The European Union Mercosul And The New World Order:

Supranationalism in the New World Order Paul Close, Emiko Ohki-Close, 1999-03-25 Supranationalism in the New World Order argues that in the post Cold War distribution of global power and configuration of global players the European Union is just one among a growing number of regional regimes that are acquiring prominent roles in the process of global governance to some extent through the operation of differentiated zones of geo political management The EU is currently the most advanced and influential example of a regional regime by virtue of having the novel European Community at its core the EC uniquely being constructed around supranational institutions decision making and laws But the EU s uniqueness is unlikely to last The evident competitive advantages of supranational regional regimes in conjunction with the realism generally adopted by the various global players is conducive to the consolidation and proliferation of SRRs in a manner consistent with the neo functionalist perspective on the progress of the EU Other prospective SRRs include the Association of Southeast Asian Nations the East Asian Economic Caucus the South Asian Society for Regional Cooperation the North American Free Trade Area and the Andean Community It is argued that the emerging character of the global system will increasingly depend on SRRs the relationships among such organizations and accordingly the doctrine of supranationalism The book offers a distinctive way of representing the global system global processes and global developments with the help of a set of freshly articulated concepts The result is a novel but highly contentious treatise *In the Shadow of the Generals* Martin Mullins, 2017-11-30 Providing an in depth study of the construction of foreign policy in developing countries Martin Mullins takes an original line of both a post positivist methodology and an acceptance of the importance of the realism in foreign policy formation in the Southern Cone countries from the early 1980s to the present day This carefully constructed work highlights the case of Chilean foreign policy in the 1990s in order to examine the adoption of realism in its policy formation in contrast to the strong historical narratives of Argentina and Brazil The volume focuses on the nuances of foreign policy making through a comprehensive study of political culture that underlines the links between domestic and foreign policy sets in the region European Union and New Regionalism Mario Telò, 2013-03-28 Stemming from an international and multidisciplinary network of leading specialists this best selling text is fully updated with new chapter additions With the first edition prepared at the end of the last century this new edition anticipates the world of regionalism as we move further into this millennium This new edition offers A vigorous response to conventional wisdom on EU international identity An exploration of key issues of regionalism versus globalization and the potential for world economic and political governance through regionalism A key resource for postgraduate or undergraduate study and research of international relations European studies comparative politics and international political economy Taking into account the expanded European Union the volume comprises contributions from established scholars in the field to highlight external relations in the framework of the development of regional arrangements within the globalized world of the 21st century **Rethinking the World Trade**

Order Mohammad F. A. Nsour, 2010 Regional Trade Agreements RTAs have proliferated at an unprecedented pace since the creation of the World Trade Organization WTO Although the WTO legally recognizes countries entitlement to form RTAs neither the WTO nor parties to RTAs have an unequivocal understanding of the relationship between the WTO and RTAs In other words the legal controversies the result of uncertainty regarding the application of the WTO GATT laws risk undermining the objectives of the multilateral trade system This research tackles a phenomenon that is widely believed to be heavily economic and political It highlights the economic and political aspects of regionalism but largely concentrates on the legal dimension of regionalism The main argument of the book is that the first step to achieving harmony between multilateralism and regionalism is the identification of the legal uncertainties that regionalism produces when countries form RTAs without taking into account the substantive and procedural aspect of the applicable WTO GATT laws The book calls for the creation of a legal instrument i e agreement on RTAs that combines all of the applicable law on RTAs and simultaneously clarifies the legal language used therein Likewise the WTO should have a proactive role not merely as a coordinator of RTAs but as a watchdog for the multilateral system that has the power to prosecute violating RTAs The author is aware that political concerns are top priorities for governments and policy makers when dealing with the regionalism problematic Hence legal solutions or proposals are not sufficient to create a better international trade system without the good will of the WTO Members who are in fact the players who are striving to craft more regional trade arrangements

