The Happen Stance:

Happenstance Robert Root, 2013-11 Reflecting on how a student's parents met because of a fly ball to center field in a summer softball game author Robert Root wondered how the lives of that student's parents and of the student himself would have changed had the batter bunted or struck out Haunted by this pure example of happenstance he began to ponder his own existence dependent in part on geology the Niagara Escarpment and history the Erie Canal He wondered how happenstance had influenced the course of his parents' lives in particular their marriages they married and divorced each other twice and consequently the shaping of his identity Happenstance investigates the effects of that phenomenon and choice on one man's life Root explores this theme in interwoven strands of narrative interpretation and reflection One strand The Hundred Days follows his attempt to write one hundred journal entries each about a different day in his life to recover memories of specific moments or collections of moments In the strand headed Album he examines and interprets old family photographs in light of the way he reads them in the present as someone now privy to a family secret that directed his and his siblings' lives without their knowledge Interspersed among these brief interpretations and narratives are reflections on happenstance and choice a sequence contemplating their effect on his life and perhaps on all our lives Through juxtaposition and accumulation the book's incremental unraveling of meaning imitates the process of unexpected epiphanies and gradual self-discovery in anyone's life By revisiting individual days giving voice to photographs that mutely preserve family moments and reflecting on the way happenstance and choice determine the directions lives take Robert Root generates a meditation on identity anchored in an album in words and images of a mid-twentieth century life Cézanne's Gravity Carol Armstrong, 2018-11-13 A transformative study freeing the artist from outdated art historical narratives and revealing his work as newly strange again Cézanne's Gravity is an ambitious reassessment of the paintings of Paul Cézanne 1839-1906 Whereas previous studies have often looked at the artist's work for its influence on his successors and on the development of abstraction Carol Armstrong untethers it from this timeline examining Cézanne's painting as a phenomenological and intellectual endeavor Armstrong uses an interdisciplinary approach to analyze Cézanne's work pairing the painter with artists and thinkers who came after him including Roger Fry Virginia Woolf Albert Einstein Maurice Merleau-Ponty Rainer Maria Rilke R.D. Laing and Helen Frankenthaler Through these pairings Armstrong addresses diverse subjects that illuminate Cézanne's painting from the nonlinear narratives of modernist literature and the ways in which space and time act on objects to color sensation and the schizophrenic mind Cézanne's Gravity attends to both the physicality of the artist's works and the weight they bear on the history of art This distinctive study not only invites its readers to view Cézanne's paintings with fresh eyes but also offers a new methodology for art historical inquiry outside linear narratives one truly fitting for our time *The Politics of Realism* Thomas Docherty, 2021-10-21 Exploring the controversial history of an aesthetic realism this book examines the role that realism plays in the negotiation of social political and material realities from the mid-19th century to the present day

, 1964 *Theory and Practice in Essene Law* Aryeh Amihay, 2017 This book offers a novel approach for the study of law in the Judean Desert Scrolls using the prism of legal theory Following a couple of decades of scholarly consensus withdrawing from the Essene hypothesis it proposes to revive the term and suggests employing it for the sectarian movement as a whole while considering the group that lived in Qumran as the Yahad It further proposes a new suggestion for the emergence of the Yahad based on the roles of the Examiner and the Instructor in the two major legal codes the Damascus Document and the Community Rule The understanding of Essene law is divided into concepts and practices in order to emphasize the discrepancy between creed rhetoric and practices The abstract exploration of notions such as time space obligation intention and retribution is then compared against the realities of social practices including admission initiation covenant leadership reproof and punishment The legal analysis yields several new suggestions for the study of the scrolls first Amihay proposes to

