The Ethics Of Creativity:

The Ethics of Creativity Brian G. Henning, 2011-12-09 Foreword by Daniel A Dombrowski A central concern of nearly every environmental ethic is its desire to extend the scope of direct moral concern beyond human beings to plants nonhuman animals and the systems of which they are a part Although nearly all environmental philosophies have long since rejected modernity s conception of individuals as isolated and independent substances few have replaced this worldview with an alternative that is adequate to the organic processive world in which we find ourselves In this context Brian G Henning argues that the often overlooked work of Alfred North Whitehead has the potential to make a significant contribution to environmental ethics Additionally inspired by classical American philosophers such as William James John Dewey and Charles Sanders Pierce and environmental philosophers such as Aldo Leopold Peter Singer Albert Schweitzer and Arne Naess Henning develops an ethical theory of which the seminal insight is called The Ethics of Creativity By systematically examining and developing a conception of individuality that is equally at home with the microscopic world of subatomic events and the macroscopic world of ecosystems The Ethics of Creativity correctly emphasizes the well being of wholes while not losing sight of the importance of the unique centers of value that constitute these wholes In this way The Ethics of Creativity has the potential to be a unique voice in contemporary moral philosophy **The Ethics of Creativity** S. Moran, D. Cropley, J. Kaufman, 2014-03-28 The Ethics of Creativity illuminates the thorny issues that arise when novel creative ideas collide with what we believe to be right or good This book tackles questions of when creativity and ethics tend to coincide and when conflict and how both might be harnessed to support a brighter future for all **Ethical Ripples of Creativity** and Innovation Seana Moran, 2016-04-08 If we are going to promote creativity as an ideal to strive toward shouldn t we make sure we also instil ethical anticipation so our creative contributions produce a better world rather than chaos and waste Creativity drives cultural development We all directly or indirectly collaborate in the creation of culture and we are jointly responsible for the way that culture develops The goals and decisions we make as both creators and adopters pave pathways into the future for us all Instead of merely reflecting on past events Ethical Ripples of Creativity and Innovation educates for proflection through cases that present what might be scenarios for creative contributions that are emerging into mainstream culture stimulating real time thinking about creativity in action This book offers the opportunity to strengthen ethical anticipation by considering the possibilities streaming from current creative offerings that affect our bodies emotions C.G. Jung and Nikolai Berdyaev: Individuation and the Person Georg selves and social interactions Nicolaus, 2010-09-13 This book explores C G Jung s psychology through the perspective of the existential philosopher Nikolai Berdyaev drawing striking parallels between Jung s theory of individuation and Berdyaev s understanding of the person Placing Jung and Berdyaev firmly within the context of secular humanism Nicolaus draws on their personal experiences of individuation to show how both writers seek to enable a renewal of our self understanding as persons in a post religious

society Topics of discussion include the foundations of Berdyaev's personalism Jung's psychological interpretation of the Christian God image individuation and the ethics of creativity C G Jung and Nikolai Berdyaev Individuation and the Person offers a fresh perspective on the ethical implications of Jung's theory and serves also as an introduction to Berdyaev's thought As such this book will appeal to analytical psychologists scholars engaged with Jungian thought and all those interested in the interface between spirituality and depth psychology Whiteheadian Ethics Mihály Tóth, Theodore Walker, 2009-03-26 For deliberations on the ethical and meta ethical implications of Alfred North Whitehead's process philosophy here are abstracts and papers from the Ethics Section of the 6th International Whitehead Conference held at the University of Salzburg in Salzburg Austria in July 2006 In accordance with the conference schedule there are three subsections The subsection on Metaphysics of Morals and Moral Theory includes contributions from Franklin I Gamwell Does Morality Presuppose God John W Lango abstract only Duane Voskuil Ethics Dipolar Necessities and Theistic Implications and Theodore Walker Ir Neoclassical Cosmology and Matthew 22 36 40 The subsection on Evaluating Moral Practices includes contributions from Frederick Ferr abstract only Seung Gap Lee Hope for the Earth A Process Eschatological Eco ethics for South Korea Mary Elizabeth Mullino Moore Compassion Creativity and Form The Ethics of Institutions and George W Shields Ruse Altruism and Process Philosophy The subsection on Ethics and Aesthetic Values includes contributions from Stephen T Franklin abstract only Brian G Henning Is There an Ethics of Creativity Mih ly T th Art of Life and the Ethics of Life Forming and Guorong Yang Problems and Perspectives in the Emerging of Global Society A History of Russian Philosophy V. leading philosophers aim both to advance philosophical understanding of Nietzsche's ethical views his normative and meta ethics his moral psychology his views on free will and the nature of the self and to make Nietzsche a live participant in contemporary debates in ethics and cognate fields Philosophers on the University Ronald Barnett, Amanda Fulford, 2020-02-26 This book shows the significance of the thinking of philosophers and other key thinkers in understanding the university and higher education Through those explorations it widens and substantially adds to the emerging philosophy of higher education It builds on the historical literature on the idea of the university and provides higher education scholars with highly accessible introductions to the thinking of key philosophers and thinkers alerting them to a set of literature that otherwise might not be encountered Until very recently most of the debate on higher education both in the public domain and in the scholarly literature has been conducted with little regard to the philosophical literature This is odd for two reasons Firstly much of the historical literature on the idea of the university over the past two hundred years has been written by philosophers and their thinking has largely gone unmined Second and perhaps even more importantly many of the issues in the higher education debate are either philosophical in their nature or require reflective thinking and there lies to hand huge resources in the philosophical literature that can help in working through those issues Issues such as what is to count as knowledge in the university wisdom voice democracy culture what it is to be a student or academic academic freedom communication work and disciplinarity cry out for the kind of insights that the philosophical literature very broadly understood can offer This book attempts precisely to do this to show how the work of key thinkers can help in deepening the higher education debate Each chapter focuses on an individual thinker giving both an insight into the thinker in guestion and accessibly drawing out something of their thinking and showing its significance in understanding the university and higher education The editors provide a full length introduction that marks out this large territory and prepares the ground for the reader The book impressively builds a rich meshwork of careful and thorough thinking around the university and higher education by way of introducing 14 important philosophers on timely subjects such as culture and the university higher education and democracy and the role of the university The volume is a great contribution to the important task of deepening the debate about higher education and the university through introducing important philosophers in ways that might help the university and higher education work through some of the issues and challenges that it is currently facing As such this book is essential reading for anyone wanting to wander and wonder deeper into the core purposes and possibilities of higher education in the good companionship of outstanding thinkers and distinguished academics on these matters A playground for philosophical thought and adventure Rikke Toft N rg rd Associate Professor Aarhus University Denmark This book is an excellent introduction to a wide range of famous thinkers and what they have to say about the university and higher education today It goes beyond the contemporary preoccupation with metrics based on managerialism and takes a much needed philosophical look at what higher education should be or should aspire to be Assoc Prof Stephen Loftus Foundational
