Realism versus Global Arms Control and Disarmament Carmen Chas,2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship **The Evolution of Biological Disarmament** Nicholas Roger Alan Sims,2001 The evolution of the disarmament regime of the 1972 Biological and Toxin Weapons Convention BTWC is described from 1980 when the first BTWC Review Conference was held until 1998 The author analyses the results of our first four review Conferences the meetings of the Ad Hoc Group of Governmental Experts to Identify and Examine Potential Verification Measures from a Scientific and Technical Standpoint the 1994 Special Conference the current negotiations of the Ad Hoc Group to produce an additional protocol the BTWC which may include verification measures handling of the 1997 Cuban allegation of US biological warfare and the implementation of Article X of the BTWC on international transfers and cooperation for peaceful purposes The strength of the BTWC regime is assessed in the light of its evolution through the review process and its changing contents including Russia s admission that it had inherited an offensive biological weapon programme The book applies an original sector by sector approach to its analysis of the BTWC studied in a long term perspective **Pacific Asia?** Melvin Gurtov,2002 Emphasizing human and environmental security over traditional power politics Mel Gurtov offers a provocative reinterpretation of security in the Asia Pacific region The author questions a number of prevailing assumptions such as the China threat a U S centered balance of power and the necessity of a greater Japanese security role He argues

instead for a cooperative framework for future security that focuses on people's basic needs is sensitive to Asian nationalism and gradually replaces military power with developmental priorities. With its concise appraisals of the security policies of the United States, China, Japan, the two Koreas, and the ASEAN countries, this work will be a valued reference for policymakers, scholars, and students alike.

China and the Arms Trade Anne Gilks, Gerald Segal, 2023-03-24. First Published in 1985. *China and the Arms Trade* offers a detailed analysis of Chinese arms aid policy to examine Beijing's changing nature of foreign and domestic policy. Military aid like war is a continuation of foreign policy by other means. The previous perception of China offering special and selfless military assistance seems no longer accurate. The nature of these Chinese aid now appears more complex and contradictory. China now like other great powers take an active role in the lucrative international arms bazaar. As one Chinese official said about his country's more hard-headed arms sales policy, we cannot sell at friendship prices all the time. This book is a must read for scholars and researchers of Chinese foreign policy, strategic studies, Chinese politics, international relations, and defence studies.

The Arms Race in Asia Andrew T.H. Tan, 2013-12-13. This book is the first systematic examination of the emerging arms race in Asia. The global trade in arms is to a large degree underpinned by the strong demand for arms in Asia and the Middle East, the two largest arms export markets in the world. Of these two regions, Asia has become particularly significant, led by the emergence of China and India as major powers. It is therefore not surprising that the rapid military modernisation in Asia, accompanied by significant increases in the size and sophistication of armed forces, has generated attention as to its trends, key characteristics, causes, and implications. This phenomenon, which has become evident since the end of the Cold War, has also been widely described as an Asian arms race. This book evaluates the key conceptual ideas which can shed light on this phenomenon, as well as examining the complex mix of internal, external, and technological factors that have led to its emergence. The volume explores the way in which the arms race is leading ultimately to three distinctive blocs in the emerging geostrategic landscape: a loose bloc of US allies in the region, a counter bloc of potential US adversaries, and a neutral bloc of states with industrial age armed forces whose allegiances will vary according to circumstances and geostrategic developments. *The Arms Race in Asia* concludes that if the emerging arms race is left unchecked, it is likely that Asia will increasingly become a region of instability marked by conflicts and interstate wars. The book will be of great interest to students of Asian politics, strategic studies, defence studies, security studies, and IR in general.

Encyclopedia of Violence, Peace, and Conflict, 1999-08-16. The *Encyclopedia of Violence, Peace, and Conflict*, a three-volume set written by more than 200 eminent contributors from around the world, takes advantage of increasing worldwide awareness in the public, private, commercial, and academic sectors about manifestations of violence in all segments of society. While the contributors do not use these volumes to make specific arguments, they do describe and clarify the developments in thought that have led to current theories about and positions on violence and peace. Our reviewers consistently note that while many in-depth studies of war, peace, and aggression exist, the attendant specialization keeps

scholars from learning about related fields No publication competing with the Encyclopedia of Violence Peace and Conflict can satisfy their need for a vast introductory work to such a diverse and socially important field This major work includes more than 190 multidisciplinary articles with over 1 000 cross references and more than 2 000 bibliography entries for further reading which are arranged alphabetically for easy access More than 190 multidisciplinary articles with over 1 000 cross references Article outline and glossary of key terms begin each article Entries arranged alphabetically for easy access Three volume set with subject index of over 750 entries Articles written by more than 200 eminent contributors from around the world

Military Expansion, Economic Decline R.W. DeGrasse, 2016-07-01 By assessing the costs and benefits of military spending the authors provide a second opinion on the subject of military economics While advocates of increased military spending often stress the positive effects of the Pentagon on the economy there has been little systematic summary of the opportunity costs that society pays for a large military establishment This book fills that gap

