The Aids Plague:

Plague-Making and the AIDS Epidemic: A Story of Discrimination G. Bright, 2012-02-14 This book explores how the cultural process of making any disease a plague results in discrimination against certain groups as it has for those with AIDS in America Gina M Bright here captures the discrimination produced by plague making in her analysis and her portraits of the people she has cared for with AIDS over the past quarter century *Surviving the AIDS Plague* Taki N.

Anagnoston, 1991 *Patient Zero and the Making of the AIDS Epidemic* Richard A. McKay, 2017-11-22 Now an award winning documentary feature film The search for a patient zero popularly understood to be the first person infected in an epidemic has been key to media coverage of major infectious disease outbreaks for more than three decades Yet the term itself did not exist before the emergence of the HIV AIDS epidemic in the 1980s How did this idea so swiftly come to exert such a strong grip on the scientific media and popular consciousness In *Patient Zero* Richard A McKay interprets a wealth of archival sources and interviews to demonstrate how this seemingly new concept drew upon centuries old ideas and fears about contagion and social disorder McKay presents a carefully documented and sensitively written account of the life of Ga tan Dugas a gay man whose skin cancer diagnosis in 1980 took on very different meanings as the HIV AIDS epidemic developed and who received widespread posthumous infamy when he was incorrectly identified as patient zero of the North American outbreak McKay shows how investigators from the US Centers for Disease Control inadvertently created the term amid their early research into the emerging health crisis how an ambitious journalist dramatically amplified the idea in his determination to reframe national debates about AIDS and how many individuals grappled with the notion of patient zero adopting challenging and redirecting its powerful meanings as they tried to make sense of and respond to the first fifteen years of an unfolding epidemic With important insights for our interconnected age *Patient Zero* untangles the complex process by which individuals and groups create meaning and allocate blame when faced with new disease threats What McKay gives us here is myth smashing revisionist history at its best **Decade of the Plague** Margaret R

Rodway, Marianne Wright, 2014-06-03 Social workers counselors and health care professionals will be challenged by this thorough presentation of Sexually Transmitted Diseases STDs The contributing authors contend that in the immediate future education not medicine will be the single most important weapon in stemming the spread of STDs Thus the responsibility of educating society and providing service for people who are directly or indirectly affected by STDs lies with helping professions The devastating social medical and psychological aspects of AIDS herpes and other STDs are discussed Contributors focus on the issues involved with counseling individuals with STDs and their partners families and friends and make suggestions for the education and teaching of professionals and the general public about STDs *AIDS, Fear and Society* Kenneth J. Doka, 2014-05-01 Historically AIDS is just one of a series of dreaded diseases that have aroused both great fear and irrational actions The previous diseases including bubonic plague syphilis tuberculosis leprosy and cancer have

evoked such a sense of dread that rational moves to halt the disease have become compromised This text examines the deep sense of fear that AIDS evokes stigmatizing those who suffer from the disease as well as their families and caregivers Until AIDS can be seen for what it actually is a life threatening disease policies providing for humane treatment will not evolve The book also emphasizes that diseases are more than biological phenomena or individual catastrophes they are profoundly social events The ways in which diseases are spread and treated are strongly influenced by larger sociological considerations and they may have the capacity to change social institutions or society Itself Rooting Aids In The History Of Diseases The First Part Of The book reviews the nature history and responses of earlier dreaded diseases The next section examines AIDS itself proposed as the archetypal dreaded disease Already creating a sense of panic AIDS is also shown to be a social disease likely to have significant effects on the social order Thus only by containing the epidemic of fear and controlling the resulting irrationality can the AIDS epidemic be halted
