Jeary,1998-01-01 This book addresses the dynamic behaviour of a variety of structures under loading actions such as wind storms and earthquakes The book can be used to help with the prediction of the dynamic response of structures indicated by a unified systems approach and compares this method with the results of full scale studies of the in service performance of real structures A worldwide selection of examples of the response of tall buildings chimneys bridges dams offshore structures and floors is given illustrated by many photographs and diagrams The position of codes of practice and their relation to a full design study is also discussed Examples of the assessment of extreme value data the calculation of response the results of forced vibration tests and examples of the use of the Laplace Transform for the calculation of response are provided in appendices Return to the Far Side of Planet Moore! Martin Mobberley,2015-03-20 The result of an exhaustive study of Sir Patrick Moore s observations of the Moon and planets for more than 60 years this book is a fantastic companion to the extremely popular It Came From Outer Space Wearing an RAF Blazer written by the same author Moore recorded his telescopic observations in his logbooks which are reproduced and described here in detail along with his sketches and notes In this light the author discusses the factors that caused Moore to switch from lunar observing to planetary and variable star observing He has also included personal recollections and humorous anecdotes from Moore s friends and acquaintances as well as a look at his best loved books Further chapters describe Moore s foreign travels and correspondence with those back home Lastly the author has not neglected a few of Moore s most memorable television and radio appearances which are examined along with a close up of what it was like to visit Moore s beloved home of Farthings in Selsey Essentially this is a book written by popular demand from the readers of the author s original biography who craved more of Moore The Future of the Ancient World Jeremy Naydler,2009-07-24 The sacred consciousness that prevailed in antiquity is the key to unlocking our future Shows how scientific consciousness which gives primacy to the sense of sight estranged us from the participatory spiritual consciousness of antiquity Explores the vital importance of the imagination in reconnecting us to the spirit world The Future of the Ancient World sheds new light on the evolution of consciousness from antiquity to modern times The twelve essays in this book examine developments in human consciousness over the past five thousand years that most history books do not touch In ancient times human beings were finely attuned to the invisible world of the gods spirits and ancestors Today by contrast our modern scientific consciousness regards what is physically imperceptible as unreal Our experience of the natural world has shifted from an awareness of the divine presence animating all things to the mere scientific analyses of physical attributes a deadened mode of awareness that relies on our ability to believe only in what we can see In these richly illustrated and wide ranging essays that span the cultures of ancient Egypt Mesopotamia Greece Rome and the early Christian period Jeremy Naydler shows how

the consciousness that prevailed in ancient times may inspire us toward a future in which we once again reconnect with invisible realms If the history of consciousness bears witness to the loss of visionary and participatory awareness it also shows a new possibility the possibility of developing a free and objective relationship to the spirit world Naydler urges us not only to draw inspiration from the wisdom of the ancients but to carry this wisdom forward into the future in a renewed relationship to the spiritual that is based on human freedom and responsibility