The Structure of the Defense Industry Nicole Ball, Milton Leitenberg, 2021-05-30 Proponents of arms control and disarmament are often confronted with the argument that reductions in defense expenditure lead to cutbacks in military industries and thus to economic hardship While a reduction in defense production would cause some economic dislocation this would be mitigated by the ability of the economy to adapt to changing patterns of production This book first published in 1983 assesses the likely effects of reductions in defense industries by an examination of the roles these industries play in national economies Each chapter discusses industry employment output research and development capital value profitability concentration and competition internal organization and regional employment concentration Other questions considered include the economic importance of weapons exports the defense industry as a leading edge in maintaining national technological capabilities and the reliance of individual firms on defense contracting

The International Arms Trade Rachel Stohl, Suzette Grillo, 2013-04-29 The multi billion dollar business of the international conventional arms trade involves virtually every country in the world Around the globe people's lives are being irrevocably changed by the effects of guns tanks and missiles These weapons have the potential to cause a deadly and current threat one responsible for hundreds of thousands of deaths a year This succinct and accessible new book explores the complexities and realities of the global conventional weapons trade The first book on the subject in nearly a decade The International Arms Trade provides an engaging introduction to the trade the effects and the consequences of these weapons The authors trace the history of the arms trade and examine how it has evolved since the end of the Cold War In particular they assess the role of the largest arms exporters and importers the business of selling conventional arms around the world and shed new light on the illicit arms trade and the shadowy dealers who profit from their deadly commerce The book also looks closely at the devastating effect the business can have on countries societies and individuals and concludes with an evaluation of the various existing control strategies and the potential for future control opportunities The International Arms Trade will be invaluable for students and scholars of

international relations and security studies and for policymakers and anyone interested in understanding more about the conventional arms trade The Global Arms Trade Andrew T. H. Tan, 2014-05-22 The Global Arms Trade is a timely comprehensive and in depth study of this topic a phenomenon which has continued to flourish despite the end of the Cold War and the preoccupation with global terrorism after 11 September 2001 It provides a clear description and analysis of the demand for and supply of modern weapons systems and assess key issues of concern This book will be especially useful to scholars policy analysts those in the arms industry defence professionals students of international relations and security studies media professionals government officials and those generally interested in the arms trade **Institutions and Small Settler Economies**

A. Schlueter, 2014-10-23 Are institutions the main cause of sustained economic growth Institutions and Small Settler Economies provides a comprehensive improvement in our understanding of institutional contributions to economic growth based on North Wallis and Weingast's NWW institutional theory In this exciting new volume Schlueter offers a substantial range of novel insights into the socio economic development trajectories of two deliberately selected New World economies New Zealand and Uruguay This study sets itself apart from other publications through its impartial analysis of the strengths and limitations of leading institutional scholarship as well as its rigorous comparative methodology involving a substantial set of quantitative and qualitative data **Nuclear Weapons and International Law** Charles J. Moxley, 2024-05-15 This book analyzes the facts and law as to nuclear weapons and the policy of deterrence It demonstrates that such weapons cannot lawfully be used and that the policy of deterrence is risky and unlawful It urges that the U S take the lead in delegitimizing these weapons and seeking abolition **Conversion of Military R&D** Joseph Rotblat, Judith Reppy, Vsevolod Avduyevsky, John Holdren, 2016-07-27 The book describes the scale benefits and costs of military research and development It discusses the process of converting military R D to civilian applications and examines specific opportunities for and obstacles to conversion in the USA Russia France Germany and the UK Among a number of case studies senior scientists from US and Russian nuclear weapons laboratories debate the futures for these massive complexes Looking to the future the dual military civilian nature of technology is discussed

Rethinking the Unthinkable Ivo H. Daalder, Terry Terriff, 2014-02-04 Rethinking the Unthinkable examines the future direction of nuclear arms control in the post Cold War security environment Believing that the new environment requires a radical rethinking of the purpose and role of nuclear weapons in international politics the contributors address many fundamental issues influencing further US Russian and European nuclear arms reductions This volume is a product of the Project on Rethinking Arms Control sponsored by the Center for International and Security Studies in Maryland Big Business and Dictatorships in Latin America Victoria Basualdo, Hartmut Berghoff, Marcelo Bucheli, 2020-12-04 This edited volume studies the relationship between big business and the Latin American dictatorial regimes during the Cold War The first section provides a general background about the contemporary history of business corporations and dictatorships in the

twentieth century at the international level The second section comprises chapters that analyze five national cases Argentina Brazil Chile Uruguay and Peru as well as a comparative analysis of the banking sector in the Southern Cone Argentina Brazil Chile and Uruguay The third section presents six case studies of large companies in Argentina Brazil Chile Colombia and Central America This book is crucial reading because it provides the first comprehensive analysis of a key yet understudied topic in Cold War history in Latin America
