The Amazon Rubber Boom 1850 1920:

The Amazon Rubber Boom, 1850-1920 Barbara Weinstein, 1983-06-01 The first complete account of the rise and fall of the rubber economy in Brazil provides a dramatic example of one of the boom and bust cycles traditionally associated with Brazilian economic history The Amazon rubber trade was one of the most important export booms in the history of Latin America dominating the economic life of the Amazon for 70 years until the successful cultivation of rubber trees by the British in Southeast Asia Yet this long period of vigorous economic activity left the basic structure of Amazonian society relatively unchanged One of the author's main concerns is to explore why rubber exports did not generate substantial growth in either the industrial or the agricultural sector and she finds the answers primarily in the relations of production and exchange that characterized the Amazon's extractive economy The study also considers the impact of political decentralization and regionalism on the Amazonian economy draws comparisons with the coffee boom in Sao Paulo that induced sustained industrial growth in that area and traces the consequences of the rubber economy's collapse on the social political and economic life in the Amazon

The People of the River Oscar de la Torre, 2018-08-17 In this history of the black peasants of Amazonia Oscar de la Torre focuses on the experience of African descended people navigating the transition from slavery to freedom He draws on social and environmental history to connect them intimately to the natural landscape and to Indigenous peoples Relying on this world as a repository for traditions discourses and strategies that they retrieved especially in moments of conflict Afro Brazilians fought for autonomous communities and developed a vibrant ethnic identity that supported their struggles over labor land and citizenship Prior to abolition enslaved and escaped blacks found in the tropical forest a source for tools weapons and trade but it was also a cultural storehouse within which they shaped their stories and records of confrontations with slaveowners and state authorities After abolition the black peasants knowledge of local environments continued to be key to their aspirations allowing them to maintain relationships with powerful patrons and to participate in the protest cycle that led Getulio Vargas to the presidency of Brazil in 1930 In commonly referring to themselves by such names as sons of the river black Amazonians melded their agro ecological traditions with their emergent identity as political stakeholders

nonhumans He moves between a detailed narrative that analyzes the production of scientific knowledge about Amazonia over the centuries and an absorbing account of the extraordinary transformations to the fluvial landscape carried out over the past forty years by the inhabitants of Igarap Guariba four hours downstream from the nearest city Engagingly written theoretically inventive and vividly illustrated the book introduces a diverse range of characters from sixteenth century explorers and their native rivals to nineteenth century naturalists and contemporary ecologists logging company executives and river traders A natural history of a different kind In Amazonia shows how humans animals rivers and forests all participate in the making of a region that remains today at the center of debates in environmental politics Consuls and the Institutions of Global Capitalism, 1783-1914 Ferry de Goey, 2015-10-06 The nineteenth century saw the expansion of Western influence across the globe A consular presence in a new territory had numerous advantages for business and trade Using specific case studies de Goey demonstrates the key role played by consuls in the rise of the global economy

Amazon Peasant Societies in a Changing Environment Cristina Adams, Rui S. S. Murrieta, Walter A. Neves, Mark Harris, 2008-12-02 Amazonia is never quite what it seems Despite regular attention in the media and numerous academic studies the Brazilian Amazon is rarely appreciated as a historical place home to a range of different societies Often left invisible are the families who are making a living from the rivers and forests of the region Broadly characterizing these people as peasants Amazon Peasant Societies in a Changing Environment seeks to bring together research by anthropologists historians political ecologists and biologists A new paradigm emerges which helps understand the way in which Amazonian modernity has developed This book addresses a comprehensive range of questions from the politics of conservation and sustainable development to the organization of women s work and the diet and health of Amazonian people Apart from offering an analysis of a neglected aspect of Amazonia this collection represents a unique interdisciplinary exercise on the nature of one of the most beguiling regions of the world Journeys into Terror Cynthia J. Moran, 1993-08 In this well written comprehensive reasonable yet passionate volume Emilio Moran introduces us to the range of human and ecological diversity in the Amazon Basin By describing the complex heterogeneity on the Amazon s ecological mosaic and its indigenous populations conscious adaptations to this

Insatiable Appetite Richard P. Tucker,2000-11-01 In the late 1800s American entrepreneurs became participants in the 400 year history of European economic and ecological hegemony in the tropics Beginning as buyers in the tropical ports of the Atlantic and Pacific they evolved into land speculators controlling and managing the areas where tropical crops were grown for carefully fostered consumer markets at home As corporate agro industry emerged the speculators took direct control of the ecological destinies of many tropical lands Supported by the U S government s diplomatic and military protection they migrated and built private empires in the Caribbean Central and South America the Pacific Southeast Asia and West Africa Yankee investors and plantation managers mobilized engineers agronomists and loggers to undertake what they called the Conquest of the Tropics claiming to bring civilization to benighted peoples and cultivation to unproductive nature In competitive cooperation with local landed and political elites they not only cleared natural forests but also displaced multicrop tribal and peasant lands with monocrop export plantations rooted in private property regimes This book is a rich history of the transformation of the tropics in modern times pointing ultimately to the declining biodiversity that has resulted from the domestication of widely varied natural systems Richard P Tucker graphically

illustrates his study with six major crops each a virtual empire in itself sugar bananas coffee rubber beef and timber He concludes that as long as corporate dominated free trade is ascendant paying little heed to its long term ecological consequences the health of the tropical world is gravely endangered
