**The Nation-State in Question** T.V. Paul, G. John Ikenberry, John A. is by John Ikenberry      *Alan S. Milward and a Century of European Change* Fernando Guirao, Frances M. B. Lynch, Sigfrido M. Ramírez Pérez, 2012 The main purpose of the book is to introduce the work of Alan S Milward and to acknowledge the full magnitude of his scientific contribution to contemporary British and European history The book is a collection of essays which provide a better understanding of Alan Milward s extensive intellectual work for future scholars and facilitate the knowledge and transmission of his published work to present and future generations of students scholars in the various disciplines concerned and the general public The series of original contributions which this book contains are related to or reflect critically upon Milward s own contributions to the fields of political diplomatic and socio economic history political science economics international relations and European Studies in general This book honors Alan Milward through a better understanding of his many pioneering contributions in the fields of contemporary European history in general and the history of European integration in particular Although the volume does not aim to be a substitute for Milward s work itself it illuminates and assesses his creative process along fifty years of continued and intense work as well as the impact of his main work and the continuing relevance of his main theses today      Secession from a Member State and Withdrawal from the European Union Carlos Closa, 2017-09-07 The first book to jointly analyse withdrawal of a member state from the EU i e Brexit and territorial secession      Between Governing and Governance Poul F Kjaer, 2010-02-05 This book explains the emergence and functioning of three forms of governance structures within the context of the European integration and constitutionalisation process comitology regulatory agencies and the Open Method of Co ordination The point of departure is the insight that the intergovernmental supranational distinction which most theories of European integration and constitutionalisation rely on has lost its strength A new paradigm of EU research is therefore needed Against this background it is suggested that the distinction between governing and governance provides a more appropriate basis for analysing the phenomenon of integration and constitutionalisation in Europe The distinction between governing and governance allows for an understanding of the EU as a hybrid consisting of a governing dimension characterised by legal and organisational hierarchy and a governance dimension which operates within a network form characterised by legal and organisational heterarchy The function of governance structures is to ensure the embeddedness of the governing dimension in the wider society Instead of representing contradictory developments the two dimensions are therefore mutually constitutive in the sense that more governing implies more governance and vice versa These theoretical insights are illustrated through two detailed case studies which respectively reconstruct the operational mode of the Open Method of Coordination within EU Research Development Policy and the regulatory system for the EU chemicals market REACH The book is interdisciplinary in nature and incorporates insights from law political science and sociology      **A Converging Post-War European Discourse** Thomas C. Hoerber, 2014-12-24 This book explores the most important components and contributing factors to the European integration process during the 1950s It seeks to combine comparative politics and political history to examine

core themes such as war experience national security military security economic security societal security and research and education in three major European countries i e France Germany and Britain It analyses the references to the ensuing European integration process in national parliamentary debates analyzing which national needs were thought European integration could cater to but also which national positions were seen as being compromised by a closer European commitment The development of a national position on European integration and in turn the evolution of European concepts are considered by using discourse theory on parliamentary debates in France Germany and Britain Parliamentary discourses are shown to be an ideal source for analyzing grand themes such as European integration because they cover all fundamental ideas they have to be public and open ended deliberations which in turn determined the position of each country towards European integration The great variety of positions reflected in the parliamentary discourse in particular those which did not prevail and which did not find their way into the commonly accepted historical storyline of European integration provide a greater comprehensiveness and a better understanding of the history of the European integration process The European Social Dialogue Under Articles 138 and 139 of the EC Treaty Christian Welz,2008-01-01 Describes analyses and assesses the European social dialogue from a combined theoretical and normative perspective and applies theoretical strands stemming from industrial relations EC law and political theory to an understanding and assessment of the genesis actors processes and outcomes of the European social dialogue through 2007 **Public Law** Andrew Le Sueur,Maurice Sunkin,Jo Eric Murkens,2016 Public Law Text Cases and Materials explores how the law works in practice The key institutions legal principles and conventions that underpin the public law of the UK are brought to life through the inclusion of extracts from key sources which are explained and critiqued by the authors **European Integration Since the 1920s** Mark Hewitson,2024-10-14 Brexit populism and Euroscepticism seem to have challenged old assumptions about European integration and raised the prospect of disintegration This book re examines why the European Union and its forerunners were created and investigates how and why they have changed It links contemporary events to historical explanation arguing that there were long term sets of conditions dating back to the 1920s which pushed European governments to cooperate economically and to try to resolve their diplomatic differences The failure of the French and German governments to create what Aristide Briand had called a European federal union demonstrated both the precariousness of the enterprise and its connection to the domestic politics of European states After 1945 the unexpected advent of a Cold War and the military diplomatic and economic presence of the United States in Europe facilitated the gradual development of habits of cooperation and institutional integration but they also placed limits on European governments activities as did disagreements between political parties and the expectations of citizens As a consequence supranational bodies such as the European Commission have been accompanied and often overshadowed by intergovernmental institutions such as the European Council with the EU as a whole functioning in important respects as a type of confederation The volume addresses a series of

