The Essentials Of The Yoruba Language:

The Essentials of the Yoruba Language P. O. Ogunbòwale, 1980 *Essentials of Yoruba Grammar* Oladele Awobuluyi, 1978 In important respects this book represents an independent approach to Yoruba grammar It attempts to present the Yoruba language as it really is rather than as seen largely from the perspective of other languages The grammatical structure of the language is thus presented in a new way The major parts of speech of the language are for the first time established uniformly on the criteria of function alone A chapter is devoted to a systematic and novel treatment of each such part of speech related both to the wide array of sentence types and to its sounds and the way they are combined in words *The Anagó Language of Cuba* Maria Oggun Gbemi, 2012-11-13 An examination of the Anag language of Cuba Based on over 25 years of field research in Cuba Venezuela and the United States The Anag language is used in Lucum religious ceremonies and celebrations in Cuba and throughout the diaspora Includes a historical and linguistic overview along with examples of Anag from academic folkloric and religious context **'Your Secret Language'** Barbara Goff, 2013-05-09 An investigation into the teaching of classics in the colonial education of West Africa in the late nineteenth and twentieth centuries *Africa and Its Diaspora Languages, Literature, and Culture* Oluseye Adesola, Akintunde Oyetade, Laide Sheba, 2019-11-26 The text celebrates the academic achievements of Professor Olasope Oyelaran It brings together over 20 papers by an international group of scholars on African diaspora languages literatures and culture representing four generations all of whom have been influenced by Oyelaran's work in one way or another Edited by three African scholars in the USA UK and Nigeria the volume presents current research on topics in applied and socio linguistics phonology morphology syntax oral and written literature and Yoruba language and culture in African diasporas in Brazil Cuba and Trinidad The constellation of topics presented here will enlarge the reader's understanding of a number of issues in the field of African and African diaspora languages literatures and cultures today As such the book makes an important contribution to the expanding work on the linguistic and cultural interface of Africa and its Brazilian Cuban and Trinidadian diasporas **The Numeral Systems of Nigerian Languages** Ozo-mekuri Ndimele, S.L. Chan, 2016-04-30 The papers in this collection present the numeral systems of more than twenty Nigerian languages The papers mainly emanate from a workshop on the numeral systems of Nigerian languages organised by the Linguistic Association of Nigeria during its 23rd Annual Conference which was held at the University of Port Harcourt Nigeria The workshop arose from awareness created by Dr Eugene S L Chan on the need for Nigerian linguists to document this severely endangered but very important aspect of natural languages The quantum of mathematical computations addition multiplication subtraction or a combination of two or all of these involved in the numeral systems of Nigerian languages is remarkable The papers reveal that a variety of numeral systems do exist such as binary decimal incomplete decimal duodecimal quinary quaternary ternary mixed body part tally systems and much more The book is a resource about how different languages manipulate their numeral systems

Pidgins and Creoles: Volume 1, Theory and Structure John A. Holm, 1988-05-05 This first volume of Holm's major survey of pidgins and creoles provides an up to date and readable introduction to a field of study that has become established only in the past few decades. Written for both students and general readers with a basic knowledge of linguistics, the book's original perspective will also attract specialists in the field seeking a broad overview of the linguistic relationships among these languages. Creolized or restructured versions of English, French, Spanish, Dutch, Portuguese and other languages arose during European colonial expansion. These resulted in such creoles as Jamaican, Haitian, Papiamentu and some one hundred others as well as such semi-creoles as Afrikaans, non-standard Brazilian Portuguese, Papiamentu and American Black English. Scholars have tended to work on particular language varieties in relative isolation, making comparative research into the genesis, development and structure of creoles difficult. In writing this book, Holm draws on broad studies of many languages to make clear how far-reaching creoles similarities are and to challenge current linguistic theories on creoles and pidgins. The emphasis of this volume is largely empirical rather than descriptive. Its core is a comparative study of creoles based on European languages in Africa and the Caribbean that demonstrates the striking similarities among the languages in terms of their lexical semantics, phonology and syntax. A forthcoming volume provides a socio-historic overview of variety development and text examples with translations of the restructured languages.

