The Aging Experience:

The Aging Experience Jennie Keith, Christine L. Fry, Anthony P. Glascock, Charlotte Ikels, Jeanette Dickerson-Putman, Henry C. Harpending, Patricia Draper, 1994-09-22 In an attempt to understand the meaning of ageing and the treatment of the aged in different cultures seven anthropologists have made studies of 10 communities on four continents the results of which are presented in this book The authors use both qualitative and statistical data to examine such issues as health and well being perceptions of the life course material resources and functionality of elders A unique resource The Aging Experience provides a detailed comparative analysis of ageing worldwide

The Aging Experience Russell A. Ward, 1979

The Aging Experience Cherry Russell, 2024-05-10 Local writing on the subject of old age had tended to a fairly uniform approach focusing on empirical studies of old age as a social problem using census and survey type data Little attention had been paid to theory development Originally published in 1981 this book provides an in depth study of how old age was experienced in contemporary Australian society at the time It was the first major piece of original research on aging to be published in Australia and in several important senses represented a clear departure from the mainstream of Australian gerontology The Aging Experience links original in depth data to a broad theoretical framework Working from the premise that old age is a devalued status it examines the implications of this for the personal experience and interpersonal relations of elderly people Through detailed case studies of elderly Australians their interaction with family age peers and welfare services are described The analysis concentrates less on the overt characteristics of these relationships and their material functions than on their symbolic content and meaning for the participants Thus the study moves beyond conventional statistical documentation of the problems of old age to a sharper delineation of aging as a lived experience It is an approach which offers new perspectives and challenges many of the assumptions underlying previous research

The Aging Experience Bert Cave, 2012-07-01 The Aging Experience is the phase of our life that tends to get the least attention in terms of planning and forethought We research and plan where we will go to college where we will live our career opportunities our retirement Even our estates are planned through wills trusts and advance health care directives What we do not usually plan very well or even understand fully is the aging experience we will encounter

Worlds of Difference Eleanor Palo Stoller, Rose Campbell Gibson, 2000 This collection of readings presents a variety of perspectives on ageing from different communities across the United States Native American Puerto Rican African American the elderly homeless white working class gay and Mexican amongst many others The readings cover topics such as life course social and psychological contexts of ageing paid and unpaid activity the American family and health

Faces of Aging Yoshiko Matsumoto, 2011-03-17 The indisputable fact of Japan s rapidly aging population has been known for some time But beyond statistics and implications for the future we do not know much about the actual aging process Senior citizens and their varied experiences have for the most part been obscured by stereotypes This fascinating new collection of research on the elderly works to put a human face

Eisenhandler,1994-02-17 *Aging and religion* has been badly neglected in the field of Gerontology This book containing 13 chapters of original theory and research is devoted to understanding the place that religion and spirituality hold in the lives of elderly persons The authors each experts in their own field approach this issue from their backgrounds in the social sciences and the humanities Overall this is a ground breaking collection It is one of the first attempts to seek to understand the role that religion plays in the lives of elderly persons Based on their various multi disciplinary perspectives the authors make use of a variety of qualitative and quantitative methodologies as well as personal narrative and literature to grapple with this issue Finally the book is unique in that it addresses scholars and students including the educated layman rather than the professional alone **Health Psychology** Edward P.
