The Acquisition Of Language

Jessica Narloch

The Acquisition Of Language:

The Acquisition of Language Helen Smith Cairns, 1996 *The Acquisition of Language* David McNeill, 1970 Here is a systematic integrated and concise treatment of developmental psycholinguistics The linguistic orientation is the theory of language developed by Chomsky and others no prior linguistic background is required to understand this book Emphasis is on the acquisition of syntax how the linguistic information described in a transformational generative grammar is acquired by children and on semantic and sound development Each chapter on syntax carries a consistent argument a step farther with innate factors given their proper place in the acquisition of language Comparative data principally English Japanese and Russian are used wherever possible to reveal basic similarities in the patterns of child language Publisher **First Language Acquisition** Eve V. Clark, 2016-03-17 Fully updated throughout this new edition provides a comprehensive exploration of how children acquire a first language effectively *Language Acquisition, second edition* Maria Teresa Guasti, 2017-02-10 The new edition of a comprehensive introduction to a rapidly developing field combining developmental data with theory How do children begin to use language How does knowledge of language emerge in early infancy and how does it grow This textbook offers a comprehensive introduction to knowledge acquisition drawing on empirical evidence and linguistic theory The theoretical framework used is the generative theory of Universal Grammar students should have some familiarity with concepts in linguistic research Aimed at upper level undergraduate and graduate students the book offers end of chapter summaries key words study questions and exercises This second edition has been thoroughly updated with new content throughout It has been reorganized according to the three main components of language acquisition The computational components and the interfaces are covered in chapters on structure building in the verbal and nominal domains movement derived structure and the relation between syntax and semantics and semantic and pragmatic The sensory motor interface is treated in chapters on infants perception of language and on the acquisition of words The intentional conceptual interface is discussed in chapters on the acquisition of words This edition features additional cross linguistic content a new focus on brain imaging findings and the motor aspect of language new material on Williams and Down Syndromes and dyslexia and a new chapter on bilingualism early second language acquisition and bimodalism Revisions reflect the burgeoning research in the field New pedagogical features include chapter outlines summaries of chapters hypotheses and linguistic milestones methodological information explanatory boxes and suggestions for further reading *Social Aspects of Language Acquisition* Jessica Narloch, 2012-03-02 Research Paper undergraduate from the year 2006 in the subject American Studies Linguistics grade 1 3 University of Duisburg Essen language English abstract There are many ways of talking to children and preverbal infants and also a great variety of opinions about how important the child s environment is or if it plays a role at all The question is not only how and why children understand grammatical forms and language Ochs Schieffelin 1995 73 but also which role other aspects such as Parentese and Baby Talk play Are they

necessary or totally unimportant Should parents talk to their children at all or is it senseless because they do not understand what the parents say to them Some people are of the opinion that Parentese only plays a minimal role Garnica 1977 63 whereas other people think that the verbal environment is important In how far is the acquisition of language the result of a process of interaction between mother and child Snow 1977 31 By explaining some aspects of talk to children such as Parentese Baby Talk expansion correction imitation and by giving examples of children being socialized through language the question about which role these aspects really play in first language acquisition should be answered *Language Acquisition by Eye* Charlene Chamberlain, Jill P. Morford, Rachel I. Mayberry, 2014 This volume explores the reading development of native speakers of sign language as well as their early pre literacy language development For deafness and sign language scholars as well as linguists and reading specialists

The Acquisition and Development of Language Paula Menyuk, 1971 *Experimental Methods in Language Acquisition Research* Elma Blom, Sharon Unsworth, 2010

Experimental Methods in Language Acquisition Research provides students and researchers interested in language acquisition with comprehensible and practical information on the most frequently used methods in language acquisition research It includes contributions on first and child adult second language learners language impaired children and on the acquisition of both spoken and signed language Part I discusses specific experimental methods explaining the rationale behind each one and providing an overview of potential participants the procedure and data analysis as well as advantages and disadvantages and dos and don ts Part II focuses on comparisons across groups addressing the theoretical applied and methodological issues involved in such comparative work This book will not only be of use to advanced undergraduate and postgraduate students but also to any scholars wishing to learn more about a particular research method It is suitable as a textbook in postgraduate programs in the fields of linguistics education and psychology

The Acquisition of Syntax in Romance Languages Vincent Torrens, Linda Escobar, 2006-01-01 This volume includes a selection of papers that address a wide range of acquisition phenomena from different Romance languages and all share a common theoretical approach based on the Principles and Parameters theory They favour discuss and sometimes challenge traditional explanations of first and second language acquisition in terms of maturation of general principles universal to all languages They all depart from the view that language acquisition can be explained in terms of learning language specific rules constraints or structures The different parts into which this volume is organized reflect different approaches that current research has offered which deal with issues of development of reflexive pronouns determiners clitics verbs auxiliaries Inflection wh movement rsumptive pronouns topic and focus mood the syntax discourse interface topic and focus and null arguments
