Botswana's last founding father Sir Ketumile Masire in June 2017 marked the end of an era. Since the release of the Fourth Edition of Historical Dictionary of Botswana in 2008 Botswana has gone through its most turbulent and divided decade to date. Throughout September 2016 when Botswana celebrated its 50th anniversary of independence all the successes of the Seretse and Masire era were sources of massive national pride. Botswana had expanded provisions of electricity, water, education and health services to almost all of its people and become a model nation that owned its natural resources and plowed the profits back into the nation's development. Despite these successes Botswana has a high unemployment rate about 20 percent and a much larger cohort of the underemployed. This fifth edition of Historical Dictionary of Botswana contains a chronology, an introduction, appendixes, an extensive bibliography and more than 700 cross-referenced entries on important personalities and aspects of the country's politics, economy, foreign relations, religion and culture. This book is an excellent resource for students, researchers and anyone wanting to know more about Botswana.

*Security and Democracy in Southern Africa* Gavin Cawthra, André Du Pisani, Abillah H. Omari, 2007. A study of the ambiguity of democratization and how it can generate violence. Southern Africa has embarked on one of the world's most ambitious security co-operation initiatives seeking to roll out the principles of the United Nations at regional levels. This book examines the triangular relationship between democratization, the character of democracy and its deficits and national security practices and perceptions of eleven southern African states. Based on national studies conducted by African academics and security practitioners over three years, it includes an examination of the way security is conceived and managed as well as a comparative analysis of regional security co-operation in the developing world. The study concludes that democratization is ambiguous and uncertain and can in some cases generate violent conflict. Building a common security regime in southern Africa will require moving beyond regime solidarity. In particular, progress will mean building multinational institutions, entrenching democratic practices, drawing on civil society and integrating the southern African project with that of the African Union. The authors conclude with a set of policy recommendations that aim to strengthen both states and civil society within the framework of an emerging common security system.

**Sustainable Livelihoods in Kalahari Environments** Deborah Sporton, David S. G. Thomas, 2002. This edited collection provides a comprehensive overview of the dynamics of contemporary natural resource based livelihoods and implications for their sustainability in the context of the Kalahari environment of southern Africa, a region subject to marked spatial and temporal natural variability. Each chapter is written by an active Kalahari researcher and addresses from an environmental or a social perspective the implications of different policies for rural livelihoods and coping strategies. In each chapter, one or more of the key tenets of environment policy and structural land use change provides the central element around which the sustainable livelihoods theme is considered. Although the focus of the book is the Kalahari, introductory and concluding chapters in turn contextualise the research and discuss key environment development issues which resonate across the individual chapters with

relevance for wider global debates      *Africa's Development Impasse* Doctor Stefan Andreasson, 2013-07-04 Orthodox strategies for socio economic development have failed spectacularly in Southern Africa Neither the developmental state nor neoliberal reform seems able to provide a solution to Africa s problems In *Africa s Development Impasse* Stefan Andreasson analyses this failure and explores the potential for post development alternatives Examining the post independence trajectories of Botswana Zimbabwe and South Africa the book shows three different examples of this failure to overcome a debilitating colonial legacy Andreasson then argues that it is now time to resuscitate post development theory s challenge to conventional development In doing this he claims we face the enormous challenge of translating post development into actual politics for a socially and politically sustainable future and using it as a dialogue about what the aims and aspirations of post colonial societies might become This important fusion of theory with empirical case studies will be essential reading for students of development politics and Africa      *The Kalahari Environment* David Thomas, Paul A. Shaw, 1991-02-21 This book provides an integrated thorough and up to date review of the nature and development of the Kalahari environment an environment of great ecological and geomorphological diversity Its complex climatic and geological history and its long association with human societies attempting to utilise its natural resources are aspects of increasing scientific interest The book has evolved from the authors own research in the Kalahari and attempts to provide explanations and answers to some of the many questions raised about this region ranging from the commonly asked is it really a desert to more specific and detailed concerns The interdisciplinary approach will make the book of interest to researchers lecturers and advanced students in earth sciences environmental studies tropical geomorphology and Quaternary science The extensive bibliography will also make the book a very important source of reference      **Handbook on Tourism and Conservation** Joseph E. Mbaiwa, Oluwatoyin D. Kolawole, Wame L. Hambira, Emmanuel Mogende, 2023-11-03 The Handbook on Tourism and Conservation demonstrates the intrinsic nexus between tourism the environment and sustainable natural resources use It applies Ostrom s social ecological systems SESs theory as the analytical framework for reaching a consensus on divergent viewpoints within the context of global environmental change and emerging governance issues      *State*, 1987      **The Structural Prevention of Mass Atrocities** Stephen McLoughlin, 2014-07-17 This book offers a different approach to the structural prevention of mass atrocities It investigates the conditions that enable vulnerable countries to prevent the perpetration of such violence Structural prevention is commonly framed as the identifying and ameliorating of the root causes of violent conflict a process which typically involves international actors determining what these root causes are and what the best courses of action are to deal with them This overlooks why mass atrocities do not occur in countries that contain the presence of root causes In fact very little research has been conducted on what the causes of peace and stability are particularly in relatively countries located in regions marred by civil war and mass atrocities To better understand how such vulnerable countries prevent the commission of mass atrocities this book proposes an analytical framework which