rename the two strands of thought of Jewish law formerly referred to as nominalism and realism with the terms legal essentialism and legal formalism The two laws of admission in the Community Rule are distinguished as two different laws one of an association for a group as a whole the other as an admission of an individual The law of reproof is proven to be an independent legal procedure rather than a preliminary stage of prosecution The methodological division in this study of thought and practice provides a nuanced approach for the study of law in general and religious law in particular Clifford Geertz by His Colleagues Clifford Geertz, 2005-03-15 Clifford Geertz is the most influential American anthropologist of the past four decades His writings have defined and given character to the intellectual agenda of a meaning centered nonreductive interpretive social science and have provoked much excitement and debate about the nature of human understanding As part of the American Anthropological Association's centennial celebration the executive board sponsored a presidential session honoring Geertz Clifford Geertz by His Colleagues compiles the twelve speeches given then by a distinguished panel of social scientists along with a concluding piece by Geertz in which he responds to each speaker and reflects on his own career These edited speeches cover a broad range of topics including Geertz's views on morality cultural critique interpretivism time and change Islam and violence A fitting tribute to one of the great thinkers of our age this collection will be enjoyed by anthropologists as well as students of psychology history and philosophy **On Personal Space, the Traversable Self, and the Happily Ever Experience** Lisa Pavlik-Malone, 2022-01-27 This book explores the symbolic relationship between personal space and the Cinderella fairy tale It characterizes personal space as having couched within it the traversable self with a highly individual rather idiosyncratic portion of this space comprised of neurocognitive memory content of an intra personally deep highly satisfying nature It can be said that such nuanced associations are the essence of the happily ever personal experience This book will be of interest to scholars and other researchers concerned with how cognition including psychology and the brain psychology and literature philosophy of mind and metaphor might relate specifically to understanding personal space as well as how it might be characterized within the context of a most shoe centric fairy tale **Theories of Counseling and Psychotherapy** Elsie Jones-Smith, 2019-12-18 A step forward from the traditional textbook on counseling theories Theories of Counseling and Psychotherapy An Integrative Approach offers students a comprehensive overview of past and current approaches to psychotherapy and counseling with a modern approach to theories of psychotherapy An extensive array of mainstream theories as well as contemporary approaches such as narrative feminist LGBT and post modern are covered Author Elsie Jones Smith helps readers to construct their integrated approach to psychotherapy by learning how to develop a broad range of therapeutic expertise to meet the needs of a culturally diverse clientele In addition to listing and describing theories this text compares and contrasts them to show their strengths and weaknesses The Third Edition includes a new chapter on trauma informed counseling psychotherapy and provides updated references sections and studies reflecting the latest developments within the helping professions Included

New Essays on the Nature of Rights Mark McBride, 2017-08-24 This original collection of jurisprudential essays furthers our understanding of the nature of rights In Part 1 Halpin considers the value of Hohfeldian neutrality when theorising about law in general and legal rights in particular and Kurki focuses on Hohfeld's operative notion of power In Part 2 Kramer rebuts Wenar's objections to his Interest Theory of rights and May provides a comparative defence of the Interest Theory against Wenar's Kind Desire theory of claim rights Penner then pursues legal doctrine focusing on whether judges hold the powers of their office as rights an issue over which Wenar and Kramer have clashed Sreenivasan utilising a novel test case involving pure public goods argues that the third party beneficiary objection to the Interest Theory is fatal McBride builds on Sreenivasan's Hybrid Theory of claim rights to construct his new Tracking Theory of rights Cruft then argues that the best extant versions of the Interest and Will Theories of rights cannot avoid a form of circularity and Van Duffel argues that meeting four adequacy constraints which he proposes counts in favour of any theory of rights In Part 3 Andersson proposes a tie breaking procedure for rights conflicts in the applied realm of politics and Steiner concludes by alleging that Kant's principle of right a standard of corrective justice has distributive implications A fine collection of cutting edge essays on the most important normative concept of modernity Professor Leif Wenar King's College London This important collection proceeds much beyond the famous 1998 *A Debate Over Rights* which sets the stage for the debates concerning rights since then It explores three aspects of rights First it re-examines the Hohfeldian classification and highlights its importance and relevance Second it investigates and develops the debates between the interest and the will theory It includes essays by the main established proponents of these two positions as well as essays by newcomers to this field The different essays in this part address each other in ways which sharpen and clarify the disagreements and provide new original arguments for the contending views Last it provides a new perspective on the debates concerning conflicts of rights and the ways to overcome them This collection will no doubt dominate the future conceptual discussions concerning the nature of rights and their role in political theory Professor Alon Harel The Hebrew University of Jerusalem

Handbook of Management and Creativity Chris Bilton, Stephen Cummings, 2014-01-01 In many organisations creativity is so often seen as the preserve of a small number of people with artistic temperaments but in my experience all sorts of people have creative abilities which can be

used to the benefit of a creative organisation The task of a manager is to find ways of exploiting this This Handbook provides the reader with insights to help them and others to promote the kind of creativity that adds real value Greg Dyke Chair British Film Institute Chair Football Association Chancellor University of York UK and Director General of the BBC 2000 2004 *Evolutionary Biology* R. Paul Thompson, Denis Walsh, 2014-03-13 Evolution both the fact that it occurred and the theory describing the mechanisms by which it occurred is an intrinsic and central component in modern biology Theodosius Dobzhansky captures this well in the much quoted title of his 1973 paper Nothing in biology makes sense except in the light of evolution The correctness of this assertion is even more obvious today philosophers of biology and biologists agree that the fact of evolution is undeniable and that the theory of evolution explains that fact Such a theory has far reaching implications In this volume eleven distinguished scholars address the conceptual metaphysical and epistemological richness of the theory and its ethical and religious impact exploring topics including DNA barcoding three grand challenges of human evolution functionalism historicity design evolution and development and religion and secular humanism The volume will be of great interest to those studying philosophy of biology and evolutionary biology
