The English Landscape Past Present And Future

Edward John T. Collins, Joan Thirsk

The English Landscape Past Present And Future:

The Landscape of Britain Michael A. Reed, 1990-01-01 The landscape of Britain has an extraordinarily rich historical density and this lavishly illustrated book explores some of the principal themes in its history The landscape of today is the product both of natural geological processes and of some 10 000 years of human habitation Professor Michael Reed looks at the main factors at work in its evolution and examines the evidence that enables us to recreate landscapes of the past Britain's landscape is a palimpsest a text upon which each generation has written its own social autobiography without however being able to erase the contribution of its predecessors This remarkable book examines the endless processes of accretion which have created the rural and urban landscapes as today's inhabitants have inherited them from the past It will appeal to those interested in exploring the rich diversity of Britain as well as regional and historical geographers Contents Part I Foundations Part II Medieval Britain Part III Towards the modern world Index *Landscape Interfaces* Hannes Palang, G. Fry, 2013-06-29 This book has been initiated by the workshop on Cultural heritage in changing landscapes held during the IALE International Association for Landscape Ecology European Conference that started in Stockholm Sweden in June 2001 and continued across the Baltic to Tartu Estonia in July The papers presented at the workshop have been supported by invited contributions that address a wider range of the cultural heritage management issues and research interfaces required to study cultural landscapes The book focuses on landscape interfaces Both the ones we find out there in the landscape and the ones we face while doing research We hope that this book helps if not to make use of these interfaces then at least to map them and bridge some of the gaps between them The editors wish to thank those people helping us to assemble this collection First of all our gratitude goes to the authors who contributed to the book We would like to thank Marc Antrop Mats Widgren Roland Gustavsson Marion Potschin Barbel Tress Tiina Peil Helen Soovali and Anu Printsmann for their quick and helpful advice opinions and comments during the different stages of editing Helen Soovali and Anu Printsmann together with Piret Pungas thank you for technical help **The Invention of the English Landscape** Peter Borsay, Rosemary Sweet, 2023-07-27 Since at least the Reformation English men and women have been engaged in visiting exploring and portraying in words and images the landscape of their nation The Invention of the English Landscape examines these journeys and investigations to explore how the natural and historic English landscape was reconfigured to become a widely enjoyed cultural and leisure resource Peter Borsay considers the manifold forces behind this transformation such as the rise of consumer culture the media industrial and transport revolutions the Enlightenment Romanticism and the Gothic revival In doing so he reveals the development of a powerful bond between landscape and natural identity against the backdrop of social and political change from the early modern period to the start of the Second World War Borsay's interdisciplinary approach demonstrates how human understandings of the natural world shaped the geography of England and uncovers a wealth of valuable material from novels and poems to paintings that expose historical understandings of the landscape This

innovative approach illuminates how the English countryside and historic buildings became cultural icons behind which the nation was rallied during war time and explores the emergence of a post war heritage industry that is now a definitive part of British cultural life *Interpreting the Landscape* Michael Aston,2002-09-11 Most places in Britain have had a local history written about them Up until this century these histories have addressed more parochial issues such as the life of the manor rather than explaining the features and changes in the landscape in a factual manner Much of what is visible today in Britain's landscape is the result of a chain of social and natural processes and can be interpreted through fieldwork as well as from old maps and documents Michael Aston uses a wide range of source material to study the complex and dynamic history of the countryside illustrating his points with aerial photographs maps plans and charts He shows how to understand the surviving remains as well as offering his own explanations for how our landscape has evolved **History of the Native Woodlands of Scotland 1500-1920**

T. C. Smout,2007-09-15 The first modern history of Scottish woodlands this highly illustrated volume explores the changing relationship between trees and people from the time of Scotland's first settlement focusing on the period 1500 to 1920 Drawing on work in natural science geography and history as well as on the authors own research it presents an accessible and readable account that balances social economic and environmental factors Two opening chapters describe the early history of the woodlands The book is then divided into chapters that consider traditional uses and management the impact of outsiders on the pine woods and the oakwoods in the first phase of exploitation and the effect of industrialization Separate chapters are devoted to case studies of management at Strathcarron Glenorchy Rothiemurchus and on Skye *An Historical Geography of Europe* Robin Alan Butlin,Robert A. Dodgshon,1998 An Historical Geography of Europe represents the first multi authored comprehensive study on the subject It provides the reader with an analytical and explanatory account of European historical geography from classical times to the modern period including the vast changes to landscape settlements population and in political and cultural structures and character that have taken place since 1500

The book takes account of the vast volume of relevant research and literature that has been published over the past two or three decades in order to achieve a unique coverage and synthesis of this very broad range of evidence and opinion and has tried to engage with many of the main themes and debates to give a clear indication of changing ideas and interpretations of the subject This book brings together British and European authors from a number of disciplines who have considerable distinction in the various fields of historical geography and related fields including a significant number who have already written on the wider problem of European historical geography It is amply illustrated with maps and diagrams to present many of the issues in a visual form **A Century of British Medieval Studies** Alan Deyermond,2007-11-29 This is an authoritative guide to the full range of medieval scholarship undertaken in twentieth century Britain history archaeology language culture Some of the twenty nine essays focus on changes in research method or on the achievements of individual scholars others are personal accounts of a lifetime's work *The Agrarian History of England and Wales* Edward John T.