enables not only an understanding of risk which arises from the presence of root causes but also of the factors that build resilience in countries and consequently mitigate and manage such risk Using this framework three countries Botswana Zambia and Tanzania are analysed to account for their long term stability despite their location in neighbourhoods characterised by decades of civil war ethnic repression and mass atrocities This work is a significant contribution to the field of genocide studies and crimes against humanity and will be of interest to students and scholars alike *Africa South of the Sahara 2003* Europa Publications,2002-10-31 A one volume library of essential and comprehensive data on all the countries of sub Saharan Africa including essays on regional issues statistical surveys and directories of invaluable contact names and addresses **Democratic Accountability and International Human Development** Kamran Ali Afzal,Mark

Considine,2014-11-27 Scholars and policymakers have long known that there is a strong link between human development and spending on key areas such as education and health However many states still neglect these considerations in favour of competing priorities such as expanding their armies This book examines how states arrive at these decisions analysing how democratic accountability influences public spending and impacts on human development The book shows how the broader paradigm of democratic accountability extending beyond political democracy to also include bureaucratic and judicial institutions as well as taxation and other modes of resource mobilisation can best explain how states allocate public resources for human development Combining cross country regression analysis with exemplary case studies from Pakistan India Botswana and Argentina the book demonstrates that enhancing human capabilities requires not only effective party competition and fair elections but also a particular nesting of public organisational structures that are tied to taxpaying citizens in an undisturbed chain of accountability It draws out vital lessons for institutional design and our approach to the question of human development particularly in the less developed states This book will be of great interest to postgraduate students and researchers in the fields of political economy public policy governance and development It also provides valuable insights for those working in the international relations field including inside major aid and investment organisations **Elections In Independent Africa** Fred M. Hayward,2019-08-27 The electoral process has been an

integral part of the political landscape of independent Africa for more than a quarter century and has roots going back to traditional African societies An examination of the independence period demonstrates the rich diversity of forms experiences and meanings of elections in Africa For some observers elections are a clear example of multiple failures in Africa the failure of democracy and institutional transfer and the breakdown of much of the African political process in general The authors of this book argue that elections in Africa have played a much more significant role than has commonly been recognized that in spite of problems elections are an important part of African contemporary political life It has been too easy to dismiss elections in Africa as irrelevant because there are fewer today than there were two decades ago or because they have frequently failed to conform to democratic norms However in a period in which the primary trends of government are toward

exclusion African elections provide one of the few instruments of political action open to civil society This study of the electoral process suggests a number of themes and conclusions about the relationship of the electoral process to state power and institutions elite competition mass participation legitimacy and its limits ethnic conflict mobilization party competition authoritarian regimes the growing incidence of electoral violence and mass support for democratic values Fred M Hayward's substantive introduction discusses the electoral process in general Eight case studies of key African countries then illustrate the varied meanings and implications of elections in independent Africa and in the final chapter Hayward draws conclusions about the role and impact of elections It is clear that although electoral processes have demonstrated a certain fragility both the form and the process have shown remarkable resilience
