clifford Joseph Dalton Hooker Thomas Henry Huxley and John Tyndall sought to persuade both the state and the public that scientists not theologians should be granted cultural authority since their expertise gave them special insight into society politics and even ethics In Victorian Scientific Naturalism Gowan Dawson and Bernard Lightman bring together new essays by leading historians of science and literary critics that recall these scientific naturalists in light of recent scholarship that has tended to sideline them and that reevaluate their place in the broader landscape of nineteenth century Britain Ranging in topic from daring climbing expeditions in the Alps to the maintenance of aristocratic protocols of conduct at Kew Gardens these essays offer a series of new perspectives on Victorian scientific naturalism as well as its subsequent incarnations in the early twentieth century that together provide an innovative understanding of the movement centering on the issues of community identity and continuity