Collins, Joan Thirsk, 2000 The unifying theme of this volume is the changing role of the countryside in national life and the impact upon it of the social and economic forces unleashed by industrialisation and the growth of towns **Landscapes Decoded** Susan Oosthuizen, 2006 Presenting the research into the landscape history of the Bourn Valley west of Cambridge this book is published as the first volume in a series of mid length monographs on unusual subjects within local and regional history It is illustrated throughout with maps and photos *The British Empire: Health problems of the Empire-past, present, and future* Hugh Gunn, 1924 *Geography and History* Alan R. H. Baker, 2003-11-06 Table of contents The English Landscape Stanley Reginald John Woodell, 1985 This lushly illustrated volume traces the development of the English landscape from the earliest prehistoric times to the present and beyond bringing together the research and views of a group of distinguished scientists and historians **The Fragile Environment** L. E. Friday, Laurie Friday, R. A. Laskey, 1991-05-09 The Fragile Environment explores the impact of the human species on its environment British and Irish Archaeology, 1994 *Flesh in the Age of Reason* Roy Porter, 2005-01-27 As an introduction to early modern thinking and the impact of past ideas on present lives this book can find few equals and no superiors Porter is a witty humane writer with an extraordinary vocabulary and a sparkling sense of fun Whether he is quoting from obscure medical texts or analysing scabrous diaries dishing the dirt on long dead bigwigs or evoking sympathy for human suffering his grasp is masterly and his erudition appealing I wish I could read it again for the first time you can Times Educational Supplement Book of the Week In this startlingly brilliant sequel to the prize winning ENLIGHTENMENT Roy Porter completes his lifetime s work offering a magical enthusiastic and charming account of the writings of some of the most attractive figures ever to write English

Teaching Landscape History Jan Woudstra, David Jacques, Robert Holden, 2023-11-29 Landscape history is changing in content and style to address the issues of today Experienced teachers and authors on the history of gardens and landscapes come together in this new volume to share ideas on the future of teaching history in departments of landscape architecture archaeology geography and allied subjects Design history remains important but this volume brings to the fore the increasing importance of environmental history economic history landscape history cultural landscapes environmental justice and decolonisation ideas of sustainability and climate change amelioration which may all be useful in serving the needs of a widening range of students in an increasingly complex world The main themes include what history should we narrate in the education of landscape architects how can we recognise counter narratives and our own bias how should we engage the students in the history of their chosen profession how can designers and researchers be persuaded of the relevance of history teaching to theory and practice and what resources do we need to develop teaching of landscape histories This book will be of interest to anyone teaching courses on landscape architecture urban design horticulture garden design architectural history cultural geography and more **Redefining Nature** Roy Ellen, Katsuyoshi Fukui, 2021-01-07 How can anthropology improve our understanding of the interrelationship between nature and culture What can anthropology contribute to

practical debates which depend on particular definitions of nature such as that concerning sustainable development Humankind has evolved over several million years by living in and utilizing nature and by assimilating it into culture Indeed the technological and cultural advancement of the species has been widely acknowledged to rest upon human domination and control of nature Yet by the 1960s the idea of culture in confrontation with nature was being challenged by science philosophy and the environmental movement Anthropology is increasingly concerned with such issues as they become more urgent for humankind as a whole This important book reviews the current state of the concepts of nature we use both as scientific devices and ideological constructs and is organised around three themes nature as a cultural construction the cultural management of the environment and relations between plants animals and humans **Landscapes and**

Landforms of England and Wales Andrew Goudie,Piotr Migoń,2020-05-10 This book presents the geomorphological diversity of England and Wales These regions are characterised by an extraordinary range of landforms and landscapes reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years including ice sheet expansion and decay The book begins by providing the geological and geomorphological context needed in order to understand this diversity in a relatively small area In turn it presents nearly thirty case studies on specific landscapes and landforms all of which are landmarks in the territory discussed These include the famous coastal cliffs and landslides granite tors of Dartmoor formerly glaciated mountains of Snowdonia and the Lake District karst of Yorkshire and many others The geomorphology of London and the Thames is also included Providing a unique reference guide to the geomorphology of England and Wales the book is lavishly illustrated with diagrams colour maps and photos and written in an easy to read style The contributing authors are distinguished geomorphologists with extensive experience in research writing and communicating science to the public The book will not only be of interest to geoscientists but will also benefit specialists in landscape research geoconservation tourism and environmental protection **Nature** Peter Coates,2013-04-26 Nature is a deceptively simple and ahistorical term suggesting intrinsic unchanging reality Yet nature has a history too both in terms of human attitudes and human impacts Coates outlines the major understandings of nature in the western world since classical times from nature as higher authority to its more recent meaning of threatened physical space and life forms Unlike many others this book places the history of attitudes to nature within the story of human induced changes in the material environment And few others take a supranational perspective or cross the divides between historical eras A distinctive unifying theme is Coates s interest in how green writers over the last thirty years have interpreted our past dealings with nature specifically their efforts to diagnose the roots of contemporary ecological problems and their search for ancestors He concludes with a discussion of the future of nature in the context of developments such as the new ecology global warming advances in genetic engineering and research on animal behaviour Assuming no previous knowledge Nature provides the reader with an accessible synthesis and introduction to some of environmental history s central features and debates

confirming its status as one of the most enthralling current pursuits within historical studies This will be essential reading for second year undergraduates and above in cultural history and environmental history as well as to the general reader interested in environmental issues *Tourism, Landscape, and the Irish Character* William Williams, 2012-02-24 Picturesque but poor abject yet sublime in its Gothic melancholy the Ireland perceived by British visitors during the eighteenth and nineteenth centuries did not fit their ideas of progress propriety and Protestantism The rituals of Irish Catholicism the lamentations of funeral wakes the Irish language they could not comprehend even the landscapes were all strange to tourists from England Wales and Scotland Overlooking the acute despair in England's own industrial cities these travelers opined in their writings that the poverty bog lands and ill thatched houses of rural Ireland indicated moral failures of the Irish character
