The Age Of The Automobile:

The Age of the Automobile George Bishop, 1977 **The Age of the Automobile** H. J. Perkin, 2016-07-31 This lively work offers a wide ranging account of the social history of the motorised age and of the machine which has reshaped the character and development of the modern world It places the development of the car and of its more sinister cousins the tank and the war plane in their context and impact on society in peace and war from the Edwardian period onwards The author shows that automobiles in particular represented a modernity which promised to the individual power over time space and their own personal machine They were emblems too of sex appeal and of the new consumerism They were prismatic of modern society itself and a futuristic key to its social history And as they came down in price over time they opened up the world anew to the middle and then the working class This is a social history of modern Britain at its most focussed on issues that really matter

The Automobile Age James J. Flink, 1990-07-19 In this sweeping cultural history James Flink provides a fascinating account of the creation of the world s first automobile culture He offers both a critical survey of the development of automotive technology and the automotive industry and an analysis of the social effects of automobility on workers and consumers The Age of the Muscle Car Clay Fees, 2022-02-01 A breed unlike any seen before or since the powerful stylish American muscle car defined an era in automotive history This history traces the rise and fall of these great performance cars from their precursors in the 1950s through the seminal appearance of the Pontiac GTO in 1964 and then year by year to the end in the 1970s Approachable and nontechnical yet deeply informative it puts the bygone muscle car in its cultural and aesthetic contexts describes developments in styling performance and marketing and revels in the joys of muscle car ownership in the 21st century

Horse Trading in the Age of Cars Steven M. Gelber, 2008-10 Gelber s highly readable and lively prose makes clear how this unique economic ritual survived into the industrial twentieth century in the process adding a colorful and interesting chapter to the history of the automobile

The Age of New Waves James Tweedie, 2013-09-02 The Age of New Waves examines the origins of the concept of the new wave in 1950s France and the proliferation of new waves in world cinema over the past three decades The book suggests that youth cities and the construction of a global market have been the catalysts for the cinematic new waves of the past half century It begins by describing the enthusiastic engagement between French nouvelle vague filmmakers and a globalizing American cinema and culture during the modernization of France after World War II It then charts the growing and ultimately explosive disenchantment with the aftermath of that massive social economic and spatial transformation in the late 1960s Subsequent chapters focus on films and visual culture from Taiwan and contemporary mainland China during the 1980s and 1990s and they link the recent propagation of new waves on the international film festival circuit to the economic miracles and consumer revolutions accompanying the process of globalization While it travels from France to East Asia the book follows the transnational movement of a particular model of cinema organized around mise en sc ne or the interaction of bodies

objects and spaces within the frame rather than montage or narrative The master shot style of directors like Hou Hsiao Hsien Tsai Ming Liang and Jia Zhangke has reinvented a crucial but overlooked tendency in new wave film and this cinema of mise en scene has become a key aesthetic strategy for representing the changing relationships between people and the material world during the rise of a global market The final chapter considers the interaction between two of the most global phenomena in recent film history the transnational art cinema and Hollywood and it searches for traces of an American New Wave

The Life of the Automobile Steven Parissien, 2014-05-13 The Life of the Automobile is the first comprehensive world history of the car The automobile has arguably shaped the modern era more profoundly than any other human invention and author Steven Parissien examines the impact development and significance of the automobile over its turbulent and colorful 130 year history Readers learn the grand and turbulent history of the motor car from its earliest appearance in the 1880s as little more than a powered quadricycle and the innovations of the early pioneer carmakers The author examines the advances of the interwar era the Golden Age of the 1950s and the iconic years of the 1960s to the decades of doubt and uncertainty following the oil crisis of 1973 the global mergers of the 1990s the bailouts of the early twenty first century and the emergence of the electric car This is not just a story of horsepower and performance but a tale of extraordinary people of intuitive carmakers such as Karl Benz Sir Henry Royce Giovanni Agnelli Fiat Andre Citroen and Louis Renault of exceptionally gifted designers such as the eccentric Ohio born Chris Bangle BMW and of visionary industrialists such as Henry Ford Ferdinand Porsche the Volkswagen Beetle and Gene Bordinat the Ford Mustang among numerous other game changers Above all this comprehensive history demonstrates how the epic story of the car mirrors the history of the modern era from the brave hopes and soaring ambitions of the early twentieth century to the cynicism and ecological concerns of a century later Bringing to life the flamboyant entrepreneurs shrewd businessmen and gifted engineers that worked behind the scenes to bring us horsepower and performance The Life of the Automobile is a globe spanning account of the auto industry that is sure to rev the engines of entrepreneurs and gearheads alike