large scale historical questions which are integral to an understanding of the European Union It asks how and why citizens of member states have identified with the EU how matters of security affected the development of the European Community during and after the Cold War whether economic and social convergence have taken place and with what consequences and why European institutions have come to function as they have The study is thematic focusing on the most important aspects of European integration and explaining why member states have decided to carry out or have consented to the unique experiment of the European Union

**Public Law: Text, Cases, and Materials 2e** Andrew Le Sueur, Maurice Sunkin, Jo Murkens, 2013-03-21 This dynamic text cases materials book provides a thought provoking guide to the public law of the UK It sets out key institutions legal principles and conventions and its clear commentary draws on case studies and extracts from a range of sources to provide a full understanding of the law and the major theoretical and political debates

*Origins and Evolution of the European Union* Desmond Dinan, 2014-02 Focusing not just on the great events but on the smaller incremental developments too this work gives an in depth look at developments in European Union history

*Politics in the European Union* Simon Bulmer, Owen Parker, Ian Bache, Stephen George, Charlotte Burns, 2020 This is an account of the main developments in the process of European integration It provides coverage of theory history member states institutions and policies drawing on academic debates including issues of legitimacy and globalisation

State Formation Christian Krohn-Hansen, Knut G. Nustad, 2005-09-20 What is the state and how can we best study it This book investigates new ways of analysing the state The contributors argue that the state is not a fixed and definite object Our perceptions of it are constantly changing and differ from person to person What is your idea of the state if you are a refugee Or if you are living in post apartheid South Africa Our perceptions are formed and sustained by evolving discourses and techniques these come from institutions such as government but are also made by communities and individuals The contributors examine how state structures are viewed from the inside by official state bodies composed of bureaucrats and politicians and how these state manifestations are supported reproduced or transformed at a local level An outline of theoretical approaches is followed by nine case studies ranging from South Africa to Peru to Norway With a good range of contributors including Cris Shore Clifton Crais Ana Alonso and Bruce Kapferer this is a comprehensive critical analysis of anthropological approaches to the study of state formation

*The Origins of Energy and Environmental Policy in Europe* Thomas C. Hoerber, 2013 This book examines the development of a European environmental conscience through successive steps of European integration in energy policy In the 1960s 70s the world was slowly beginning to realise that environment degradation was not sustainable With phenomena such as acid rain it became clear that pollution did not stop at national boundaries and the European environmental conscience developed in parallel to such growing environmental concerns The oil crisis in 1973 was a turning point in the integration process for both energy policy and environment policy and while further integration towards the European energy policy failed the environmental policies took shape in measures such as energy saving The Commission

incorporated both energy and environmental policies into the EU policy canon and built an institutional framework responding to the insufficiency of national policy answers and the developing environmental conscience of the European people This book will be of interest to students and scholars of European Integration European Union politics and history and environmental politics and policy

**The Idea of a European Superstate** Glyn Morgan, 2009-01-10 Is there a justification for European integration The Idea of a European Superstate examines this the most basic question raised by the European Union In doing so Glyn Morgan assesses the arguments put forward by eurosceptics and their critics In a challenge to both sides of the debate Morgan argues in support of a European superstate Unless Europe forms a unitary sovereign state Europe will remain so he maintains weak and dependent for its security on the United States The Idea of a European Superstate reshapes the debate on European political integration It throws down a gauntlet to eurosceptics and euro enthusiasts alike While employing the arguments of contemporary political philosophy and international relations this book is written in an accessible fashion that anyone interested in European integration can understand
