Mendelssohn R. Larry Todd, 2003-10-23 An extraordinary prodigy of Mozartean abilities Felix Mendelssohn Bartholdy was a distinguished composer and conductor a legendary pianist and organist and an accomplished painter and classicist Lionized in his lifetime he is best remembered today for several staples of the concert hall and for such popular music as The Wedding March and Hark the Herald Angels Sing Now in the first major Mendelssohn biography to appear in decades R Larry Todd offers a remarkably fresh account of this musical giant based upon painstaking research in autograph manuscripts correspondence diaries and paintings Rejecting the view of the composer as a craftsman of felicitous but sentimental saccharine works termed by one critic moonlight with sugar water Todd reexamines the composer's entire oeuvre including many unpublished and little known works Here are engaging analyses of Mendelssohn's distinctive masterpieces the zestful Octet puckish Midsummer Night's Dream haunting Hebrides Overtures and elegiac Violin Concerto in E minor Todd describes how the composer excelled in understatement and nuance in subtle coloristic orchestrations that lent his scores an undeniable freshness and vividness He also explores Mendelssohn's changing awareness of his religious heritage Wagner's virulent anti-Semitic attack on Mendelssohn's music the composer's complex relationship with his sister Fanny Hensel herself a child prodigy and prolific composer his avocation as a painter and draughtsman and his remarkable polylingual correspondence with the cultural elite of his time Mendelssohn A Life offers a masterful blend of biography and musical analysis Readers will discover many new facets of the familiar but misunderstood composer and gain new perspectives on one of the most formidable musical geniuses of all time

Studies in Tectonic Culture Kenneth Frampton, 2001-08-24 Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German and English sources from the eighteenth century to the present Kenneth Frampton's long awaited follow up to his classic A Critical History of Modern Architecture is certain to influence any future debate on the evolution of modern architecture Studies in Tectonic Culture is nothing less than a rethinking of the entire modern architectural tradition The notion of tectonics as employed by Frampton the focus on architecture as a constructional craft constitutes a direct challenge to current mainstream thinking on the artistic limits of postmodernism and suggests a convincing alternative Indeed Frampton argues modern architecture is invariably as much about structure and construction as it is about space and abstract form Composed of ten essays and an epilogue that trace the history of contemporary form as an evolving poetic of structure and construction the book's analytical framework rests on Frampton's close readings of key French and German

and English sources from the eighteenth century to the present He clarifies the various turns that structural engineering and tectonic imagination have taken in the work of such architects as Perret Wright Kahn Scarpa and Mies and shows how both constructional form and material character were integral to an evolving architectural expression of their work Frampton also demonstrates that the way in which these elements are articulated from one work to the next provides a basis upon which to evaluate the works as a whole This is especially evident in his consideration of the work of Perret Mies and Kahn and the continuities in their thought and attitudes that linked them to the past Frampton considers the conscious cultivation of the tectonic tradition in architecture as an essential element in the future development of architectural form casting a critical new light on the entire issue of modernity and on the place of much work that has passed as avant garde A copublication of the Graham Foundation for Advanced Studies and The MIT Press **Hidden Texts, Hidden Nation** Kathryn N. Maciuika,2005-05-05 Publisher Description An Oxford Companion to the Romantic Age ,1999 *Architecture and Abstraction* Pier Vittorio Aureli,2023-11-07 A landmark study of abstraction in architectural history theory and practice that challenges our assumptions about the meaning of abstract forms In this theoretical study of abstraction in architecture the first of its kind Pier Vittorio Aureli argues for a reconsideration of abstraction its meanings and its sources Although architects have typically interpreted abstraction in formal terms the purposeful reduction of the complexities of design to its essentials Aureli shows that abstraction instead arises from the material conditions of building production In a lively study informed by Walter Benjamin Karl Marx Alfred Sohn Rethel and other social theorists this book presents abstraction in architecture not as an aesthetic tendency but as a movement that arises from modern divisions of labor and consequent social asymmetries These divisions were anticipated by the architecture of antiquity which established a distinction between manual and intellectual labor and placed the former in service to the latter Further abstractions arose as geometry used for measuring territories became the intermediary between land and money and eventually produced the logic of the grid In our own time architectural abstraction serves the logic of capitalism and embraces the premise that all things can be exchanged even experience itself is a commodity To resist this turn Aureli seeks a critique of architecture that begins not by scaling philosophical heights but by standing at the ground level of material practice **City, Climate, and Architecture** Sascha Roesler,2025-01-27 Second and revised edition The publication rethinks climate control a key concern of the discipline of architecture through the lens of city climate

phenomena over the course of the 20th century Based on a history of climate control on urban scales it promotes the integration of indoors and outdoors in order to reduce environmental and thermal loads in cities Just as heating and cooling practices inside the buildings are affecting the urban climate outdoors urban heat islands are influencing the energy requirements and thermal conditions inside the buildings While the first part of the book focuses on the interwar period in Europe the publication s second part considers examples from all over the globe tracing the growing significance of ecological thinking for the design of urban environments Main outcome of a six years research project on architecture and urban climate funded by the Swiss National Science Foundation New and revised edition KLIMA POLIS a series highlighting design driven approaches to urban climates across the globe *Wilhelmine Germany and Edwardian Britain* Dominik Geppert, Robert Gerwarth, 2008 This collection of essays sheds new light on Anglo German relations during the turbulent decades before the outbreak of the Great War Written by leading historians the book demonstrates that Anglo German relations before 1914 were characterized not only by rivalry and antagonism but also by a remarkable degree of mutual admiration and cultural cross fertilization
