## **The Ethical Function Of Architecture:**

**The Ethical Function of Architecture** Karsten Harries, 1998-07-31 Can architecture help us find our place and way in today's complex world? Can it return individuals to a whole, to a world, to a community? Developing Giedion's claim that contemporary architecture's main task is to interpret a way of life valid for our time, philosopher Karsten Harries answers that architecture should serve a common ethos. But if architecture is to meet that task, it first has to free itself from the dominant formalist approach and get beyond the notion that its purpose is to produce endless variations of the decorated shed. In a series of cogent and balanced arguments, Harries questions the premises on which architects and theorists have long relied, premises which have contributed to architecture's current identity crisis and marginalization. He first criticizes the aesthetic approach focusing on the problems of decoration and ornament. He then turns to the language of architecture. If the main task of architecture is indeed interpretation, in just what sense can it be said to speak, and what should it be speaking about? Expanding upon suggestions made by Martin Heidegger, Harries also considers the relationship of building to the idea and meaning of dwelling. Architecture, Harries observes, has a responsibility to community, but its ethical function is inevitably also political. He concludes by examining these seemingly paradoxical functions.

Kahn and the Ethical Function of Architecture** Jeffrey Kiat Ho, 1997 *Architecture and Civilization*, 2022-05-20 **Heidegger in America** Martin Woessner, 2010-12-20 Heidegger in America explores the surprising legacy of his life and thought in the United States of America. As a critic of modern life, Heidegger often lamented the growing global influence of all things American. However, it was precisely in America where his thought inspired the work of generations of thinkers, not only philosophers but also theologians, architects, novelists, and even pundits. As a result, the reception and dissemination of Heidegger's philosophical writings transformed the intellectual and cultural history of the United States at a time when American influence was itself transforming the world. A case study in the complex and sometimes contradictory process of transnational exchange, *Heidegger in America* recasts the scope and methods of contemporary intellectual and cultural history in the age of globalization, challenging what we think we know about Heidegger and American ideas simultaneously.

**The Cultural Role of Architecture** Paul Emmons, Jane Lomholt, John Shannon Hendrix, 2012-11-12 Exploring the ambiguities of how we define the word culture in our global society, this book identifies its imprint on architectural ideas. It examines the historical role of the cultural in architectural production and expression, looking at meaning and communication, tracing the formations of cultural identities. Chapters written by international academics in history, theory, and philosophy of architecture examine how different modes of representation throughout history have drawn profound meanings from cultural practices and beliefs. These are as diverse as the designs they inspire and include religious, mythic, poetic, political, and philosophical references.

working on almost any aspect of modern American thought      *The Tender Detail* Daniel E. Snyder, 2020-06-25 *The Tender Detail* tells a story about the repression of sentimentality through architectural ornament. The protagonists are Louis H. Sullivan and Frank Lloyd Wright, two of the most important architects and designers of ornament in American history. Interweaving close readings of their architecture and writings with wide-ranging discussions about sexuality, gender, and philosophy, the book explores how both men worked to solve the problem of late nineteenth-century ornamentation. It suggests that their solutions, while widely different, were both intimately rooted in the tender emotions of sentimentality. Viewing ornament in this way reveals much not only about Sullivan and Wright's artistic intentions but also about the role of affect, the value of beauty, and the agency and ontology of objects. Illuminated by personal stories from their respective autobiographies, which add a level of human interest unusual in an academic work, *The Tender Detail* is a readable scholarly study which sheds fresh light on Sullivan and Wright's relationship, their work, and on the nature of ornament itself.

**Dwelling, Seeing, and Designing** David Seamon, 1993-01-01 This volume focuses on the question of how people might see and understand the natural and built environments in a deeper, more perceptive way. Why are places important to people, and can designers and policy makers create better places? Contributors include architects, philosophers, and architects.

**Body and Building** George Dodds, Robert Tavernor, Joseph Rykwert, 2002 Essays on the changing relationship of the human body and architecture.

**The Politics of Making** Mark Swenarton, Igea Troiani, Helena Webster, 2013-04-15 A unique collection of contemporary writings, this book explores the politics involved in the making and experiencing of architecture and cities from a cross-cultural and global perspective. Taking a broad view of the word politics, the essays address a range of questions, including: What is the relationship between politics and the making of space? What role has theory played in reinforcing or resisting political power? What are the political difficulties associated with working relationships? Do the products of our making construct our identity or liberate us? A timely volume focusing on an interdisciplinary debate on the politics of making, this is valuable reading for all students, professionals, and academics interested or working in architectural theory.

**The Ethics of Architecture** Mark Kingwell, 2021-03-02 *The Ethics of Architecture* offers a short and approachable scholarly introduction to a timely question in a world of increasing population density: how does one construct habitable spaces that promote social goals such as health, happiness, environmental friendliness, and justice? A preface offers specific discussion of architecture during and after the COVID-19 pandemic.

**Architecture, Culture, and Spirituality** Thomas Barrie, Julio Bermudez, Phillip James Tabb, 2016-03-09 Architecture has long been understood as a cultural discipline able to articulate the human condition and lift the human spirit; yet the spirituality of architecture is rarely directly addressed in academic scholarship. The seventeen chapters provide a diverse range of perspectives grouped according to topical themes: Being in the World, Sacred, Secular, and the Contemporary Condition, Symbolic Engagements, Sacred Landscapes, and Spirituality and the Designed Environment. Even though the

authors approach the subject from a range of disciplines and theoretical positions all share interests in the need to rediscover redefine or reclaim the sacred in everyday experience scholarly analysis and design      **Architectural Research**
