## **The European Experience Since 1815:**

**The European Experience Since 1815** Peter N. Stearns, 1972      *The European Experience* Jan Hansen, Jochen Hung, Jaroslav Ira, Judit Klement, Sylvain Lesage, Juan Luis Simal, Andrew Tompkins, 2023-02-21 The European Experience brings together the expertise of nearly a hundred historians from eight European universities to internationalise and diversify the study of modern European history exploring a grand sweep of time from 1500 to 2000 Offering a valuable corrective to the Anglocentric narratives of previous English language textbooks scholars from all over Europe have pooled their knowledge on comparative themes such as identities cultural encounters power and citizenship and economic development to reflect the complexity and heterogeneous nature of the European experience Rather than another grand narrative the international author teams offer a multifaceted and rich perspective on the history of the continent of the past 500 years Each major theme is dissected through three chronological sub chapters revealing how major social political and historical trends manifested themselves in different European settings during the early modern 1500 1800 modern 1800 1900 and contemporary period 1900 2000 This resource is of utmost relevance to today's history students in the light of ongoing internationalisation strategies for higher education curricula as it delivers one of the first multi perspective and truly European analyses of the continent's past Beyond the provision of historical content this textbook equips students with the intellectual tools to interrogate prevailing accounts of European history and enables them to seek out additional perspectives in a bid to further enrich the discipline

**A Modern History of the Balkans** Thanos Veremis, 2017-02-28 The history of the Balkans has been a distillation of the great and terrible themes of 20th century history the rise of nationalism communism fascism genocide identity and war Written by one of the leading historians of the region this is a new interpretation of that history focusing on the uses and legacies of nationalism in the Balkan region In particular Professor Veremis analyses the influence of the West from the fall of the Ottoman Empire and the rise and collapse of Yugoslavia Throughout the state building process of Greece Serbia Rumania Bulgaria and later Albania the West provided legal administrative and political prototypes to areas bedevilled by competing irredentist claims At a time when Slovenia Rumania Bulgaria and Croatia have become full members of the EU yet some orphans of the Communist past are facing domestic difficulties A Modern History of the Balkans seeks to provide an important historical context to the current problems of nationalism and identity in the Balkans

**A History of the European Restorations** Michael Broers, Ambrogio A. Caiani, 2019-11-14 Europe's Restorations were characterised by their evolving dialectics The chapters in this first volume address the key questions and controversies of Napoleonic history from a national and international perspective From the re ordering of the European world through the tools of intervention occupation and diplomacy to the creation of new constitutional monarchies across France Scandinavia and Germany the volume outlines the processes that realigned national priorities and the accompanying dynamics of social and political identity In a structure that makes sense of what Luigi

Mascilli Migliorini describes as the fiendishly complex process of reconstructing order in post Napoleonic Europe this collection of essays brings together experts in the field to set a new precedent for transnational research frameworks in the study of the European Restorations

*Businessmen and Politics in the Rhineland, 1789-1834* Jeffry M. Diefendorf,2014-07-14 In an attempt to understand the political history of the German middle class in the nineteenth century Jeffry Diefendorf studies in detail the political social and economic behavior of three business communities on the Left Bank of the Rhine between 1789 and 1834 Originally published in 1980 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

History, Fiction, and Germany Brent Orlyn Peterson,2005 A study of the content development and transmission of German identity during the nineteenth century as Germany's national narrative took shape in historical fiction and in both popular and academic history The German speaking inhabitants of central Europe did not automatically think of themselves as Germans not before 1871 and not always after unification In fact they spoke mutually incomprehensible dialects owed allegiance to different leaders worshiped in different churches and would not have recognized each other's customs If asked about their identity these prospective Germans might have answered Austrian Bavarian or Prussian and they could as easily have used more local labels or resorted to occupational markers For this disparate population to think of itself as German that word had to acquire content people had to learn a whole set of stories they could tell themselves and to others in answer to the question of identity History Fiction and Germany chronicles how German nationalism developed simultaneously with the historical novel and the field of history both at universities and in middlebrow reading material The book examines Germany's emerging national narrative as nineteenth century writers adapted it to their own visions and to changing circumstances These writers found and popularized the nation's heroes and heroines demonized its villains and enemies and projected the nation's hopes and dreams for the future Author Brent O Peterson argues that it was the production and consumption of national history the writing and reading of the nation that filled Germany with Germans Although the task of national narration was never complete and never produced a single universally accepted version of German national identity tales from Germans gradually shared history did more to create Germany than any statesman general or philosopher History Fiction and Germany provides a valuable resource for scholars and students of German studies as well as anyone interested in history and the articulation of national identity

**Economic Warfare and the Sea** David G. Morgan-Owen,Louis Halewood,2020 Economic Warfare and the Sea examines the relationship between trade maritime warfare and strategic thought between the early modern

period and the late twentieth century Using a variety of geographic and chronological examples it presents a *longue duree* approach to a crucial theme in maritime strategic thought

**Economic Warfare and the Sea** David Morgan-Owen, Louis Halewood, 2020-03-03 *Economic Warfare and the Sea* examines the relationship between trade maritime warfare and strategic thought between the early modern period and the late twentieth century Featuring contributions from renowned historians and rising scholars this volume forwards an international perspective upon the intersection of maritime history strategy and diplomacy Core themes include the role of economic warfare in maritime strategic thought prevalence of economic competition below the threshold of open conflict and the role non state actors have played in the prosecution of economic warfare Using unique material from 18 different archives across six countries this volume explores critical moments in the development of economic warfare naval technology and international law including the Anglo Dutch Wars the French Revolutionary and Napoleonic Wars the First World War and the Second World War Distinct chapters also analyse the role of economic warfare in theories of maritime strategy and what the future holds for the changing role of navies in the floating global economy of the twenty first century

*The History of Migration in Europe* Francesca Fauri, 2014-10-03 *The History of Migration in Europe* belies several myths by arguing for example that immobility has not been the normal condition of people before the modern era Migration far from being an income maximizing choice taken by lone individuals is often a household strategy and local wages benefit from migration This book shows how successes arise when governments liberalize and accompany the international movements of people with appropriate legislation while failures take place when the legislation enacted is insufficient belated or ill shaped Part I of this book addresses mainly methodological issues Past and present migration is basically defined as a cross cultural movement cultural boundaries need prolonged residence and active integrationist policies to allow cross fertilization of cultures among migrants and non migrants Part II collects chapters that examine the role of public bodies with reference to migratory movements depicting a series of successes and failures in the migration policies through examples drawn from the European Union or single countries Part III deals with challenges immigrants face once they have settled in their new countries Do immigrants seek integration in their host culture Through which channels is such integration achieved and what roles are played by citizenship and political participation What is the identity of migrants and their children born in the host countries This text's originality stems from the fact that it explains the complex nature of migratory movements by incorporating a variety of perspectives and using a multi disciplinary approach including economic political and sociological contributions

**Bibliography of European Economic and Social History** Derek Howard Aldcroft, Richard Rodger, 1993 This bibliographical guide contains 10 000 references to the economic and social history of 30 European countries during the period 1700 1939 More than 3000 periodicals have been consulted to obtain references as well as books edited collections and conference proceedings The information is listed in categories such as industry agriculture finance migration labour conditions urban communities and organizations Full publication details are