The European Union and the United States Steven McGuire, Michael Smith, 2008-05-14 This major new text by leading authorities takes a broad interdisciplinary approach to the changing relationship between the EU and the US in the 21st century and its historical global and domestic context The authors focus on the contrast between the policy convergence and interdependence on the one hand and the intense competition on the other

The EU as a Global Player Fredrik Soderbaum, Luk Van Langenhove, 2013-09-13 A new look at the European Union's role as a global actor with special focus on the theme of interregionalism in its relations with key regions around the world Africa Asia South America North America and Central Eastern Europe This new collection clearly shows how since the end of the Cold War the European Union has gradually expanded its external relations and foreign policies and become a global actor in world politics During the last decade interregionalism has become a key component of the EU's external relations and foreign policies In fact the EU has quickly become the hub of a large number of interregional arrangements with a number of regions around the world Promoting regional and interregional relations not only justifies and enhances the EU's own existence and efficiency as a global player the strategy also promotes the legitimacy and status of other regions giving rise to a deepening of cross cutting interregional relations in trade and economic relations political dialogue development cooperation cultural relations and security cooperation This book was previously published as a special issue of the leading Journal of European Integration

The European Union as a Global Actor Charlotte Bretherton, John Vogler, 2005-03-15 This comprehensive up to date and

theoretically informed text examines the full range of the European Union's external relations including the Common Foreign and Security Policy. It looks at the increasingly important part the EU plays in global politics. The authors argue that the EU's significance cannot be grasped by making comparisons with traditional states. Issues covered include the status coherence consistency and roles of the EU as an actor and what being an actor means in practice how the field of trade relations forms the basis of the EU's activities the EU in global environmental diplomacy North South relations and in relation to the Mediterranean and East Central Europe the EU's controversial relationship to the Common Foreign and Security Policy and defence.

Contemporary European Politics José M. Magone, José Magone, 2013-07-03 In this important new introductory textbook Jos Magone provides an accessible and comprehensive introduction to contemporary European politics. The unification of the European continent since the Fall of the Berlin wall in 1989 and the collapse of communist regimes in Central and Eastern Europe has changed the nature of European politics. This book seeks to address the new European politics that emerged out of this coming together of West and East. Utilizing a pan European comparative approach the book covers key topics with chapters on the history theory institutions parties and party systems interest groups systems of interest intermediation and civil society the impact of European public policy and the emergence of a European common and foreign policy provides detailed comparisons of the national political systems across Europe including Central and Eastern Europe and the Balkans contextualises national politics in the growing importance of European integration examines the European Union multi level governance system approach highlighting relationships and interactions between the global supranational national regional and local levels analyses the change from modern politics in which the

nation state was still in command of domestic politics and its own borders to postmodern politics in which de territorialisation de nationalisation and internationalisation processes have transformed the national politics of European states facilitates learning through a wide range of pedagogical features including chapter summaries guides to further reading questions for revision and extensive use of maps figures case studies and tables Richly illustrated throughout this work is an indispensable resource for all students and academics of European politics

The New World Architecture
 Jose Magone, 2017-07-28 The collapse of the bipolar world sustained by the United States and the former Soviet Union led to a power vacuum in the 1990s that the European Union has only reluctantly begun to fill It is under pressure to take over important international tasks and roles in order to develop a new equilibrium in the system of international relations After 2000 reforms were undertaken so that the European Union could deal more efficiently with the tasks the new political system had acquired since the early 1990s With respect to its international role reorganization of the EU's external relations department was high on the list The New World Architecture explores the contribution that the European Union is making to the emerging global governance system It discusses the theoretical and historical aspects of European integration within the framework of the emerging regional EU and global governance systems It explores three regimes of governance that are contributing to holding together the new emerging EU multilevel governance system None of these is complete all are partial They include the political regime of governance the socioeconomic regime of governance and the territorial regime of governance The author assesses the impact of the European Union on global politics The Mediterranean and Latin America represent regions in which the European Union is investing considerable effort in order to create new forms of cooperation Magone argues that within the next twenty five years global governance may and should emerge as the new and reconfigured stable system of international relations In this system the European Union is and will remain the most advanced regional system This volume will be of interest to specialists scholars and students of European Politics and the European Union

