The Akha Guardians Of The Forest People And Cultures Of Southeast Asia:

The Akha Jim Goodman,1997 With their unusual boundary gates annual Swing Festival and exotic costumes the Akha are one of the most colorful mountain dwelling peoples in Southeast Asia Over the centuries they have developed a rich and complex culture that provides customs and behavioral rules for all of life s possible contingencies Originating in China s Yunnan Province the Akha spread into Vietnam Laos Burma and Thailand and in recent generations have been subjected to the vicissitudes of war revolution and modernization In spite of such pressure they have managed to maintain the basic values and tenets of a thousand year old tradition

Forest Guardians, Forest Destroyers Tim Forsyth,Andrew Walker,2011-07-01 In this far reaching examination of environmental problems and politics in northern Thailand Tim Forsyth and Andrew Walker analyze deforestation water supply soil erosion use of agrochemicals and biodiversity in order to challenge popularly held notions of environmental crisis They argue that such crises have been used to support political objectives of state expansion and control in the uplands They have also been used to justify the alternative directions advocated by an array of NGOs In official and alternative discourses of economic development the peoples living in Thailand s hill country are typically cast as either guardians or destroyers of forest resources often depending on their ethnicity Political and historical factors have created a simplistic misleading and often scientifically inaccurate environmental narrative Hmong farmers for example are thought to exhibit environmentally destructive practices whereas the Karen are seen as linked to and protective of their ancestral home Forsyth and Walker reveal a much more complex relationship of hill farmers to the land to other ethnic groups and to the state They conclude that current explanations fail to address the real causes of environmental problems and unnecessarily restrict the livelihoods of local people The authors critical assessment of simplistic environmental narratives as well as their suggestions for finding solutions will be valuable in international policy discussions about environmental issues in rapidly developing countries Moreover their redefinition of northern Thailand s environmental problems and their analysis of how political influences have reinforced inappropriate policies demonstrate new ways of analyzing how environmental science and knowledge are important arenas for political control This book makes valuable contributions to Thai studies and more generally to the fields of environmental science ecology geography anthropology and political science as well as to policy making and resource management in the developing world
