The Agrarian Sociology Of Ancient Civilizations:

Agrarverhältnisse Im Altertum, in Handwörterbuch Der Staatwissenschaften Max Weber, 1976 **The Agrarian Sociology of Ancient Civilizations** Max Weber, 2013-08-06

Max Weber is widely recognized as the greatest of the founders of classical sociology. Yet whilst his thought is often associated with the development of capitalism in Western Europe or the analysis of modernity, Weber also had a profound scholarly interest in ancient societies and the Near East. *The Agrarian Sociology of Ancient Civilizations* is Weber's neglected masterpiece which first appeared in German in 1897 and was reissued in 1909. It represents a fascinating and rigorous exercise to bring the newly forged concepts of sociology to bear on civilizations as diverse as Mesopotamia and Egypt, Hebrew society in Israel, the city states of classical Greece, the Hellenistic empire, and finally republican and imperial Rome. Blending throughout the work a description of socio-economic structures with an investigation into mechanisms and causes of the rise and decline of social systems, the volume ends with a magisterial explanatory essay on the underlying reasons for the ultimate fall of the Roman Empire and with it of the close of Antiquity itself.

The Agrarian Sociology of Ancient Civilizations Max Weber, 1988. Written in 1908, *The Agrarian Sociology of Ancient Civilizations* represents a sustained historical synthesis of a type unlike anything else in Weber's writing. Nor has any equivalent survey been written by a classical scholar since Weber starts with a general introduction that explores the necessary concepts for relating economic theory and ancient society. He then proceeds to a chronologically ordered study of Mesopotamia and Egypt, Hebrew society in Israel, the classical city states of Greece, the imperial Hellenic realms, and finally the evolution of Roman society from the Republic to the rise and fall of the Empire.

The Agrarian Sociology of Ancient Civilizations Max Weber, 2013-08-06. Max Weber is widely recognized as the greatest of the founders of classical sociology, is often associated with the development of capitalism in Western Europe and the analysis of modernity. But he also had a profound scholarly interest in ancient societies and the Near East and turned the youthful discipline of sociology to the study of these archaic cultures. *The Agrarian Sociology of Ancient Civilizations* is Weber's neglected masterpiece, first published in German in 1897 and reissued in 1909. It is a fascinating examination of the civilizations of Mesopotamia, Egypt, Hebrew society in Israel, the city states of classical Greece, the Hellenistic world, and finally Republican and Imperial Rome. The book is infused with the excitement attendant when new intellectual tools are brought to bear on familiar subjects. Throughout the work, Weber blends a description of socio-economic structures with an investigation into mechanisms and causes in the rise and decline of social systems. The volume ends with a magisterial explanatory essay on the underlying reasons for the fall of the Roman Empire.

Romancing Antiquity George E. McCarthy, John Paul Jones, 1997 In this unique and comprehensive book George McCarthy examines the influence of Greek philosophy literature arts and politics on the development of twentieth century German social thought McCarthy demonstrates that the classical spirit vitalized thinkers such as Weber Heidegger Freud Marcuse Arendt Gadamer and Habermas With the romancing of antiquity they transformed their understanding of the modern self political community and Enlightenment rationality By viewing contemporary social theory from the framework of the classical world McCarthy argues we are capable of thinking beyond the limits of modernity to new possibilities of human reason science beauty and social justice

The Ethnological Imagination Fuyuki Kurasawa, 2004 Fuyuki Kurasawa unearths what he terms the ethnological imagination a substantial countercurrent of thought that interprets and contests Western modernity's existing social order through comparison and contrast to a non Western other Kurasawa traces and critiques the writings of some of the key architects of this way of thinking Jean Jacques Rousseau Karl Marx Max Weber Emile Durkheim

Claude Levi Strauss and Michel Foucault In the work of these thinkers Kurasawa finds little justification for two of the most prevalent claims about social theory the wholesale postmodern dismissal of the social theoretical enterprise because of its supposedly intractable ethnocentrism and imperialism or on the other hand the traditionalist and historicist revival of a canon stripped of its intercultural foundations Kurasawa s book defends a cultural perspective that eschews both the false universalism of end of history scenarios and the radical particularism embodied in the vision of the clash of civilizations It contends that the ethnological imagination can invigorate critical social theory by informing its response to an increasingly multicultural world a response that calls for a reconsideration of the identity and boundaries of the West Weber, Schumpeter and Modern Capitalism John Love, 2017-07-20 This book provides the groundwork for a general theory of modern capitalism by reinterpreting Max Weber s work on the origins and institutional underpinnings of modern capitalism and Joseph Schumpeter s thought on the mechanisms and functioning of the capitalist economy Focusing on the lesser known works of both figures particularly in the case of Weber whose writings on economics and economic history are frequently overlooked the author contends that a combination of Schumpeter s and Weber s theoretical schemas incorporating their many valuable insights provides the basis of a unified overall theory of modern capitalism that is comprehensive coherent and persuasive With attention to the important theoretical connections between Weber and Schumpeter and the respective contributions of both with regard to the nature and workings of capitalism the author explores the compatibility of the two approaches arguing that the full significance of the contributions of the two writers has not been adequately appreciated A systematic and sympathetic comparison and synthesis of the contributions of two of the central figures in social and economic theory which highlights the enduring relevance of their work in times of political and economic crisis Weber Schumpeter and Modern Capitalism will appeal to scholars across the social sciences with interests in social and economic theory classical sociology and economic history
