The European Rupture The Defence Sector In Transition:

The European Rupture Mary Kaldor, Geneviève Schméder, 1997 *The European Rupture* focuses on the consequences of the end of the Cold War for defence sectors in Europe. It offers a theoretical framework supported by country case studies from both Western Europe and formerly centrally planned economies. The discussion in the first part of the book analyses the connection between security and the Cold War economy, arguing that the defence sector profoundly shaped the technological development and industrial and social policy in both East and West. It considers some of the issues that have to be confronted in the transition periods, focusing on the new challenges to our perceptions of security, changes in technology, and problems of defence conversion. The final part considers the need for new institutional arrangements and how these have to be constructed in order to re-establish a system of international security and economic regulation. It proposes that there should be a shift away from national or bloc security policies towards a more internationalist security policy and appropriate measures of economic adjustment, especially defence conversion. This book will be of special interest to academics and students interested in European studies, international affairs, international policy, and policymakers. Military Geographies Rachel Woodward, 2011-07-15 *Military Geographies* is about how local space, place, environment, and landscape are shaped by military presence and about how wider geographies are touched by militarism. A book about how local space, place, environment, and landscape are shaped by military presence and about how wider geographies are touched by militarism. Sets a new agenda for the study of military geography with its critical analysis of the ways in which military control over space is legitimized. Explores the ways in which militarism and military activities control development, the use of space, and our understanding of place. Focuses on military lands, establishments, and personnel in contemporary peacetime settings. Uses examples from Europe, North America, and Australasia. Draws on original research into the mechanisms by which the British government manages the defence estate. Illustrated with maps, plans, and other figures. *The End of Military Fordism* Mary Kaldor, Basker Vashee, 1998-04-22 Part of a 2 volume analysis written by a team of key experts from around the world, this text studies the changes taking place within the military sector. The conclusion is that there has been little in the way of a peace dividend. **Conflict Refugees** Christel Querton, 2023-08-10 Uncovers judicial approaches to refugee law across the European Union in the cases of refugees fleeing armed conflicts. France and European Integration Michel R. Gueldry, 2001-05-30 Gueldry analyzes the substantive transformations brought upon the French state by European integration through an incremental and cumulative process generally described as Europeanization. This restructuring is characterized by the erosion of traditional political and economic parameters, the emergence of new means and models of public action, and a general paradigmatic redefinition including a search for renewed political legitimacy by French elite. Covering the period from 1957 to the present, Gueldry examines how regional integration affects French governmental structures, public policies, political processes, and culture. He emphasizes the post Single European Act February 1986 period.

because of the accelerating momentum of the integration process after this milestone treaty Students scholars and policy makers involved with EU history institutions and policies will be particularly interested in the work European Defence Restructuring COST Action A10 (Project),2001 *Brownfield Sites III* C. analyze the impact of institutional changes on regional regimes and the success or failure of formal institutions as a framework for political competitiveness Placing their detailed field data within the larger comparative and theoretical context of political transitions the authors are able to explain the mixed outcomes of post communist regime change in Russia and other post Soviet nations With its innovative model of path contingent democratization and its new typology of political regimes and regime transitions this book will be essential reading for all scholars of democracy
