## **The Evening Star Venus Observed:**

The Evening Star Henry S. F. Cooper, 1994 Much more is observed than Venus in The Evening Star a smoothly written account of the Magellan spacecraft Mr Cooper is able to convey the sense of excitement felt by the engineers and scientists But the star of the story is definitely Venus New York Times The anger and the arguments the petty feuds the politics of science the grubbing for grants make fascinating reading Nature In size density and composition Venus is almost identical to Earth yet its nature and history turn out to be as different as close relatives sometimes can be In The Evening Star Henry S F Cooper Jr veteran science and space reporter for the New Yorker tracks the Magellan spacecraft that has been mapping Venus from orbit since August 1990 In eloquent vivid prose Cooper introduces us to the engineers who have nursed the spacecraft s fragile electronics and the scientists who have used the spacecraft s data to assemble a picture of this strange new world An evocative narrative of the people who do science and the challenges that confront them The Evening Star is an illuminating portrait not only of Venus s character but of Earth s as well and of the place of the two siblings in the family of planets What makes this a particularly gripping story is that the author had extraordinary access to the project scientists The result is a superb first hand account of the Magellan scientists grappling with the bizarre geology of a world in the grip of a runaway greenhouse effect Lucid informative and entertaining Air Space A unique perspective on the Magellan program seen through the eyes of the engineers and scientists working on it Christian Science Monitor

*Susan Fenimore Cooper*

Rochelle Johnson, Daniel Patterson, 2001

Collected here are detailed and diverse essays some that examine Rural Hours

Susan Fenimore Cooper's most famous work and others that help establish Cooper as a major practitioner and theorist of

American nature writing and as a socially engaged artist in many other genres These essays discuss Cooper's uses and manipulations of various literary conventions such as the picturesque the literary village sketch and domestic fiction and illuminate her positions on conservation religion and woman's place in society The engaging collection is divided into four sections The first features essays examining Cooper's work in light of her relationship with her famous literary father James Fenimore Cooper and their devotion to and cultivation of each other's careers The second focuses on Cooper's fascination with landscape and its relation to her environmental philosophies Rural Hours is the subject of the third section which presents new readings on its subtly crafted authorial stance its two complementary conceptions of time and its revaluation of rural and scientific ways of knowing The collection concludes with four works whose insights into Cooper's views on gender domesticity and environmental philosophy grow out of comparisons with several contemporary women writers These remarkable essays by both established and emerging scholars of nineteenth century literature present new findings and insights into a writer who is being reintroduced to the fields of eco criticism and American literature

**Robots In Space** Roger D. Launius, Howard E. McCurdy, 2008-02-11 A look into the history of space exploration and its possible future and just where exactly robotics fit into it all Given the near incomprehensible enormity of the universe it appears almost inevitable that humankind will one day find a planet that appears to be much like the Earth This discovery will no doubt reignite the lure of interplanetary travel Will we be up to the task And given our limited resources biological constraints and the general hostility of space what shape should we expect such expeditions to take In Robots in Space Roger Launius and Howard McCurdy tackle these questions with rigorous scholarship and disciplined imagination jumping comfortably among the worlds of rocketry engineering public policy and science fantasy to expound upon the possibilities and improbabilities involved in trekking across the Milky Way and beyond They survey the literature fictional as well as

academic studies and outline the progress of space programs in the United States and other nations They also assess the current state of affairs to offer a conclusion startling only to those who haven't spent time with Asimov Heinlein and Clarke to traverse the cosmos humans must embrace and entwine themselves with advanced robotic technologies 2008 Outstanding Academic Title Choice Magazine Praise for Robots in Space This short volume manages to capture the history of U S space flight to explain the underpinnings of U S space policy and to plot out the possibilities for our future in space in a style that most anyone can enjoy Andrew McMichael Park City Daily News

**Astronomical Discoveries You Can Make, Too!** Robert K. Buchheim, 2015-05-12 You too can follow in the steps of the great astronomers such as Hipparchus Galileo Kepler and Hubble who all contributed so much to our modern understanding of the cosmos This book gives the student or amateur astronomer the following tools to replicate some of these seminal observations from their own homes With your own eyes Use your own observations and measurements to discover and confirm the phenomena of the seasons the analemma and the equation of time the logic behind celestial coordinates and even the precession of the equinoxes With a consumer grade digital camera Record the changing brightness of an eclipsing binary star and show that a pulsating star changes color as it brightens and dims Add an inexpensive diffraction grating to your camera and see the variety of spectral features in the stars and demonstrate that the Sun's spectrum is similar to one particular type of stellar spectrum With a backyard telescope Add a CCD imager and you can measure the scale of the Solar System and the distance to a nearby star You could even measure the distance to another galaxy and observe the cosmological redshift of the expanding universe Astronomical Discoveries You Can Make Too doesn't just tell you about the development of astronomy it shows you how to discover for yourself the essential features of the universe **The Parowan**

**Gap: Nature's Perfect Observatory** V. Garth Norman, 2023-02-14 Parowan Gap in Southwestern Utah is perhaps the most concentrated collection of ancient Native American petroglyphs in the west with over 90 panels and 1500 figures It is heavily visited and world famous for its many intriguing petroglyphs that until now have been an unsolved mystery In 1993 noted archaeologist Garth Norman began the Parowan Gap Archaeology Project His earth shaking discoveries have challenged previously held ideas about the Fremont culture and way of life Norman's breakthrough of how to read the code of the Gap rock art has enabled him to prove that the Fremont culture was far more sophisticated than was previously known and had distant trade contacts as far away as Mesoamerica Among his most exciting discoveries is the sacred Mesoamerican calendar with in a Fremont lunar solar calendar Norman also discovered a massive world class temple center and calendar observatory and more The book with its fascinating cutting edge study of the Parowan Gap is invaluable for anyone interested in North American archaeology *The Face of Venus* Ladislav E.