Latin America in the 21st Century Gian Luca Gardini, 2012-04-12 Twenty first century Latin America is rich in history culture and political and social experimentation In this fascinating and insightful analysis Gardini looks at contemporary developments at three interconnected levels state region and globe At the state level leaders such as Evo Morales of Bolivia and Chavez of Venezuela embody a renewed intellectual autonomy in the continent while revealing significant discrepancies between their rhetoric and their actions At the regional level while a consensus has emerged over Latin American unity as the only way towards development the existence of several competing schemes of regional economic and political integration more accurately reflect the diversity of the area At the global level elements of change such as the rise of Brazil and the involvement of China as a new trade partner sit alongside traits of continuity such as the crucial political economic and ideational role played by Washington Overall Gardini argues that despite the numerous challenges to be faced Latin America is now more wealthy autonomous and better placed in global geopolitics than at any time in its recent

history **Dynamics of the External Relations of Latin America and the Caribbean** ,1998 The European Union and Global Governance Dr Jens-Uwe Wunderlich,David J. Bailey,2010-12-14 The European Union and Global Governance A Handbook aims to analyse contemporary debates in European Studies in order to provide lessons for the development design and normative evaluation of global governance It brings together scholars of European studies and international relations where much of the literature on regional and global governance is located thereby providing interdisciplinary lessons from the study of European Union and its governance that can be used to re evaluate processes of global governance Each chapter examines methodological theoretical or empirical discussions within European studies in order to draw insights for current developments in global governance State, Globalization and Multilateralism Mario Telò,2012-02-18 This volume presents a reconsideration of the concepts of State and political power within the evolving multilateral network of cooperation and conflict By means of an innovating research strategy it explains state resilience within global governance while deepening the obsolescence of the traditional sovereign state concepts including by emerging powers Rather than considering the EU as an isolated case study the book considers the EU as both a reference and a proactive player which fosters a new research agenda both for comparative studies and political theory Lastly in view of the currently emergent unprecedented and asymmetrical multi polar world it considers the need for a new research agenda on multilateralism Region-building Ludger Kühnhardt,2010-07-01 After two centuries of nation building the world has entered an era of region building in search of political stability cultural cohesion and socio economic development Nations involved in the regional structures and integration schemes that are emerging in most regions of the world are deepening their ambitions with Europe s integration experience often used as an experimental template or theoretical model Volume I provides a political analytical framework for recognizing the central role of the European Union not only as a conceptual model but also a normative engine in the global proliferation of regional integration It also gives a comprehensive treatment of the focus motives and objectives of non European integration efforts Volume II offers a unique collection of documents that give the best available overview of the legal and political evolution of region building based on official documents and stated objectives of the relevant regional groupings across all continents Together these volumes are important contributions for understanding the evolution of global affairs in an age when power shifts provide new challenges and opportunities for transatlantic partners and the world community **The European Union and World Politics** A. Gamble,D. Lane,2009-08-12 Divisions in the EU are considered as well as the conflicts that have arisen from enlargement and foreign policy concerns Leading specialists on European politics and society reflect on the nature of consensus and competition between elites and whether the EU may be able to provide a sense of common identity and purpose for its citizens **Globalisation, Multilateralism, Europe** Mario Telò,2016-04-22 This student friendly textbook offers a comprehensive introduction to globalization studies and the European Union within a multipolar world It provides its readers with critical analysis of the key concepts of multilateral global and

