WHERE ARE THE ALIENS?

THE SEARCH FOR LIFE BEYOND EARTH

By Stacy McAnulty

With art by Nicole Miles

★ "McAnulty lays out breezy but substantial histories of the universe, astronomy, and space exploration, along with logical and mathematical arguments that have been proposed for the probability that we are not (or, conversely, might well be) alone." —*Booklist*, starred review

"McAnulty's informal, conversational style keeps the delivery of information entertaining and nicely paced. Terrific science for skeptics and hopeful sky watchers."

—*Kirkus Reviews*

SPOILER: SCIENTISTS HAVEN'T DISCOVERED LIFE BEYOND EARTH, not even a single teeny-tiny organism. But there's a whole lot of outer space, and humans have searched only a fraction of a fraction of it. So, do you believe in the possibility of life out there? Or do you think Earth is perfectly unique in its ability to grow organisms?

Where Are the Aliens? takes readers on a journey of theories and discoveries, from the big bang and primordial soup, to how the ancient Greeks considered the cosmos, to the technology used today to listen and (possibly!) communicate with far-off exoplanets. Packed with playful illustrations and fascinating factoids, this is the perfect book for anyone who has ever looked up and asked, "What's out there?"