The Automobile ,1906 The Age of Dualization

Patrick Emmenegger, Silja Häusermann, Bruno Palier, Martin Seeleib-Kaiser, 2012-08-01 Poverty increased inequality and social exclusion are back on the political agenda not only as a consequence of the Great Recession of 2008 but also because of a seemingly structural trend towards increased inequality in advanced industrial societies that has persisted since the 1970s Policies in labor markets social policy and political representation are strongly linked in the creation widening and deepening of insider outsider divides a process known as dualization While it is certainly not the only driver of increasing inequality its development across multiple domains makes dualization one of the most important current trends affecting developed societies The comparative perspective of this book provides insights into why Nordic countries witness lower levels of insider outsider divides whereas in continental liberal and southern welfare states they are more likely to constitute a core characteristic of the political economy Most importantly the comparisons presented in this book point to the crucial

importance of politics and political choice in driving and shaping the social outcomes of deindustrialization While increased structural labor market divides can be found across all countries governments have a strong responsibility in shaping the distributive consequences of these labor market changes Insider outsider divides are ultimately the result of political choice A landmark publication this volume is geared for faculty and graduate students of economics political science social policy and sociology as well as policymakers concerned with increasing inequality in a period of deep economic and social crisis

The Age of the Automobile ,1981 **The Age of the Automobile** Harold James Perkin,1976 **The Age of Smoke** Frank Uekötter,2009-02-15 In 1880 coal was the primary energy source for everything from home heating to industry Regions where coal was readily available such as the Ruhr Valley in Germany and western Pennsylvania in the United States witnessed exponential growth yet also suffered the greatest damage from coal pollution These conditions prompted civic activism in the form of anti smoke campaigns to attack the unsightly physical manifestations of coal burning This early period witnessed significant cooperation between industrialists government and citizens to combat the smoke problem It was not until the 1960s when attention shifted from dust and grime to hazardous invisible gases that cooperation dissipated and protests took an antagonistic turn The Age of Smoke presents an original comparative history of environmental policy and protest in the United States and Germany Dividing this history into distinct eras 1880 to World War I interwar post World War II to 1970 Frank Uekoetter compares and contrasts the influence of political class and social structures scientific communities engineers industrial lobbies and environmental groups in each nation He concludes with a discussion of the environmental revolution arguing that there were indeed two environmental revolutions in both countries one societal where changing values gave urgency to air pollution control the other institutional where changes in policies tried to catch up with shifting sentiments Focusing on a critical period in environmental history The Age of Smoke provides a valuable study of policy development in two modern industrial nations and the rise of civic activism to combat air pollution As Uekoetter s work reveals the cooperative approaches developed in an earlier era offer valuable lessons and perhaps the best hope for future progress **The Age of Steel** ,1901 **World History of the Automobile** Erik Eckermann,2001-09-01 This book details the development of the automobile from its early beginnings to the present day With emphasis on the European historical perspective particularly the pioneering developments which occurred in Germany World History of the Automobile chronicles the early vehicles by Daimler Maybach and Benz the Mercedes Era the role of motor vehicles in World Wars I and II and the numerous technological and business revolutions of the second half of the 20th century Ending a Career in the Auto Industry Melissa A. Hardy, Lawrence Hazelrigg, Jill Quadagno, 1996-09-30 During the 1980s the news media were filled with reports of soaring unemployment as downsizing and restructuring became the new buzzwords Firms managed their workforce reduction by increasing the attractiveness of their pension plans especially their early retirement plans In this volume the authors examine the U S auto industry and present a full scale analysis of the work and retirement decisions of its

