America's Strategy in a Changing World Sean M. Lynn-Jones, Steven E. Miller, 1992 Del 1 America's Strategic options in a Changing Security Environment Del 2 Dimensions of U S Strategy after the Cold War

In the Shadow of the Rising Sun William S. Dietrich, 1991-09-15 Why is the United States unable to compete effectively with Japan What explains the inability of American political leaders to devise an industrial policy capable of focusing the energies of American business on the task of meeting the Japanese challenge How can America emerge from the shadow of the Rising Sun This book addresses these questions and proposes a controversial decision To get at the political roots of American economic decline businessman scholar William Dietrich puts the disciplined thinking of political philosophy comparative politics and international political economy to effective use in analyzing the source and nature of American institutional weakness Unlike many who have written on U S Japanese relations Dietrich does not seek a solution a particular new policy or institutional innovation such as an American counterpart to Japan's MITI Rather he emphasizes the systemic nature of America's problems The failures of management finance and politics are interlocking and reinforcing he shows and thus a change in the others that spell doom for any partial approach Most fundamental however are the political weaknesses of the system It is in the basic political inheritance of America reflected in the very design of the Constitution and the long dominance of Jeffersonian individualism over Hamiltonian statism that we must locate the roots of American impotence in the face of Japan's challenge As the problem is systemic so must the solution be equally wide ranging Nothing short of fundamental institutional reform Dietrich argues will succeed in reversing America's downward course Boasts about the victory of free market capitalism in the wake of the collapse of the Communist state directed system are premature and distract attention from the necessary recognition that it is the Japanese combination of the free market with a strong central state and a highly skilled professional bureaucracy that has really proved triumphant in our modern age of advanced technology Only if we fully understand the reasons for Japanese success and American decline can we begin the arduous but crucial task of reconstructing the American polity to give it the power required to formulate and implement a national industrial policy that can regain for the United States its preeminent place among the world's industrial powers The alternative Dietrich describes in a chilling scenario is a Pax Nipponica that will find America playing second fiddle to Japan with economic cultural and political consequences that will make Britain's eclipse by the United States earlier in this century seem mild by comparison