regional governance and Europe's role in the world and this in an accessible and intelligible fashion This volume collects contributions by eminent scholars from world class universities from five different continents As such this unique exercise in transnational multi disciplinary cooperation provides extensive coverage of the main issues pertaining to multilateral cooperation notably its history troubles legitimacy challenges and efficiency questions from a variety of national perspectives The book covers the major issues confronting students of European and global studies amongst which pressing security challenges new forms of institutionalized cooperation shifting international trade flows the notion of responsibility to protect social imbalances and environmental emergencies the need for less contingent forms of legitimacy for global regulation as well as global public opinion and transnational civil society networks Each chapter includes a summary of its salient points methodological indications illuminating illustrations and a suggested list for further reading This textbook strives to help students develop a better and more secure grasp of the innovative balance between interdisciplinary openness and disciplinary rigor when engaging with global governance studies comparative regionalism normative studies international political economy or international law *Frameworks of the European Union's Policy Process* Nikolaos

Zahariadis, 2017-07-05 The book advances the state of the European Union's policy theory by taking stock of seven promising frameworks of the policy process systematically comparing their limitations and strengths and offering a strategy to develop robust research agendas Frameworks may constitute competing policy explanations depending on assumptions they make about EU institutional and issue complexity The frameworks include detailed analyses of multi level governance advocacy coalitions punctuated equilibrium multiple streams policy learning normative power Europe and constructivism Besides generating a fertile dialogue that transcends the narrow confines of EU policy contributions highlight the value of intellectual pluralism and the need for clear and rigorous explanations of the policy process This book was published as a special issue of the Journal of European Public Policy **Science Diplomacy, Cyberdiplomacy and Techplomacy in EU-LAC Relations**

Mario Torres Jarrín, Shaun Riordan, 2023-10-03 This book explores collaborations between the European Union EU and the CELAC Community of Latin American and Caribbean States in science diplomacy as well as the related areas of cyberdiplomacy and techplomacy It focuses on how interregional collaboration could strengthen societal resilience in both LAC and EU member countries and contribute to realising the SDGs and Agenda 2030 objectives The book explores the history of EU relations with LAC and provides a conceptual basis for science diplomacy including cyberdiplomacy and techplomacy in the context of international relations and diplomacy studies It highlights how COVID 19 has accelerated pre existing trends in diplomacy in EU and LAC forcing diplomats online and making them confront scientific and technical issues as core parts of foreign policy agendas and future pandemic preparedness The book also examines the role of science diplomacy between these regions in relation to the climate change debate and reflects on whether the EU LAC collaboration in science and R D can be taken to a policy level It provides suggestions on ways in which the CELAC and the EU could

collaborate both in promoting a ruled based cyberspace and in strengthening digital resilience and situates this collaboration in the broader geopolitical scientific and technological environments Authored by experts in this field this highly topical book is of interest to a wide readership interested in diplomacy studies public policy international relations regionalism and S T studies The New Politics of Regionalism Ulf Engel, Heidrun Zinecker, Frank Mattheis, Antje Dietze, Thomas Plötze, 2016-10-04 This edited volume approaches regionalism as one potential pattern in a changing global order Since the end of the Cold War different forms of territorialization have emerged and we are confronted with an increasing number and variety of actors that are establishing regional projects This volume offers an innovative contribution to the study of this new complexity by exploring constellations of regional actors spatial scales and imaginations beyond state centred perspectives as well as on multiple often overlapping levels The chapters analyse the emergence trajectories and outcomes of regionalisms from the perspective of the Global South specifically concentrating on regional projects in Latin America and Africa but also in the Asia Pacific They attempt to identify the specific conditions and junctures of different forms of region making in their external global and internal local national dimensions The volume also places special emphasis on interactions spatial entanglements and comparisons between regionalisms in different parts of the world By expanding beyond the perspective of North South transfers this book seeks to better understand the dynamics and diversity of interregional interactions This volume will appeal to scholars of global studies international political economy international relations human geography and development studies as well as area studies specialists who focus on Latin America and Africa
