Great Britain. Patent Office, 1859 **The Lever of Riches** Joel Mokyr, 1992-04-09 In a world of supercomputers genetic engineering and fiber optics technological creativity is ever more the key to economic success But why are some nations more creative than others and why do some highly innovative societies such as ancient China or Britain in the industrial revolution pass into stagnation Beginning with a fascinating concise history of technological progress Mokyr sets the background for his analysis by tracing the major inventions and innovations that have transformed society since ancient Greece and Rome What emerges from this survey is often surprising the classical world for instance was largely barren of new technology the relatively backward society of medieval Europe bristled with inventions and the period between the Reformation and the Industrial Revolution was one of slow and unspectacular progress in technology despite the tumultuous developments associated with the Voyages of Discovery and the Scientific Revolution What were the causes of technological creativity Mokyr distinguishes between the relationship of inventors and their physical environment which determined their willingness to challenge nature and the social environment which determined the openness to new ideas He discusses a long list of such factors showing how they interact to help or hinder a nation s creativity and then illustrates them by a number of detailed comparative studies examining the differences between Europe and China between classical antiquity and medieval Europe and between Britain and the rest of Europe during the industrial revolution He examines such aspects as the role of the state the Chinese gave up a millennium wide lead in shipping to the Europeans for example when an Emperor banned large ocean going vessels the impact of science as well as religion politics and even nutrition He questions the importance of such commonly cited factors as the spill over benefits of war the abundance of natural resources life expectancy and labor costs Today an ever greater number of industrial economies are competing in the global market locked in a struggle that revolves around technological ingenuity The Lever of Riches with its keen analysis derived from a sweeping survey of

creativity throughout history offers telling insights into the question of how Western economies can maintain and developing nations can unlock their creative potential

Jones,2014-07-09 In *The Captive Stage* Douglas A Jones Jr argues that proslavery ideology remained the dominant mode of racial thought in the antebellum north even though chattel slavery had virtually disappeared from the region by the turn of the nineteenth century and that northerners cultivated their proslavery imagination most forcefully in their performance practices Jones explores how multiple constituencies ranging from early national artisans and Jacksonian wage laborers to patrician elites and bourgeois social reformers used the stage to appropriate and refashion defenses of black bondage as means to affirm their varying and often conflicting economic political and social objectives Joining performance studies with literary criticism and cultural theory he uncovers the proslavery conceptions animating a wide array of performance texts and practices such as the Bobalition series of broadsides blackface minstrelsy stagings of the American Revolution reform melodrama and abolitionist discourse Taken together he suggests these works did not amount to a call for the re enslavement of African Americans but rather justifications for everyday and state sanctioned racial inequities in their post slavery society Throughout *The Captive Stage* elucidates how the proslavery imagination of the free north emerged in direct opposition to the inclusionary claims black publics enacted in their own performance cultures In doing so the book offers fresh contexts and readings of several forms of black cultural production including early black nationalist parades slave dance the historiography of the revolutionary era the oratory of radical abolitionists and the black convention movement and the autobiographical and dramatic work of ex slave William Wells Brown **The Works of John Ruskin: Academy notes** John Ruskin,1904 **Works** John Ruskin,1904
