The Academic Bestiary:

The Academic Bestiary Richard Armour, 1974 *The Academic Bestiary* Richard Armour, 1974 Habits of Mind William Allen, 2017-09-20 *Habits of Mind* maintains that the fact that almost everyone now goes to college need not be seen as an obstacle to excellence in education. Some critics have insisted that college is not for everyone but William B Allen and Carol Allen assert that the college diploma has rightly become as much the norm in this century as the high school diploma was during the twentieth century. Accordingly it is essential that higher education remains true to its deepest purpose the cultivation of proficient humanity. The authors see the key to this goal as the development of judgment or habits of mind. Habits of mind are far and away the most influential determinants of human conduct and nowhere are they more profoundly shaped than in institutions of higher education. Furthermore liberal education has proven most effective in this undertaking. The authors elaborate on the purpose of higher education and identify the chief obstacles to achieving its aim. They demonstrate the critical role of academic leaders in achieving the aim of higher education and posit that excellence in judgment is the primary characteristic of the academic leaders who fulfill this role. They examine three aspects of access to higher education: academic readiness, the cost and funding of higher education and the capacity of the physical plant. Finally they use policies developed in Virginia to demonstrate realistic approaches to achieving the aims of access and quality discussed throughout the book. The authors draw on their years of experience as practitioners in both private and public institutions: liberal arts colleges and research universities to develop their material. This volume will be of interest to faculty and students in higher education programs, nation and state public policymakers, legislative and academic leaders and a general public concerned about the cost and value of a college education. *Knowledges* Ellen Messer-Davidow, David R. Shumway, David Sylvan, 1993. Anyone interested in the relationship between disciplines and today this means everyone should read this collection which is itself a model of interdisciplinarity. Stanley Fish, Duke University. Academic Animals Lois Roney, 2002. *Academic Animals: A Bestiary of Higher Education Teaching and How It Got That Way*. Profiles of eighteen ubiquitous faculty types, most of them tenured, including: Beaver democratically leveling the curricular landscape; Boar bullying his students and rooting out traitors among his colleagues; Mule supportively training her students how not to pull their weight; Moose making his way alone through the culture war blizzards that have ravaged his department; Snapping Turtle refusing to poke her head out of her impenetrable 60s style shell; Walrus stolidly defending his herd against the cold implacable currents of reality; Shark voraciously deconstructing colleagues and departments so as to free his students from the elitist trammels of the past and more. This is a Field Guide. From *The Key Reporter*, Winter 2003. Lois Roney's hilarious meander through our strife-torn zoos parades 18 prototypes of academic fauna that run from the armadillo to the walrus. They include a wonderful teacher and an awful one, a bully intimidating his dead white colleagues with racist anti-racist attacks, learning-disabled students in quest of B's, terrorizing teachers, learning-disabled profs impressing students and peers.

who know no better and a remedial education specialist cashing in on the tide of illiteracy that swells over the campus The only species missing from Roney's menagerie is the Mock Turtle with her account of lessons called lessons because they lessen from day to day Keen-eyed readers will spot students not their own and colleagues not their own preening professing convening caucusing theorizing swathed in prejudice or imbibing it When she hauls the ethics economics intellect and wonky professionalism of academe over the coals Roney is ruthless acerbic sardonic sometimes unjust but most of the time right on Subversively funny serious sparkling this is a deeply reactionary book All deep reactionaries should make a beeline for it by Eugen Weber Copyright 2003 by the Phi Beta Kappa Society