workers They address organizational context and the logic of financial incentives in employer provided early retirement plans The impact of pension provisions layoffs plant closures attitudes about generational equity and other factors influencing the workers evaluation of the optimum time to end their careers in the auto industry are explored *The Auto Era* ,1915

China's Rise in the Age of Globalization Jianyong Yue,2018-01-12 This book deconstructs a series of myths surrounding China s economic rise The first myth is that globalization led directly to China s rise the second is that China is another East Asian developmental state the third that China s market reform had been implemented in an incremental way and fourth that China s resilient authoritarianism has been effective in ensuring the country s economic and political transformation Yue argues that the China model is one of crony comprador capitalism that has hindered the country s attempts at economic and political modernity It is argued that the United States strategy of integrating China into the international system is self defeating in the long run not because such an approach has created a restless empire capable of challenging US primacy but because the Chinese miracle has subsequently backfired on the liberal order created after World War Two Covering the entire reform period from the end of the Cultural Revolution in 1976 to the present day the author calls for readers to rethink globalization and leave more policy space for China and the developing nations to pursue national development through internal integration which is more conducive to democratic transition and global peace *Banking in the Age of the Platform Economy* Giorgio Bou-Daher,2023-05-22 The 2008 global financial crisis and the concurrent rise of the platform economy have had profound effects on the banking sector Over the past decade and a half banking leaders have had to contend with rapidly evolving regulatory technological and competitive forces The pace of technological change has been formidable with advances in artificial intelligence cloud computing and blockchain technology These forces have brought to the forefront new managerial imperatives that banking leaders have to make sense of as they strategise in light of these unfolding new realities *Banking in the Age of the Platform Economy* explores the strategies that managers and leaders at banks and other financial institutions have adopted in response to the rise of the platform economy the new forces of interdependence that it entails and the risks opportunities involved in cocreating value with external stakeholders With its discussion of the strategies of interdependence and value cocreation that the top twenty banks in Europe adopted between 2008 and 2019 this book is essential reading for academics banking and fintech professionals and management consultants that advise banks and fintechs *A Cultural History of Tragedy in the Age of Enlightenment* Mitchell Greenberg,2021-05-20 The period covered by this volume in the Cultural History of Tragedy set is bookended by two shockingly similar historical events the beheading of a king Charles I of England in 1649 and Louis XIV of France in 1793 The period between these two dates saw enormous political social and economic changes that altered European society s cultural life Tragedy which had dominated the European stage at the beginning of this period gradually saw itself replaced by new literary forms culminating in the gradual decline of theatrical tragedy from the heights it had reached in the 1660s The dominance of France s military

and cultural prestige during this period is reflected in the important almost exclusive space dedicated in this volume to the French stage This book covers the tragedies of France s two greatest playwrights Pierre Corneille 1606 84 and Jean Racine 1639 99 which would dominate not only the French stage but through translations and adaptations became the model of tragic theater across Europe finding imitators in England Dryden Italy Alfieri and as far afield as Russia This dominance continued well into the 18th century with the triumph of Voltaire s tragedies This volume also examines how the writings of Diderot and Lessing changed the direction of theatre and how after the Revolution in the writings of Goethe Shiller Hegel tragedy and the tragic were reimagined and became the sign of European modernity Each chapter takes a different theme as its focus forms and media sites of performance and circulation communities of production and consumption philosophy and social theory religion ritual and myth politics of city and nation society and family and gender and sexuality
