persuasive efforts of women who claimed the authority and expertise of the physician with great difficulty Descriptions of ethos have traditionally been based on masculine communication and behavior leaving women's rhetorical situations largely unaccounted for Skinner's feminist model considers the constraints imposed by material resources and social position the reciprocity between speaker and audience the effect of one rhetor's choices on the options available to others the connections between ethos and genre the potential for ethos to be developed and used collectively by similarly situated people and the role ethos plays in promoting social change Extending recent theorizations of ethos as a spatial ecological and potentially communal concept Skinner identifies nineteenth century women physicians rhetorical strategies and outlines a feminist model of ethos that gives readers a more nuanced understanding of how this mode of persuasion operates for all speakers and writers
