

The background of the image is a vibrant, abstract space scene. It features a large, dark, multi-faceted object on the right side, which appears to be a space station or a large ship, with a bright purple and pink energy burst emanating from its top. In the lower-left quadrant, there is a smaller, yellow and blue spacecraft. The entire scene is filled with numerous green, rocky asteroids of various sizes, some of which are floating in the foreground. The overall color palette is dominated by greens, purples, and blues, creating a sense of a vast, alien universe.

utterly engaging narrative Melanie Mitchell shows why Silicon Valley's heartless baseless and foolish obsessions with escaping death building AI tyrants and creating limitless growth are about oligarchic power not preparing for the future Tech billionaires have decided that they should determine our futures for us According to Elon Musk Jeff Bezos Sam Altman and more the only good future for humanity is one powered by technology trillions of humans living in space functionally immortal served by superintelligent AIs In More Everything Forever science journalist Adam Becker investigates these wildly implausible and often profoundly immoral visions of tomorrow and shows why in reality there is no good evidence that they will or should come to pass Nevertheless these obsessions fuel fears that overwhelm reason for example that a rogue AI will exterminate humanity at the expense of essential work on solving crucial problems like climate change What's more these futuristic visions cloak a hunger for power under dreams of space colonies and digital immortality The giants of Silicon Valley claim that their ideas are based on science but the reality is darker they come from a jumbled mix of shallow futurism and racist pseudoscience More Everything Forever exposes the powerful and sinister ideas that dominate Silicon Valley challenging us to see how foolish and dangerous these visions of the future are

and cryonics open up to transcend our human limitations while also warning their readers of their most nefarious consequences Ultimately the book puts forward the claim that even if the writers approach the subject from a variety of perspectives and using different narrative styles and techniques they all share a critical posthumanist fear that an unrestrained and unquestioned use of technology for enhancement purposes may bring about disembodiment and dehumanization

placing him within the history of science fiction and examining how his early works reacted against contemporaneous trends in the genre These early works also exhibit the development of his unique aesthetic that would influence science fiction and literature more generally Next a lengthy chapter explicates his groundbreaking Sprawl Trilogy which began with Neuromancer Miller then traces Gibson s aesthetic transformations across his two subsequent novel trilogies that increasingly eschew distant futures either to focus on our contemporary historical moment as a kind of science fiction itself or to imagine technological singularities that might lie just around the corner These chapters detail how Gibson s aesthetic has morphed along with social cultural and technological changes in the real world The study also looks at such standalone works as his collaborative steampunk novel his attempts at screenwriting his major essays and even his experimental hypertext poetry The study concludes with a discussion of Gibson s lasting influence and a brief examination of his most recent novel The Peripheral which signals yet another radical change in Gibson s aesthetic
