Pitzer, 2010-01-20 From the Shakers to the Branch Davidians America's communal utopians have captured the popular imagination Seventeen original essays here demonstrate the relevance of such groups to the mainstream of American social religious and economic life The contributors examine the beliefs and practices of the most prominent utopian communities founded before 1965 including the long overlooked Catholic monastic communities and Jewish agricultural colonies Also featured are the Ephrata Baptists Moravians Shakers Harmonists Hutterites Inspirationists of Amana Mormons Owenites Fourierists Icarians Janssonists Theosophists Cyrus Teed's Koreshans and Father Divine's Peace Mission Based on a new conceptual framework known as developmental communalism the book examines these utopian movements throughout the course of their development before during and after their communal period Each chapter includes a brief chronology giving basic information about the group discussed An appendix presents the most complete list of American utopian communities ever published The contributors are Jonathan G Andelson Karl J R Arndt Pearl W Bartelt Priscilla J Brewer Donald F Durnbaugh Lawrence Foster Carl J Guarneri Robert V Hine Gertrude E Huntington James E Landing Dean L May Lawrence J McCrank J Gordon Melton Donald E Pitzer Robert P Sutton Jon Wagner and Robert S Weisbrot *The Family in America* Joseph M. Hawes, Elizabeth F. Shores, 2002-05-22 An incisive multidisciplinary look at the American family over the past 200 years written by respected scholars and researchers Family in America offers two powerful antidotes to popular misconceptions about American family life historical perspective and scientific objectivity When we look back at our early history we discover that the idealized 1950s family characterized by a rising birthrate a stable divorce rate and a declining age of marriage was a historical aberration out of line with long term historical trends Working mothers we learn are not a 20th century invention most families throughout American history have needed more than one breadwinner In the exciting new scholarship described here readers will learn precisely what is new in American family life and what is not and acquire the perspective they need to appreciate both the genuine improvements and the losses that come with change *Imagine Nation* Peter Braunstein, Michael William Doyle, 2013-07-04 Amidst the recent flourishing of Sixties scholarship Imagine Nation is the first

collection to focus solely on the counterculture Its fourteen provocative essays seek to unearth the complexity and rediscover the society changing power of significant movements and figures *Current Catalog* National Library of Medicine (U.S.),1970 First multi year cumulation covers six years 1965 70 *Out of the Cloister* Helen Rose Fuchs

Ebaugh,2014-07-03 Since Vatican Council II convent walls have crumbled and the structures that once separated nuns from the world are gone *Out of the Cloister* is an organizational analysis of the structural and ideological changes that took place in Catholic religious orders of women in the United States Many nuns today dress in street clothes choose their own jobs have a degree of financial independence from the larger order and may not be recognized by their coworkers as nuns What might once have been defined as a total institution has become within the span of a few years a type of voluntary organization where members join together loosely to achieve a common purpose Helen Rose Fuchs Ebaugh approaches religious orders as utopian communities and examines how contact with the larger society has affected the distinctiveness and solidarity that hold such groups together She analyzes the patterns occurring within orders with particular focus on the relationship between organizational change and membership loss Since changes have been introduced into religious orders at different rates and since orders vary in such characteristics as size and educational level of members it is possible to analyze relationships between exit rates and other organizational variables The complex interplay of education and membership loss is one of the organizational dilemmas the author examines Although she is no longer a part of organized religious life Ebaugh spent ten years as a nun and during that time collected much of the data presented in this book As a nun she also helped conduct a number of self studies and evaluations involved with the post Vatican II reform and renewal efforts She is therefore in the unique position of a researcher who collected data as an insider and analyzed it as an outsider This book is one of the first systematic empirical studies of religious orders in the United States and one of the few sociological investigations of convents and the changes occurring within them **Design Commons** Gerhard

Bruyns,Stavros Kousoulas,2022-05-17 This book directly links the notion of the commons with different design praxes and explores their social cultural and ecological ramifications It draws out material conditions in four areas of design interest social design commons and culture ecology and transdisciplinary design As a collection of positions the diversity of arguments advances the understanding of the commons as both concepts and modes of thinking and their material translation when contextualised in the domain of design questions In other words it moves abstract social science concepts towards concrete design debates This text appeals to students researchers and practitioners working on design in architecture architecture theory urbanism and ecology
