Itzkowitz Shifrinson, 2018-09-15 As a rising great power flexes its muscles on the political military scene it must examine how to manage its relationships with states suffering from decline and it has to do so in a careful and strategic manner In Rising Titans Falling Giants Joshua R Itzkowitz Shifrinson focuses on the policies that rising states adopt toward their declining competitors in response to declining states policies and what that means for the relationship between the two Rising Titans Falling Giants integrates disparate approaches to realism into a single theoretical framework provides new insight into the sources of cooperation and competition in international relations and offers a new empirical treatment of great power politics at the start and end of the Cold War Shifrinson challenges the existing historical interpretations of diplomatic history particularly in terms of the United States China relationship Whereas many analysts argue that these two nations are on a collision course Shifrinson declares instead that rising states often avoid antagonizing those in decline and highlights episodes that suggest the US China relationship may prove to be far less conflict prone than we might expect Occupied

Economies Hein A.M. Klemann, Sergei Kudryashov, 2013-05-09 What were the consequences of the German occupation for the economy of occupied Europe After Germany conquered major parts of the European continent it was faced with a choice between plundering the suppressed countries and using their economies to supply its needs. The choices made not only differed from country to country but also changed over the course of the war Individual leaders the economic needs of the Reich the military situation struggles between governors of occupied countries and Berlin officials and finally racism all had an impact on the outcome In some countries the emphasis was placed on production for German warfare which kept these economies functioning New research presented for the first time in this book shows that as a consequence the economic setback in these areas was limited and therefore post war recovery was relatively easy However in other countries plundering was more characteristic resulting in partisan activity a collapse of normal society and a dramatic destruction not only of the economy but in some countries of a substantial proportion of the labour force In these countries post war recovery was almost impossible The Prehistoric Maritime Frontier of Southeast China Chunming Wu,2021-10-05 This open access book presents multidisciplinary research on the cultural history ethnic connectivity and oceanic transportation of the ancient Indigenous Bai Yue in the prehistoric maritime region of southeast China and southeast Asia In this maritime Frontier of China historical documents demonstrate the development of the barbarian Bai Yue and Island Yi and their cultural interaction with the northern Huaxia in early Chinese civilization within the geopolitical order of the Central State Four Peripheries Barbarians Four Seas Archaeological typologies of the prehistoric remains reveal a unique cultural tradition dominantly originating from the local Paleolithic age and continuing to early Neolithization across this border region Further analysis of material culture from the Neolithic to the Early Iron Age proves the stability and resilience of the indigenous cultures even with the migratory expansion of Huaxia and Han from north to south Ethnographical investigations of aboriginal heritage highlight their native cultural context seafaring technology and navigation techniques and their interaction with Austronesian and other foreign maritime ethnicities In a word this manuscript presents a new perspective on the unique cultural landscape of indigenous ethnicities in southeast China with thousands of years stable tradition a remarkable maritime orientation and overseas cultural hybridization in the coastal region of southeast China Publishers' Circular and Booksellers' Record of British and Foreign Literature ,1900 Event-Based Control and Signal Processing Marek Miskowicz, 2018-09-03 Event based systems are a class of reactive systems deployed in a wide spectrum of engineering disciplines including control communication signal processing and electronic instrumentation Activities in event based systems are triggered in response to events usually representing a significant change of the state of controlled or monitored physical variables Event based systems adopt a model of calls for resources only if it is necessary and therefore they are characterized by efficient utilization of communication bandwidth computation capability and energy budget Currently the economical use of constrained technical resources is a critical issue in various application domains

because many systems become increasingly networked wireless and spatially distributed Event Based Control and Signal Processing examines the event based paradigm in control communication and signal processing with a focus on implementation in networked sensor and control systems Featuring 23 chapters contributed by more than 60 leading researchers from around the world this book covers Methods of analysis and design of event based control and signal processing Event driven control and optimization of hybrid systems Decentralized event triggered control Periodic event triggered control Model based event triggered control and event triggered generalized predictive control Event based intermittent control in man and machine Event based PID controllers Event based state estimation Self triggered and team triggered control Event triggered and time triggered real time architectures for embedded systems Event based continuous time signal acquisition and DSP Statistical event based signal processing in distributed detection and estimation Asynchronous spike event coding technique with address event representation Event based processing of non stationary signals Event based digital FIR and IIR filters Event based local bandwidth estimation and signal reconstruction Event Based Control and Signal Processing is the first extensive study on both event based control and event based signal processing presenting scientific contributions at the cutting edge of modern science and engineering AMSTAT News American Statistical Association, 1998 The Liberation Trilogy Box Set Rick Atkinson, 2013-10-22 The definitive chronicle of the Allied triumph in Europe during World War II Rick Atkinson's Liberation Trilogy is now together in one ebook bundle From the War in North Africa to the Invasion of Normandy the Liberation Trilogy recounts the hard fought battles that led to Allied victory in World War II Pulitzer Prize winning and New York Times bestselling author Rick Atkinson brings great drama and exquisite detail to the retelling of these battles and gives life to a cast of characters from the Allied leaders to rifleman in combat His accomplishment is monumental the Liberation Trilogy is the most vividly told brilliantly researched World War II narrative to date WINNER OF THE PULITZER PRIZE AND NEW YORK TIMES BESTSELLER The Rise of International Parliaments Frank Schimmelfennig, Thomas Winzen, Tobias Lenz, Jofre Rocabert, Loriana Crasnic, Cristina Gherasimov, Jana Lipps, Densua Mumford, 2020-12-14 International parliaments are on the rise An increasing number of international organizations establishes international parliamentary institutions or IPIs which bring together members of national parliaments or in rare cases elected representatives of member state citizens Yet IPIs have generally remained powerless institutions with at best a consultative role in the decision making process of international organizations Why do the member states of international organizations create IPIs but do not vest them with relevant institutional powers This study argues that neither the functional benefits of delegation nor the internalization of democratic norms answer this question convincingly Rather IPIs are best understood as an instrument of strategic legitimation By establishing institutions that mimic national parliaments governments seek to ensure that audiences at home and in the wider international environment recognize their international organizations as democratically legitimate At the same time they seek to avoid being effectively

constrained by IPIs in international governance The Rise of International Parliaments provides a systematic study of the establishment and empowerment of IPIs based on a novel dataset In a statistical analysis covering the world's most relevant international organizations and a series of case studies from all major world regions we find two varieties of international parliamentarization International organizations with general purpose and high authority create and empower IPIs to legitimate their region building projects domestically Alternatively the establishment of IPIs is induced by the international diffusion of democratic norms and prominent templates above all that of the European Parliament Transformations in Governance is a major academic book series from Oxford University Press It is designed to accommodate the impressive growth of research in comparative politics international relations public policy federalism and environmental and urban studies concerned with the dispersion of authority from central states to supranational institutions subnational governments and public private networks It brings together work that advances our understanding of the organization causes and consequences of multilevel and complex governance The series is selective containing annually a small number of books of exceptionally high quality by leading and emerging scholars The series is edited by Liesbet Hooghe and Gary Marks of the University of North Carolina Chapel Hill and Walter Mattli of the University of Oxford
