Christopher J. Fischer, 2010-03-01 The region of Alsace located between the hereditary enemies of France and Germany served as a trophy of war four times between 1870 1945 With each shift French and German officials sought to win the allegiance of the local populace In response to these pressures Alsatians invoked regionalism articulated as a political language a cultural vision and a community of identity not only to define and defend their own interests against the nationalist claims of France and Germany but also to push for social change defend religious rights and promote the status of the region within the larger national community Alsatian regionalism however was neither unitary nor unifying as Alsatians themselves were divided politically socially and culturally The author shows that the Janus faced character of Alsatian regionalism points to the ambiguous role of regional identity in both fostering and inhibiting loyalty to the nation Finally the author uses the case of Alsace to explore the traditional designations of French civic nationalism versus German ethnic nationalism and argues for the strong similarities between the two countries conceptions of nationhood **Alsatian Drawings of the XV. and XVI. views on how to introduce French institutions and systems into its lost borderland Throughout these discussions the border itself shaped the process of reintegration by generating contact and tensions between populations on the two sides of the boundary line and by shaping expectations of what it meant to be French and Alsatian Borderland is the first comprehensive account of the return of Alsace to France which treats the border as a driver of change It draws upon national regional and local archives to follow the difficult process of Alsace's reintegration into French society culture political and economic systems and legislative and administrative institutions It connects the microhistory of the region with the macro levels of national policy international relations and transnational networks and with the cross border flows of ideas goods people and cultural products that shaped daily life in Alsace as its population grappled with the meaning of return to France In revealing the multiple voices who contributed to the region's reintegration it underlines the ways in which regional populations and cross border interactions have forged modern nations
