Lee, 2021-01-01 The Face of the Earth as Seen from the Air by Willis T Lee A captivating account of the Earth's landscapes and geographical features as observed from the air Willis T Lee's descriptive narrative takes readers on a journey across diverse terrains from mountains and rivers to forests and deserts Through this exploration of the world's natural beauty the book provides a unique perspective on the Earth's topography and the vastness of our planet Key Aspects of the Book The Face of the Earth as Seen from the Air Aerial Photography Lee's book presents a visual and descriptive survey of the Earth's geography showcasing the stunning vistas captured from the air Geographical Diversity The work covers a wide range of landscapes highlighting the Earth's geographical variations and natural wonders Environmental Awareness The Face of the Earth as Seen from the Air inspires readers to appreciate the planet's beauty and fosters a sense of responsibility towards environmental conservation Willis T Lee was an American geographer and professor born in 1857 His passion for geography and exploration led him to study and document the Earth's diverse landscapes The Face of the Earth as Seen from the Air reflects his dedication to understanding the world through aerial observation and serves as a testament to the wonder and complexity of the Earth's natural beauty

Earth Science Satellite Remote Sensing John J. Qu, Wei Gao, Menas Kafatos, Robert E. Murphy, Vincent V. Salomonson, 2007-05-18 Satellite remote sensing for Earth science data has been rapidly expanding during the last decade Volume 1 of this two volume monograph covers missions sensors such as SeaWiFS Wide Field of view Sensor SeaWiFS Tropical Rainfall Measuring Mission TRMM Total Ozone Mapping Spectrometer TOMS Atmospheric Infrared Sounder AIRS and Advanced Microwave Sounding Unit AMSU It also discusses the NPOESS and NPP missions Emphasis was placed on the recently launched Moderate Resolution Imaging Spectroradiometer MODIS on board of both Terra and Aqua Some key MODIS science team members were invited to contribute several chapters The core of this monograph arose from the workshop for Earth Science Satellite Remote Sensing held at George Mason University GMU in October 2002 Both volumes are designed to give scientists and graduate students with limited remote sensing background a thorough introduction to current and future NASA NOAA and other Earth science remote sensing missions **Sciences of the Earth** Gregory A. Good, 2019-10-18 The planet as seen by its inhabitants In two millennia our knowledge of the planet and its natural laws and forces has undergone remarkable changes from the religious belief of earth as the center of the universe to the modern astronomers view that it is a mere speck in the cosmos Now a first of its kind reference work charts this remarkable intellectual progression in our evolving perception of the earth by surveying the history of geology geography geophysics oceanography meteorology space science and many other fields Covers human understanding of the Earth in various times and cultures The Encyclopedia traces our understanding of the earth and its functioning throughout history summarizing

historical explanations of earthly occurrences including explanations with no scientific basis It presents the latest facts and theories explains how our understanding of the earth has evolved and shows why many outrageous and fanciful earlier ideas were accepted in their time The coverage explores the physical phenomena that inform our knowledge starting at the earth's core and extending outward through the mantle crust oceans and atmosphere to the magnetosphere and beyond Charts the evolution of our perceptions The primary focus of the Encyclopedia is the history of the study of the earth It also discusses the institutions that advanced and shaped science and probes the interplay between science practical applications and social and political forces The result is a unified historical overview of the earth across a wide canvas of time and place from antiquity to the space age Its wide ranging articles summarize subjects as diverse as geography and imperialism environmentalism computers and meteorology ozone formation theories since 1800 scientific rocketry the Scopes trial and much more Special Features Shows how diverse disciplines from geology to space science fit together in a coherent view of the earth Explains earlier ideas and theories in the context of the beliefs and scientific knowledge of their time Spotlights important institutions that have shaped the history of science Explores relationships between science practical applications and sociopolitical concerns Provides a subject index and an index of scientists with birth death dates
