The European Union's Strategic Partnerships Laura C. Ferreira-Pereira, Michael Smith, 2021-03-04 This book provides a critical and updated analysis of the nature of the EU's strategic partnership diplomacy and of the partnerships themselves in times of power shift and contestation It links with key aspects of the EU's Global Strategy it brings together a strong list of experts who work within a clear framework for analysis and it deals not only with the substance of the policy but also with the ways in which the policy as a whole has emerged is conducted and might develop in the future In offering an inclusive set of case studies and diverse perspectives this book aims to advance both conceptualization and analysis of the implementation of the established EU partnerships The book highlights the notion of strategic partnership as a foreign policy instrument to support EU external action in a context of multilevel change and

crisis its policy dimension as a gradually separated but not separable policy within the Union's external action the institutional component given the emergence of SPs as a sort of self preserving institutional platform allowing for denser and deeper cooperation in various policy areas and the implications for the EU's self conception as an international actor with a global identity and role

Europe's Changing Geography Nicola Bellini, Ulrich Hilpert, 2013-08-21 European macro regions Euroregions and other forms of inter regional cross border cooperation have helped to shape new scenarios and new relational spaces which may generate opportunities for economic development while redefining the political and economic meaning of national borders This book is based on a number of key case studies which are crucial to understanding the complex web of political economic and cultural factors that shape the heterogeneous picture of Europe's new geography This book provides a fresh view on this phenomenon with a realistic approach shedding light on its complexity as well as on its ambiguities The new macro regions are interpreted with an approach recognizing the importance of institutionalization but also their flexible configuration and blurred borders The book also raises the issue of credibility and legitimacy arguing that inter regional cooperation has to be removed from the foggy realm of the exchanges between local political and bureaucratic elites in order to be clearly and concretely motivated and functional to key strategic objectives of the regions Finally the authors suggest a complementarity between relations based on proximity and wider possibly global networks where some territories and especially metropolises find opportunities based on virtual proximity Europe's Changing Geography provides a substantial re appraisal of a key phenomenon in the process of European integration today It will be of interest both to scholars of the political economy of European regionalism and to practitioners

Europe and the Management of Globalization Wade Jacoby, Sophie Meunier, 2013-09-13 European politicians often speak of their efforts to manage globalization At one level this is merely a rhetorical device to make globalization more palatable to citizens and prove that policy makers are still firmly in control of their country's fate This volume argues that the advocacy of managed globalization goes beyond rhetoric and actually has been a primary driver of major European Union EU policies in the past twenty years The EU has indeed tried to manage globalization through the use of five major mechanisms 1 expanding policy scope 2 exercising regulatory influence 3 empowering international institutions 4 enlarging the territorial sphere of EU influence and 5 redistributing the costs of globalization These mechanisms are neither entirely novel nor are they always effective but they provide the contours of an approach to globalization that is neither ad hoc deregulation nor old style economic protectionism The recent financial crisis may have seemed initially to vindicate the European efforts to manage globalization but it also represented the limits of such efforts without the full participation of the US and China The EU cannot rig the game of globalization but it can try to provide predictability oversight and regularity with rules that accommodate European interests This book was based on a special issue of Journal of European Public Policy

Public Opinion and Disunity over EU Integration Danilo Di Mauro, Vincenzo Memoli, 2025-08-29 This book explores the origins characteristics and impact of public support for the European Union EU on the process of EU integration It examines core questions around the dynamics behind the dis integration processes how multidimensional attitudes toward the EU are interrelated the dimensions and cleavages of party competition and the public political elites link in EU policy making By simultaneously applying cleavage and post functionalist theoretical perspectives the book observes whether the era of multiple crises has changed support for the EU creating a more polarized public whose attitudes can constrain favor or even stop integration and country membership This book is of key interest to scholars and students of global governance Euroscepticism populism public opinion democracy and more generally European EU studies and European politics

EC 1992, 1991 **The Effects of Greater Economic Integration Within the European Community on the United States**, 1992 **The Challenge of Differentiation in Euro-Mediterranean Relations**

Esther Barbé, Anna Herranz-Surrallés, 2013-09-13 The tension between the aim of creating sustainable multilateral region building dynamics and the need to find more differentiated and flexible forms of cooperation has been ever present in Euro Mediterranean relations The proliferation of different and partially overlapping initiatives in recent years the Euro Mediterranean Partnership the European Neighbourhood Policy and the Union for the Mediterranean is a plain expression of

this tension The 2011 episodes of regime change in the Arab world have once again placed the debate about differentiation in EU's relations with Southern and Eastern Mediterranean Countries at the top of the Union's foreign policy agenda This book contributes to theoretical and practical debates on whether differentiation processes can aid or hinder policy convergence processes and region building efforts more widely The contributions to this collection assess the actual significance and consequences of differentiation in Euro Mediterranean relations through sector specific in depth analyses covering issue areas as varied as environmental policy migration foreign and defence policy trade energy civil protection and democracy promotion The particular angle and comprehensive analysis of this book will make it of great interest for both scholars and policy makers alike in a moment when Euro Mediterranean are in need of a thorough rethink This book was based on a special issue of Mediterranean Politics
