Thompson, 1997 *American Generals of the Revolutionary War* Robert P. Broadwater, 2024-10-17 At the outbreak of the American Revolution in 1775 the colonies faced the daunting task of creating the first American army and its requisite leadership capable of combating a global superpower whose standing army and general ship were among the finest in the world Built largely from state and local militias the colonial army performed surprisingly well and produced a number of fine generals Some were experienced before the war like George Washington of the Virginia Militia and the British born Horatio Gates while others were as green as the soldiers they led This book presents basic biographical information about America s first generals in the Revolutionary War Included are all generals of the Continental Army along with those commissioned in the colonies militias Drawn from primary sources including death and census records records of the Continental Congress and contemporary writings each biographical sketch provides date and place of birth prewar education and occupation wartime service date and place of death and place of burial Portraits of each general are included where available and appendices display important statistics including comparative ages occupations officers lost by death resignation murder or changing loyalty and states or countries of origin *Iranian Women and Gender in the Iran-Iraq War* Mateo Mohammad Farzaneh, 2021-02-22 Eighteen months after Iran s Islamic Revolution in 1979 hundreds of thousands of the country s women participated in the Iran Iraq War 1980-88 in a variety of capacities Iran was divided into women of conservative religious

backgrounds who supported the revolution and accepted some of the theocratic regime's depictions of gender roles and liberal women more active in civil society before the revolution who challenged the state's male dominated gender bias. However both groups were integral to the war effort serving as journalists paramedics combatants intelligence officers medical instructors and propagandists. Behind the frontlines women were drivers surgeons fundraisers and community organizers. The war provided women of all social classes the opportunity to assert their role in society and in doing so they refused to be marginalized. Despite their significant contributions women are largely absent from studies on the war. Drawing upon primary sources such as memoirs wills interviews print media coverage and oral histories Farzaneh chronicles in copious detail women's participation on the battlefield in the household and everywhere in between. *War by Numbers* Christopher A. Lawrence, 2017-01-01 *War by Numbers* assesses the nature of conventional warfare through the analysis of historical combat. Christopher A. Lawrence establishes what we know about conventional combat and why we know it. By demonstrating the impact a variety of factors have on combat he moves such analysis beyond the work of Carl von Clausewitz and into modern data and interpretation. Using vast data sets Lawrence examines force ratios the human factor in case studies from World War II and beyond the combat value of superior situational awareness and the effects of dispersion among other elements. Lawrence challenges existing interpretations of conventional warfare and shows how such combat should be conducted in the future simultaneously broadening our understanding of what it means to fight wars by the numbers.
