The Enterprising Woman:

The Enterprising Woman Mari Florence, 2009-09-26 By the year 2000 one half of all businesses in America will be owned by women No matter how large or small the business this book is an essential tool for those women Organized by field each chapter contains advice from experts how to information on the day to day running of a business and inspirational profiles of such successful entrepreneurs as Judith Jamison Kate Cheney Chappel and Alice Waters Enterprising Women Virginia G. Drachman, 2002 An inspiring collection of American women entrepreneurs introduces readers to women who have carved out their own slice of the economic pie from Colonial times to present The Enterprising Woman Vocational Biographies, 1990

The Enterprising Woman Janice Allen Johnson, 1984 Taking Control of Your Life Gail Blanke, Kathleen Walas, 1990 Based on the authors professional experience with Avon s Women of Enterprise Awards which honors women who have overcome significant obstacles to achieve success in their own small businesses the book shares case histories of exceptional women who have demonstrated that determination courage and ingenuity can triumph over adversity **The Instinct in Business the Enterprising Woman Today** Lucia Dawson, 2019-07-02 A book made for those women that want to start in enterprising and don t know how **The Enterprising Woman** , Enterprising Women Mary Hallward-Driemeier, 2013-06-10 This book brings together new household and enterprise data from 41 countries in Sub Saharan Africa to inform policy makers and practitioners on ways to expand women entrepreneurs economic opportunities Sub Saharan Africa boasts the highest share of women entrepreneurs but they are disproportionately concentrated among the self employed rather than employers Relative to men women are pursuing lower opportunity activities with their enterprises more likely to be smaller informal and in low value added lines of business The challenge in expanding opportunities is not helping more women become entrepreneurs but enabling them to shift to higher return activities A central question addressed in the book is what explains the gender sorting in the types of enterprises that women and men run The analysis shows that many Sub Saharan countries present a challenging environment for women Four key areas of the agenda for expanding women s economic opportunities in Africa are analyzed strengthening women s property rights and their ability to control assets improving women s access to finance building human capital in business skills and networks and strengthening women s voices in business environment reform These areas are important both because they have wide gender gaps and because they help explain gender differences in entrepreneurial activities It is particularly striking that while gender gaps in education tend to close with higher incomes gaps in women s property rights and in women s participation in reform processes do not As simply raising a country s income is unlikely to be sufficient to give women equal ability to control assets or have greater voice more proactive steps will be needed Practical guidelines to move the agenda forward are discussed for each of these key areas **Enterprising Women in Transition Economies** David Smallbone, 2017-03-02 Entrepreneurship is a key element in the development of market based economies and one of the

potential drivers of change in countries that are in the process of transformation to market based systems This book describes and critically assesses the nature and extent of female entrepreneurship in European economies that until 1990 were operating under central planning At the core of the book are 7 country based chapters which provide an overview of the development of entrepreneurship and small firms since 1990 including a review of the institutional and policy context an assessment of the role of women within the society during the socialist period and any major changes afterwards Each chapter also includes a thematic section each one addressing a different issue based on unique empirical data drawn from original research
