many centuries. The same is true of Medieval cathedrals, and is of course now well documented for Stonehenge, although Silbury Hill was the result of a continuous process of construction. The early Neolithic construction of cursus monuments would be more intelligible in these terms.

Figure 4. The major henge monuments of Dorset and Wiltshire (shown by triangles) in relation to the earlier Neolithic enclosures (shown by circles). The large monuments at Stonehenge and Silbury Hill are also shown. They and their area formerly served by a causewayed enclosure now has a major henge, except the west part of the Salisbury Plain, which is now apparently served with the eastern part.

Turning now to the late Neolithic period, we are perhaps inclined to think in terms of an increased population and a more developed social hierarchy. For certainly the carrying capacity of the land

The Explanation Of Culture Change Models In Prehistory:

The Explanation of Culture Change: Models in Prehistory Colin Renfrew, 1973 Proceedings of a meeting of the Research Seminar in Archaeology and Related Subjects held at the University of Sheffield 14th 16th December 1971 **The Explanation of Culture Change** C. RENFREW (ed), 1973 Globalization and Global History Barry K. Gills, William Thompson, 2012-11-12 Globalization and Global History argues that globalization is not an exotic and new phenomenon. Instead, it emphasizes that globalization is something that has been with us as long as there have been people who are both interdependent and aware of that fact. Studying globalization from the vantage point of long term global history permits theoretical and empirical investigation allowing the authors collected to assess the extent of ongoing transformations and to compare them to earlier iterations. With this historical advantage, the extent of ongoing changes which previously appeared unprecedented can be contrasted to similar episodes in the past. The book is divided into three sections. The first focuses on how globalization has been written about from a historical perspective. The second part advances three different takes on how best to view globalization from a very long term stance. The final section continues this interpretative thread by examining more narrow aspects of globalization processes ranging from incorporation processes to systemic disruptions.

Current Approaches to Tells in the Prehistoric Old World Antonio Blanco-González, Tobias L. Kienlin, 2020-11-30 Deeply stratified settlements are a distinctive site type featuring prominently in diverse later prehistoric landscapes of the Old World. Their massive materiality has attracted the curiosity of lay people and archaeologists alike. Nowadays a wide variety of archaeological projects are tracking the lifestyles and social practices that led to the building up of such superimposed artificial hills. However, prehistoric tell dwelling communities are too often approached from narrow local perspectives or discussed within strict time and culture specific debates. There is a great potential to learn from such ubiquitous archaeological manifestations as the physical outcome of cross cutting dynamics and comparable underlying forces irrespective of time and space. This volume tackles tells and tell like sites as a transversal phenomenon whose commonalities and divergences are poorly understood yet may benefit from cross cultural comparison. Thus the book intends to assemble a representative range of ongoing theory and science based fieldwork projects targeting this kind of sites. With the aim of encompassing a variety of social and material dynamics, the volume's scope is diachronic from the Earliest Neolithic up to the Iron Age and covers a very large region from Iberia in Western Europe to Syria in the Middle East. The core of the volume comprises a selection of the most remarkable contributions to the session with a similar title celebrated in the European Association of Archaeologists Annual Meeting held at Barcelona in 2018. In addition, the book includes invited chapters to round out underrepresented areas and periods in the EAA session with relevant research programmes in the Old World. To accomplish such a cross cultural course, the book takes a case based approach with contributions disparate both in their theoretical foundations from household archaeology, social agency and formation theory and their research strategies.