The World Atlas of Language Structures Martin Haspelmath, Matthew S. Dryer, David Gil, Bernard Comrie, 2005-07-21 The World Atlas of Language Structures is a book and CD combination displaying the structural properties of the world's languages. 142 world maps and numerous regional maps all in colour display the geographical distribution of features of pronunciation and grammar such as number of vowels, tone systems, gender, plurals, tense, word order and body part terminology. Each world map shows an average of 400 languages and is accompanied by a fully referenced description of the structural feature in question. The CD provides an interactive electronic version of the database which allows the reader to zoom in on or customize the maps to display bibliographical sources and to establish correlations between features. The book and the CD together provide an indispensable source of information for linguists and others seeking to understand human languages. The Atlas will be especially valuable for linguistic typologists, grammatical theorists, historical and comparative linguists and for those studying a region such as Africa, Southeast Asia, North America, Australia and Europe. It will also interest anthropologists and geographers. More than fifty authors from many different countries have collaborated to produce a work that sets new standards in comparative linguistics. No institution involved in language research can afford to be without it.

Creole Genesis, Attitudes and Discourse John R. Rickford, Suzanne Romaine, 1999-12-15 This collection in honor of creolist Charlene Junko Sato 1951-1996 brings together contributions by leading specialists in pidgin/creole studies in three primary areas: Pidgin/Creole Genesis and Development, Attitudes and Education, and Creole Discourse.

and Literature The varieties covered come from English French and Spanish lexical bases and from places as far apart as Africa Australia Hawaii and the Caribbean Editors Rickford and Romaine introduce each of the papers and provide a biography and bibliography of Sato A short story and poems in Hawaiian Creole Sato's native language and the variety which was the focus of her research and writing round out the collection *Acquisition Reversal* Olanike Ola Orie, 2012-10-01 This is the first comprehensive account of prolonged hearing loss and its impact on a language that was once spoken fluently Although it is currently assumed that hearing loss results in speech deterioration it is shown that language loss occurs when speakers remain deaf for a long time The reader is introduced to a significant deaf population postlingually deafened Yoruba speakers who have been deaf for more than twenty years and who have no access to hearing aids or speech therapy After becoming deaf they continue to speak Yoruba from memory and hear visually through lip reading These speakers exhibit phonological lexical and syntactic losses which mirror acquisition patterns attested in the speech of Yoruba children Based on these similarities it is argued that a direct link exists between language loss and first language acquisition It is further argued that prolonged deafness results in language reversal Finally the book presents the first description of the sign language and gestures used by deafened speakers to augment their spoken language These findings will be of value to linguists speech language and hearing therapists anthropologists Africanists deaf studies researchers and non specialists who are interested in hearing health and wellness **A Resource Handbook for African Languages**, 1986 *The World's Major Languages* Bernard Comrie, 2018-04-17 The World's Major Languages features over 50 of the world's languages and language families This revised edition includes updated bibliographies for each chapter and up to date census figures The featured languages have been chosen based on the number of speakers their role as official languages and their cultural and historical importance Each language is looked at in depth and the chapters provide information on both grammatical features and on salient features of the language's history and cultural role The World's Major Languages is an accessible and essential reference work for linguists **Data-Rich Linguistics** Oluseye Adesola, Akinbiyi Akinlabi, Olanike Ola Orie, 2018-10-09 This collection was compiled by an international group of scholars in recognition of Professor Yiwola Awoyale's contributions to African language and linguistic studies Based at University of Pennsylvania Professor Awoyale is particularly celebrated as a great field linguist who pays special attention to data and data documentation This edited volume presents current research on topics concerning the syntax semantics phonology applied and socio linguistics of African languages providing a state of the art account of contemporary issues in African linguistics today Historical Change in Serial Verb Constructions Carol Lord, 1993-01-01 This work examines both historical and comparative evidence in documenting the sweep of diachronic change in the context of serial verb constructions Using a wide range of data from languages of West Africa Asia and the Caribbean it demonstrates how shifts in meaning and usage result in syntactic morphological and lexical change The process by which verbs lose lexical semantic content and develop case marking

functions is described it is argued that the change is directional from verb to preposition or postposition to affix along a grammaticalization continuum This same grammaticalization process is shown to result in the development of complementizers adverbial subordinators conjunctions adverbs and auxiliaries from verbs Strong parallels across languages are found in the meanings of the verbs that become defective and in the functions they come to mark The changes are documented in detail with examples from a number of languages illustrating the effect of the changes on typology and word order implications for the encoding of definiteness and aspect and the relevance of notions such as discourse topic foreground and transitivity With respect to theoretical assumptions and terminology the author has taken a relatively nonpartisan approach and the discussion is accessible to students of language as well as of interest to theoreticians
