

A large, billowing white and grey mushroom cloud from a nuclear explosion dominates the background. The cloud is set against a dark sky and a landscape of rolling hills or mountains in shades of blue and brown at the bottom.

Brembeck, 1985 *Strategic Doctrines and Their Alternatives* Yoshikazu Sakamoto, 1987 This book will give the reader a perspective into the core theory and practice of data mining and knowledge discovery DM KD Its chapters combine many theoretical foundations for various DM KD methods and they present an array of examples many of which are drawn from real life applications Most of the theoretical developments discussed are accompanied by an extensive empirical analysis which should give the reader both a deep theoretical and practical insight into the subjects covered The intended audience for this book includes graduate students studying data mining who have some background in mathematical logic and discrete optimization as well as researchers and practitioners in the same area

BOOK JACKET **Survival for All** A. J. Aizenstat, 1985 Examines current U S nuclear policy looks at the progress of arms control negotiations and suggests a new approach to nuclear disarmament SDI and the Alternatives Simon P. Worden, 2020-10-09 The controversial sometimes emotional national debate over strategic defense has been overshadowed recently by other even weightier national and global issues Research programs for the Strategic Defense Initiative continue however and the debate is likely to resume as visible results of that research begin to compete for a share of the nation s budget It is in the national interest that this debate proceed in an atmosphere of rational objective analysis This study by an experienced scientist and military expert provides a basis for such analysis Colonel Simon P Worden US Air Force considers strategic defense in the context of four competing strategic theories 1 deterrence through mutual assured destruction 2 deterrence through nuclear warfighting 3 deterrence relying on non nuclear defense and 4 disarmament He points out misconceptions and exaggerations of earlier SDI debate taking to task those in the scientific community who abandoned objective analysis to pursue a political agenda His fundamental theme is that non nuclear space based defense is not only feasible but in some ways preferable to reliance on weapons of mass destruction To support his case he outlines the phases of a proposed actual system As Worden notes the ultimate decisions on strategic defense are up to the American people and their representatives Such decisions will no doubt take in a range of factors economic political technical and ethical as all important national decisions should Worden offers a reasoned case for strategic defense as an alternative strategy for deterring war The Myth of International Order Arjun Chowdhury, 2018 In February of 2011 Libyan citizens rebelled against Muammar Qaddafi and quickly unseated him The speed of the regime s collapse confounded many observers and the ensuing civil war showed Foreign Policy s index of failed states to be deeply flawed FP had in 2010 identified 110 states as being more likely than Libya to descend into chaos They were spectacularly wrong but this points to a larger error in conventional foreign policy wisdom failed or weak and unstable states are not anomalies but are instead in the majority More states resemble Libya than Sweden Why are most states weak and unstable Taking as his launching point Charles Tilly s famous dictum that war made the state and the state made war Arjun Chowdhury argues that the problem lies in our

mistaken equation of democracy and economic power with stability But major wars are the true source of stability only the existential crisis that such wars produced could lead citizens to willingly sacrifice the resources that allowed the state to build the capacity it needed for survival Developing states in the postcolonial era never experienced the demands major interstate war placed on European states and hence citizens in those nations have been unwilling to sacrifice the resources that would build state capacity For example India and Mexico are established democracies with large economies Despite their indices of stability both countries are far from stable there is an active Maoist insurgency in almost a quarter of India s districts and Mexico is plagued by violence drug trafficking and high levels of corruption in local government Nor are either effective at collecting revenue As a consequence they do not have the tax base necessary to perform the most fundamental tasks of modern states controlling organized violence in a given territory and providing basic services to citizens By this standard the majority of states in the world about two thirds are weak states Chowdury maintains that an accurate evaluation of international security requires a normative shift the language of weakness and failure belies the fact that strong states are exceptions Chowdhury believes that dismantling this norm is crucial as it encourages developing states to pursue state building via war which is an extremely costly approach in terms of human lives and capital Moreover in our era such an approach is destined to fail because the total wars of the past are highly unlikely to occur today Just as importantly the non state alternatives on offer are not viable alternatives For better or worse we will continue to live in a state dominated world where most states are weak Counterintuitive and sweeping in its coverage The Myth of International Order demands that we fundamentally rethink foundational concepts of international politics like political stability and state failure

Britain and Defence 1945-2000 Stuart Croft, Peter Dorman, 2014-06-06 This text provides a concise thematic introduction to the evolution of British defence policy since the end of the second world war
